### MEGALITHS FROM ANTIQUITY

The third volume of reprinted classic papers explores the theme of British and European megaliths. Thirty-six papers examine four principal themes on megalithic studies. The earliest monuments – the great tombs and dolmens – reveal the extent of megalithic variety. Papers range from Daniel's early studies of British dolmens to more recent debates; the perennial interest in Stonehenge and Avebury has figured prominently in ANTIQUITY and is brought fully up to date. The presence of timber and earth circles as precursors or alternatives to megalithic structures show further variety in ancient monument building. The final section, Beyond the Megaliths, through studies of ancient engineering, archaeoastronomy and sensory archaeology demonstrates the abiding interest in interpretations of function and meaning of the ancient stones. ISBN 0-9539762-2-X

Price: £18.99 (per volume) + £3.00 (£5.00 overseas) postage.

Price to ANTIQUITY subscribers: £15.39 + £3.00 (£5.00 overseas) postage

CELTS FROM ANTIQUITY, the second volume of reprinted classic papers explores a central theme of European Archaeology. Twenty-five papers represent ancient and modern approaches to the study of the Celts; the debate over Celtic identity; key discoveries and reinterpretations in continental archaeology; fieldwork and debate in the Southern British Iron Age; fieldwork and debate in the Scottish Iron Age. Each section is introduced with a personal perspective from the editors to set the articles within current and future trends of Iron Age archaeology. ISBN 0-9539762-1-1

LANDSCAPES FROM ANTIQUITY, the first volume of reprinted classic papers explores a central archaeological theme: Landscapes from Antiquity. Twenty-four papers have been selected to represent ancient and modern landscape approaches, organized into thematic sections: Early studies of Fox and Curwen, aerial photo-graphy of Bradford, Crawford and St Joseph, survey method, integrated regional landscapes, physical, industrial, contested and experienced landscapes. ISBN 0-9539762-0-3

Price: £17.99 (per volume) + £3.00 (£5.00 overseas) postage.

Price to ANTIQUITY subscribers: £14.39 + £3.00 (£5.00 overseas) postage.

## Notes for authors and subscribers

**Submissions to the journal** should report significant new international research, methods or matters of professional and public interest.

Please write in clear English, so your work can be understood by every member of the broader archaeological and scientific community. Contributors whose first language is not English can send a text in their own language as well, to help the Editor present their work as clearly as possible.

Initial approaches are welcome and should be directed to the editor. Draft contributions of up to 6000 words may be sent either via e-mail or as three paper copies with a 3.5in disc in Word or Word Perfect. Please give the contact address, telephone number and e-mail of the corresponding author.

Illustrations can include line drawings, black and white or colour photographs of professional quality, and should be sent as hard copies or e-pictures via e-mail. Please remember that images for publication need to be scanned with a resolution of at least 300 dpi and line-drawings at least 600 dpi. If photographs are submitted electronically we prefer them to be submitted as .tif, .eps or .jpg files and images to be saved as CMYK images.

All submissions will be sent to at least two anonymous referees. If a paper is accepted, the corresponding author will be sent a digest of the referees' comments and those of the Editor, either incorporated in a letter or a proposed revision of the text. This will form the basis for acceptance. Accepted authors will be requested to return their revised text with any camera-ready art-work, and will be sent a proof for checking before publication.

Authors should receive an immediate acknowledgement that a submission has been received, a decision on acceptance and/or request for revision after peer-review within three months. Papers accepted without revision should appear within six months of submission.

Please send questions, suggestions or copy to:

## Awards for the Presentation of Heritage Research 2003

Sponsored by the Royal Archaeological Institute, English Heritage, Cadw and Historic Scotland

### *Is your fascinating research buried in specialist journals?*

It is vital for the heritage's future that we do more to present and explain our work to the wider public, to increase their understanding and enjoyment and the value they place on the heritage.

The Royal Archaeological Institute, English Heritage, Cadw and Historic Scotland are jointly sponsoring a competition, now in its second year, at the British Association's *Festival of Science*, to be held this year at Salford on 8-12 September 2003. Its purpose is to encourage a new kind of presentation, more suitable for this wider audience, of recent research into British archaeology, historic buildings and heritage conservation.

Two awards are offered, of £1500 and £500. Entrants are asked to submit a written summary of their presentation by 15 May 2003. Short-listed finalists will be invited to speak at the awards session at the *Festival of Science*. The judges will place particular weight on the clarity of presentation to an informed but non-specialist audience, and on the interest and quality of the underlying research.

For further details and an entry form, please contact: Sebastian Payne, English Heritage, 23 Savile Row, London W1S 2ET (or by e-mail: [sebastian.payne@english-heritage.org.uk](mailto:sebastian.payne@english-heritage.org.uk)). The competition is open to all, whether professional or amateur.

## Figuring It Out

*What are we? Where do we come from?*

*The parallel visions of artists and archaeologists*

Colin Renfrew

Why do we now find Cycladic sculpture beautiful when, merely a century ago, such work would not have been thought suitable for display in an art museum? And how is it that the prehistoric footprints at Laetoli have been admitted as art too, albeit of an involuntary kind? Professor Renfrew uses these questions as springboards for his examination of the human condition, a subject that can only be properly understood, he argues, through the idea of process, of *Homo Sapiens'* active material engagement with their world. Central to his exploration is a group of leading contemporary artists, including Richard Long, Mark Dion, Antony Gormley, Eduardo Paolozzi and David Mach, whose works are notable for just such an engagement with their physical surroundings.

*Figuring It Out* takes sculpture off the plinth and archaeology out of the trench, and situates the contemporary artist and archaeologist together at the centre of an active endeavour to re-evaluate what it is to be human.

## Return to Chauvet Cave

*Excavating the Birthplace of Art: The First Full Report*

Jean Clottes

Since its discovery in 1994, a team of specialists has been conducting a detailed scientific study of the remarkable Chauvet Cave. This project has been amazingly fruitful and the cave has slowly given up many of its secrets: its dating, the traces left by animals and humans, the artistic techniques used, and the themes of the paintings and engravings. New light has also been cast on this unique prehistoric site by art historians and ethnologists. All these new discoveries are published together for the first time in this superb volume, which stands as the most thorough account yet of this wonderful cave complex. Hundreds of colour illustrations enable the reader not only to share this new knowledge, but also to experience the thrill of being able to look back at an ancient world, so many thousands of years old.
