The Nazi War on Cancer Robert N. Proctor

"A provocative and powerful book. It presents a great deal of research in an accessible, even breezy style and makes important contributions both to the history of medicine and to our understanding of fascism's many dimensions."—Paul Lerner, *The Times Higher Education Supplement*

Cloth \$29.95 £17.95 ISBN 0-691-00196-0

Making the Body Beautiful

A Cultural History of Aesthetic Surgery
Sander L. Gilman

"[A] fascinating work. . . . Gilman has an eye for detail, yet remains aware of the wider perspective. He also raises important questions. . . . In [this] rich, elegant and beautiful [book] he shows that the history of aesthetic surgery is too important to be left to the surgeons."—Jonathan Cole, *The Times Literary Supplement*

How Scientists Explain Disease

Paul Thagard

"This is a wonderful book! . . . A delightful essay combining science, its history, philosophy, and sociology. . . . It has been a long time since I read a book as important as this, and more importantly, it has been a long time since I read a scholarly book which gave me such simple pleasure."

—Michael Ruse, author of *Monad to Man*
