

**Nutrition Research Reviews**, published annually by Cambridge University Press, presents authoritative and critical reviews of research that advance new concepts and encourage fresh thinking on a variety of nutritional problems. The journal's main objective is to encourage the exchange of fundamental ideas on nutritional well-being. The subscription (excluding VAT) to volume 9, 1996, is £50 including postage (US \$90 in USA, Canada and Mexico).

**The Proceedings of the Nutrition Society**, published by Cambridge University Press, in part record meetings of the Symposium type, at which experts in a particular field are invited by Council to make contributions on specific parts of it and at which general discussion follows these invited contributions. The meetings also include sessions at which papers are communicated by members and others on original work. It is proposed at present to publish summaries of the papers read at each meeting, each communication being recorded in the Society's *Proceedings* by means of an abstract not exceeding in length 400 words or the equivalent space in print. The *Proceedings* are published three times a year.

The subscription (excluding VAT) to the *Proceedings* is £144.00 (US \$264.00 in USA, Canada and Mexico). Single issues are £53.00 (US \$98.00 in the USA, Canada and Mexico) each; postage extra.

**Copying.** This journal is registered with the Copyright Clearance Center, 222 Rosewood Drive, Danvers, MA 01923. Organizations in the USA who are also registered with C.C.C. may therefore copy material (beyond the limits permitted by sections 107 and 108 of the US copyright law) subject to payment to C.C.C. of the per-copy fee of \$11.00. This consent does not extend to multiple copying for promotional or commercial purposes. Code 0007-1145/96 \$11.00+.10. Organizations authorized by the Copyright Licensing Agency may also copy material subject to the usual conditions.

*ISI Tear Sheet Service*, 3501 Market Street, Philadelphia, Pennsylvania 19104, USA, is authorized to supply single copies of separate articles for private use only.

For all other use, permission should be sought from Cambridge or the American Branch of Cambridge University Press.

Information on *The British Journal of Nutrition* and all other Cambridge journals is available on <http://www.cup.cam.ac.uk/> and in North America on <http://www.cup.org/>.

## CONTENTS

**Rapidly available glucose and the glycaemic response**

- Measurement of rapidly available glucose (RAG) in plant foods: a potential *in vitro* predictor of the glycaemic response *Hans N. Englyst, Jan Veenstra & Geoffrey J. Hudson* 327-337

**Effects of dietary fibre on gastrointestinal function**

- Effects of varying content of soluble dietary fibre from wheat flour and oat milling fractions on gastric emptying in pigs. *Helle N. Johansen, K. E. Bach Knudsen, Brittmari Sandstrom & F. Skjøth* 339-351

- Consequences of reduced fibre intake on digestion, rate of passage and caecal microbial activity in the young rabbit. *R. Bellier & T. Gidenne* 353-363

- The influence of dietary fibre and environmental temperature on the development of the gastrointestinal tract, digestibility, degree of fermentation in the hind-gut and energy metabolism in pigs. *Henry Jørgensen, Xin-Quan Zhao & Bjørn O. Eggum* 365-378

- The influence of dietary fibre source and level on the development of the gastrointestinal tract, digestibility and energy metabolism in broiler chickens. *Henry Jørgensen, Xin-Quan Zhao, Knud Erik Bach Knudsen & Bjørn O. Eggum* 379-395

**Purine metabolism in buffaloes**

- Urinary excretion of purine derivatives and tissue xanthine oxidase (EC 1.2.3.2) activity in buffaloes (*Bubalis bubalis*) with special reference to differences between buffaloes and *Bos taurus* cattle. *X. B. Chen, L. Samaraweera, D. J. Kyle, E. R. Ørskov & H. Abeygunawardene* 397-407

**Correlation of intake with plasma concentration of carotenoids**

- The correlation between the intake of lutein, lycopene and  $\beta$ -carotene from vegetables and fruits, and blood plasma concentrations in a group of women aged 50-65 years in the UK. *K. John Scott, David I. Thurnham, David J. Hart, Sheila A. Bingham & Ken Day* 409-418

**Breakfast in the diets of Scottish schoolchildren**

- The contribution of breakfast to the diets of a sample of 136 primary-schoolchildren in Edinburgh. *C. H. S. Ruxton, K. R. O'Sullivan, T. R. Kirk & N. R. Belton* 419-431

**Caecal microflora and pancreatic function**

- Influence of caecal microflora and of two dietary protein levels on the adaption of the exocrine pancreas: comparative study in germ-free and conventional rats. *Evelyne F. Lhoste, Isabelle Catala, Michèle Fiszlewicz, A. M. Gueugneau, Françoise Popot, Pierre Vaissade, Tristan Corring & Odette Szyliet* 433-444

**Immune response in malnutrition**

- Expansion of the humoral effector cell compartment of both systemic and mucosal immune systems in a weanling murine model which duplicates critical features of human protein-energy malnutrition. *C.-L. Ha, L. E. Paulino-Racine & B. D. Woodward* 445-460

**Dietary fibre supplements and nitrogen metabolism**

- Effects of the type and level of dietary fibre supplements on nitrogen retention and excretion patterns. *Inge Tetens, G. Livesey & B. O. Eggum* 461-469

**Cholesterol metabolism in rats**

- Cholesterol-lowering effect of soyabean lecithin in normolipidaemic rats by stimulation of biliary lipid secretion. *Elisabeth Polichetti, Nicolas Diaconescu, Paulette Lechene de la Porte, Lina Malli, Henri Portugal, Anne-Marie Pauli, Huguette Lafont, Beatriz Tuchweber, Ibrahim Yousef & Françoise Chanussot* 471-481
