LOGIC,
SEMANTICS, METAMATHEMATICS

Papers from 1923 to 1938

BY ALFRED TARSKI

Translated by J. H. WOODGER

This book is a collection of Alfred Tarski's main pre-war contributions to mathematical logic and metamathematics. They were originally published in French, German and Polish and now appear for the first time in English. Included among them is Tarski's celebrated monograph on the concept of truth in formalized languages. The articles have all been revised by the author, and bibliographical references have been added throughout. 60s. net

PHILOSOPHICAL ANALYSIS

Its Development between the two World Wars

BY J. O. URMSON

'A world war does not stop philosophers thinking; but it makes publication of their thoughts difficult, and breaks down lines of communication between one centre and another. Mr Urmson has therefore done a very useful thing in explaining the origins of the present fashion of philosophy, whether rightly or wrongly called Logical Positivism, and in trying to assess its value.' *Oxford Magazine* 18s. net

OXFORD UNIVERSITY PRESS

The Works of
George Berkeley

VOLUME VIII

edited by A. A. LUCE

All Berkeley's extant letters, with the exception of a few which appeared in previous volumes in the series, some 270 in all—of which about 50 have never been printed before in any collection—are contained in this volume. It completes the publication of Berkeley's works, and Volume IX, which is to follow, will contain annotations and notes to the letters and an index of the complete works.
