EDITOR'S OVERVIEW	1-4 85-87 197-200 305-307
ARTICLES	
BLACK, JOHN B. and SEBRECHTS, MARC M. Facilitating human-computer communication	149-177
BLANK, MARION and MILEWSKI, JANET Applying psycholinguistic concepts to the treatment of an autistic child	65-84
BOND, Z. S. A note concerning /s/ plus stop clusters in the speech of language-delayed children	55-63
BYRNE, BRIAN Deficient syntactic control in poor readers: Is a weak phonetic memory code responsible?	201-212
COGGINS, TRUMAN E. and CARPENTER, ROBERT L. The communicative intention inventory: A system for observing and coding children's early intentional communication	235-251
CONNELL, PHIL J. and MCREYNOLDS, LEIJA V. An experimental analysis of children's generalization during lexical learning: Comprehension or production	309-332
DONAHUE, MAVIS L. Requesting strategies of learning disabled children	213-234
GRAYBEAL, CAROLYN M. Memory for stories in language-impaired children	269-283
GROBER, ELLEN and KELLAR, LUCIA Semantic influences on pronoun assignment in aphasia	253-268
LAMBERT, W. E., BOEHLER, I. and SIDOTI, N. Choosing the languages of subtitles and spoken dialogues for media presentations: Implications for second language education	133-148
LEONARD, LAURENCE B. Facilitating linguistic skills in children with specific language impairment	89-118
MACKAIN, KRISTINE S., BEST, CATHERINE T. and STRANGE, WINIFRED Categorical perception of English /r/ and /l/ by Japanese bilinguals	369-390
MCREYNOLDS, LEIJA V. and ELBERT, MARY F. Generalization of correct articulation in clusters	119-132

MOŚCICKI, EVE K. and TALLAL, PAULA	A phonological exploration of oral reading errors	353–367
SACHS, JACQUELINE, BARD, BARBARA and JOHNSON, MARIE L.	Language learning with restricted input: Case studies of two hearing children of deaf parents	33–54
SCHWARTZ, STEVEN	Language disabilities in infantile autism: A brief review and comment	25–31
TAGER-FLUSBERG, HELEN	Sentence comprehension in autistic children	5–24
ZORFASS, JUDITH M.	Metalinguistic awareness in young deaf children: A preliminary study	333–352

BOOK REVIEWS

BISSEX, G. L.	<i>Gnys at work: A child learns to write and read</i> (M. Nystrand)	192–195
CRYSTAL, D.	<i>Introduction to language pathology</i> (L. L. Elliott)	304
ECKMAN, F. R., & HASTINGS, A. J. (Eds.)	<i>Studies in first and second language acquisition</i> (L. Obler)	182–185
GREGG, L. W., & STEINBERG, E. R. (Eds.)	<i>Cognitive processes in writing</i> (D. Wilkes-Gibbs and J. B. Black)	289–294
HATCH, E. M. (Ed.)	<i>Second language acquisition: A book of readings</i> (E. Hamayan)	179–182
LANE, H. L., & GROSJEAN, F. (Eds.)	<i>Recent perspectives on American sign language</i> (J.-A. Payne and S. P. Quigley)	294–298
LARSEN-FREEMAN, D. (Ed.)	<i>Discourse analysis in second language research</i> (L. Jakobovits)	185–191
RESNICK, L. B., & WEAVER, P. B. (Eds.)	<i>Theory and practice of early reading, Volume 2</i> (V. A. Mann)	285–287
SCARCELLA, R. C., & KRASHEN, S. (Eds.)	<i>Research in second language acquisition</i> (F. Genesee)	287–289
SPIRO, R. J., BRUCE, B. C., & BREWER, W. F.	<i>Theoretical issues in reading comprehension</i> (C. A. Perfetti)	298–303

INSTRUCTIONS TO AUTHORS

Components and style of the manuscript

Authors of articles or notes should submit their original manuscript plus two copies to:

Sheldon Rosenberg, Editor
Applied Psycholinguistics
Department of Psychology
University of Illinois at Chicago Circle
Box 4348
Chicago, Illinois 60680

Full length articles (original research, theoretical or methodological studies, literature reviews) should not exceed 14,000 words. Shorter notes may be, for instance, reports of work in progress or critical responses to articles or notes previously published in *Applied Psycholinguistics*.

