### **The Human Agent**

'The contributors are mostly professors or readers, all at the height of their powers. The lectures are concerned with such matters as predictability, freedom, morality, obligation, desires, the body - mind problem, directive language, thought, and expression. This collection will be useful to university students, and the intelligent general reader should find them interesting.' – *British Book News*

'... a collection of high grade, but not too technical, papers devoted to certain aspects of the philosophy of mind'. – *Times Literary Supplement*

### **Talk of God**

'... excellent symposium ... Virtually all of the contributors are already distinguished writers, and each tries to say something constructive and relevant about theology or theological language.' – Anthony Thiselton, *Church of England Newspaper*

'The book is ideal seminar-material, an essential tool for any religious course, and a beneficial one for general philosophy courses ... a volume which is calculated to stimulate thinking in many areas of philosophy.' – Keith Ward, *Philosophical Books*

### **Knowledge and Necessity**

Contemporary issues in epistemology, ranging from the philosophical significance of Chomsky's work on transformational grammar to the place of a doctrine of eschatological verification in theism, are debated in this collection of original papers, some of them by promising young philosophers.
