

# Communication Processes and Relationships

**Robyn Penman**

*October 1980, viii + 156pp., £9.80 (UK only)/\$23.00, 0.12.550380.6*

The study of human relationships requires an analysis of the way people communicate, since it is by communicating that we initiate, maintain and change our relationships with others. The analysis of communication has been undertaken both by social psychologists and by information and communications scientists. This book integrates the contributions made by these disciplines and proposes a new method of examining communications and hence relationships.

# How Twins Learn to Talk

**A Study of the Speech Development of Twins from 1 to 3**

**Svenka Savić**

*September 1980, xvi + 196pp., £15.00 (UK only)/\$34.50, 0.12.619580.3*

Within the field of child language studies, there are few areas that have given rise to as much speculation and debate amongst non-specialists as the speech habits of twins. There are numerous theories but few hard facts: Dr Savić's book provides concrete answers to a number of basic questions.

## The Organization of Language

Janice Moulton and George M. Robinson

Moulton and Robinson present an important new theory clarifying the relationship of language and thought. Their cognitive model of syntax and language acquisition and general analysis of language addresses such questions as: What are the essential features of language that permit a sentence to convey a complex idea? How do language users produce and understand meaningful sentences? What enables humans—and perhaps apes and robots—to learn this remarkable skill? Over 100 tables and diagrams.

## Universals of Human Thought Some African Evidence

Barbara Lloyd and John Gay, Editors

An investigation into the existence of universals in the mental processes underlying social and cultural diversity. Essays focus on relevant data in Africa to examine the major questions, dealing respectively with perception, cognitive development, and language. With a general review and prospectus by Jerome Bruner, and an extensive introduction to the philosophical background by Ernest Gellner.

## INSTRUCTIONS TO AUTHORS

### *Components and style of the manuscript*

Authors of articles or notes should submit their original manuscript plus two copies to:

Sheldon Rosenberg, Editor  
Applied Psycholinguistics  
Department of Psychology  
University of Illinois at Chicago Circle  
Box 4348  
Chicago, Illinois 60680

Full length articles (original research, theoretical or methodological studies, literature reviews) should not exceed 14,000 words. Shorter notes may be, for instance, reports of work in progress or critical responses to articles or notes previously published in *Applied Psycholinguistics*.

### *Spelling, capitalization, and punctuation*

should be consistent within each article and each note, and should follow the style recommended in the latest edition of the *Publication Manual of the American Psychological Association*. A title should be given for each article and note. An *auxiliary short title* should be given for any article or note whose title exceeds 50 characters. The *author's name* should be given in the form preferred for publication; the *affiliation* should include the author's full mailing address. An *abstract* should be prepared for each article (limited to 120 words) and note (limited to 60 words). *Tables and figures* (which comprise photographs, charts or other artwork) should be numbered consecutively throughout the article or note. *Bibliographic citations in the text* must include the author's last name and the date of publication and may include page references. Complete bibliographic information for each citation should be included in the list of references. Examples of correct styling for bibliographic citations are: Brown (1973), Ingram (1976, 54–55), Smith and Miller (1966), (Smith & Miller, 1966), (Peterson, Danner & Flavell, 1972) and subsequently (Peterson et al., 1972). *References* should be typed in alphabetical order using the style of the following examples:

Brown, R. Schizophrenia, language and reality. *American Psychologist*, 1973, 28, 395–403.

Ingram, D. *Phonological disability in children*. New York: Elsevier, 1976.

Krashen, S.D. Individual variation in the use of the Monitor. In W.C. Ritchie (Ed.), *Second language acquisition research*. New York: Academic Press, 1978.

Smith, F., & Miller, G.A. (Eds.), *The genesis of language*. Cambridge, Mass.: M.I.T. Press, 1966.

Titles of journals should *not* be abbreviated.

### *Preparation of the manuscript*

The entire manuscript, including footnotes and references, should be typed double-spaced on 8½ by 11 inch or A4 paper, with margins set to accommodate approximately 70 characters per line and 25 lines per page, and should not exceed 50 typed pages. Each element of the article or note should begin on a new page and should be arranged as follows: title page (including title, short title, author's full name and affiliation, including mailing address), abstract, text with tables interspersed as they occur, appendixes, acknowledgements, footnotes, references (including reference notes for unpublished citations), captions and figures. Each table and figure should be submitted on a separate page. Manuscript pages should be numbered consecutively.

Figures should be ready for photographic reproduction; they cannot be redrawn by the printer. Charts, graphs, or other artwork should be drawn in black ink on white paper to occupy a standard area of 8½ by 11 or 8½ by 5½ inches before reduction. Photographs should be glossy black-and-white prints; 8 by 10 inch enlargements are preferred. All labels and details on figures should be clearly printed and large enough to remain legible after a reduction to half-size. It is recommended that labels be done in transfer type of a sans-serif face such as Helvetica.

### *Copyediting and proofreading*

The publishers reserve the right to copyedit and proof all articles and notes accepted for publication. Authors will review their copyedited manuscripts only if changes have been substantial. Page proofs of articles and notes will be sent to authors for correction of typographical errors only; authors must notify the editorial office of any changes within 48 hours or approval will be assumed.

The latest edition of the *Publication Manual of the American Psychological Association* should be consulted for instructions on aspects of manuscript preparation and style not covered in these instructions. The Editor may find it necessary to return for reworking and retyping manuscripts that do not conform to requirements.

Each author will receive 25 offprints of his or her article or note without charge; additional copies may be purchased if ordered at proof stage.

Submission of an article or note implies that it has not been published elsewhere. Authors are responsible for obtaining written permission to publish material (quotations, illustrations, etc.) for which they do not own the copyright. Contributors of accepted articles and notes will be asked to assign their copyrights, on certain conditions, to Cambridge University Press.
