ANIMAL PRODUCTION, Volume 42, Part 1, pp. 133-144.

AMINO ACID AND ENERGY INTERACTIONS IN GROWING PIGS

2. EFFECTS OF FOOD INTAKE, SEX AND LIVE WEIGHT ON RESPONSES TO LYSINE CONCENTRATION IN BARLEY-BASED DIETS

L. R. GILES, E. S. BATTERHAM AND E. BELINDA DETTMANN

Owing to loss of correspondence in the Christmas post, the following corrections to the original manuscript were not made:

On page 134, first line of second column should read:
153 g crude protein

On page 139, Table 7, Intercepts should read:
-17617 -79371 -5108.1 47510

On page 140, Table 8, regression coefficients should read:
Live weight -69.559 -80.868
Lysine 6.3311 179.42
L² 0.0 -9.9188

Table 9, regression coefficients should read:
Intercept -260.57 469.20
Lysine 139.06 -15.750
L² -6.7280 1.5080

second column, line 21 should read:
17.6 g,

and line 27 should read:
14.8 g

ANIMAL PRODUCTION, *Contents with Author Index of Volumes 31-40 (1980-1985)*
The following lines have been omitted from page i:

	vol.	page
ADAM, CLARE L. and MOIR, CAROL E. Effect of winter nutrition of young farmed red deer on their subsequent growth at pasture	40	135
