

### **Erratum**

Urban, J., Carlson, E., Egeland, B., & Sroufe, L. A. (1991). Patterns of individual adaptation across childhood. *Development and Psychopathology*, 3, 445–460.

Page 459, Appendix: The list under “*High functioning child with avoidant attachment history (male)*” . . . “*Bottom 5*. (ending with lowest item – least characteristic)” should read:

- (24) Tends to brood and ruminate or worry.
- (22) Tries to manipulate others by ingratiation (e.g., by charm, coyness, or seductiveness).
- (53) Tends to be indecisive and vacillating.
- (23) Is fearful and anxious.
- (77) Appears to feel unworthy; thinks of self as “bad.”
- (94) Tends to be sulky or whiny.
