**An outbreak of *E. coli* 0157 associated with a swimming pool: an
unusual vehicle of transmission**

doi: 10.1017/S0950268807007947, Published online by Cambridge
University Press 09 February 2007

The authors sincerely apologize for the oversight in omitting the
acknowledgements in the original manuscript. The acknowledgements
are printed below.

The authors thank Professor John Threlfall and the staff of the
E. coli, *Shigella*, *Yersinia* and *Vibrio* (ESYV) Reference unit of
the Laboratory of Enteric Pathogens (LEP), Health Protection
Agency in London, England for typing the human strains to the
molecular level. Their rapid response and efforts provided further
evidence to link all cases to the swimming pool.