Spelling, capitalization, and punctuation

should be consistent within each article and each note, and should follow the style recommended in the latest edition of the *Publication Manual of the American Psychological Association*. A title should be given for each article and note. An *auxiliary short title* should be given for any article or note whose title exceeds 50 characters. The *author's name* should be given in the form preferred for publication; the *affiliation* should include the author's full mailing address. An *abstract* should be prepared for each article (limited to 120 words) and note (limited to 60 words). *Tables and figures* (which comprise photographs, charts or other artwork) should be numbered consecutively throughout the article or note. *Bibliographic citations in the text* must include the author's last name and the date of publication and may include page references. Complete bibliographic information for each citation should be included in the list of references. Examples of correct styling for bibliographic citations are: Brown (1973), Ingram (1976, 54–55), Smith and Miller (1966), (Smith & Miller, 1966), (Peterson, Danner & Flavell, 1972) and subsequently (Peterson et al., 1972). *References* should be typed in alphabetical order using the style of the following examples:

Brown, R. Schizophrenia, language and reality. *American Psychologist*, 1973, 28, 395–403.
Ingram, D. *Phonological disability in children*. New York: Elsevier, 1976.

Krashen, S.D. Individual variation in the use of the Monitor. In W.C. Ritchie (Ed.), *Second language acquisition research*. New York: Academic Press, 1978.

Smith, F., & Miller, G.A. (Eds.), *The genesis of language*. Cambridge, Mass.: M.I.T. Press, 1966.

Titles of journals should *not* be abbreviated.

Preparation of the manuscript

The entire manuscript, including footnotes and references, should be typed double-spaced on 8½ by 11 inch or A4 paper, with margins set to accommodate approximately 70 characters per line and 25 lines per page, and should not exceed 50 typed pages. Each element of the article or note should begin on a new page and should be arranged as follows: title page (including title, short title, author's full name and affiliation, including mailing address), abstract, text with tables interspersed as they occur, appendixes, acknowledgements, footnotes, references (including reference notes for unpublished citations), captions and figures. Each table and figure should be submitted on a separate page. Manuscript pages should be numbered consecutively.

Figures should be ready for photographic reproduction; they cannot be redrawn by the printer. Charts, graphs, or other artwork should be drawn in black ink on white paper to occupy a standard area of 8½ by 11 or 8½ by 5½ inches before reduction. Photographs should be glossy black-and-white prints; 8 by 10 inch enlargements are preferred. All labels and details on figures should be clearly printed and large enough to remain legible after a reduction to half-size. It is recommended that labels be done in transfer type of a sans-serif face such as Helvetica.

Copyediting and proofreading

The publishers reserve the right to copyedit and proof all articles and notes accepted for publication. Authors will review their copyedited manuscripts only if changes have been substantial. Page proofs of articles and notes will be sent to authors for correction of typographical errors only; authors must notify the editorial office of any changes within 48 hours or approval will be assumed.

The latest edition of the *Publication Manual of the American Psychological Association* should be consulted for instructions on aspects of manuscript preparation and style not covered in these instructions. The Editor may find it necessary to return for reworking and retyping manuscripts that do not conform to requirements.

Each author will receive 25 offprints of his or her article or note without charge; additional copies may be purchased if ordered at proof stage.

Submission of an article or note implies that it has not been published elsewhere. Authors are responsible for obtaining written permission to publish material (quotations, illustrations, etc.) for which they do not own the copyright. Contributors of accepted articles and notes will be asked to assign their copyrights, on certain conditions, to Cambridge University Press.
