Can the part ever be greater than the whole? It could never be proved by Algebraical formulæ, but, in one sense, a good case could be made out for the proposition. In the making of an Aeroplane it so often happens that the whole life of the machine rests upon the finish and accuracy of one small part—on that does not only the life of the Machine but its Pilot frequently depend. Small parts must be obtained from reliable makers.

IF IT'S A SMALL PART GET IT FROM PULVO.
