JOURNAL OF PLASMA PHYSICS

https://doi.org/10.1017/S0022377800009673 Published online by Cambridge University Press

JOURNAL OF PLASMA PHYSICS exists for the publication of experimental and theoretical research papers on plasma physics and its applications.

EDITOR

DR J. P. DOUGHERTY

Department of Applied Mathematics and Theoretical Physics, University of Cambridge, Silver Street, Cambridge, CB3 9EW England

ASSOCIATE EDITORS

PROF. D. BERSHADER

Department of Aeronautics and Astronautics, Stanford University, Stanford, California 94305, *U.S.A.*

PROF. F. D. KAHN

*Department of Astronomy, University of Manchester, Manchester M*13 9*PL, England*

PROF. W. B. THOMPSON

Department of Physics, University of California, La Jolla, California 92037, *U.S.A.*

Authors wishing to have papers published in the JOURNAL should communicate them to any one of the persons named above, choosing one in their own country where possible.

Authors are urged to ensure that their papers are written clearly and attractively, in order that their work will be readily accessible to readers.

Manuscripts should be typed in double spacing on one side of the paper only, with references listed at the end in alphabetical order of authors. Drawings should be done in Indian ink on plain white or transparent paper, and should not be larger than 15 in. by 24 in. Lettering should be shown clearly in pencil for reproduction by the printer, and as far as possible information relating to a figure should be placed in the caption rather than on the figure. A typed list of captions should be provided at the end of the manuscript. Proofs of papers from overseas will usually be despatched to authors by airmail. There is no charge for publication. Authors are entitled to receive 50 offprints of a paper in the JOURNAL free of charge, and additional offprints can be purchased if ordered in advance.

For permission to reproduce material from *Journal of Plasma Physics*, please apply to the London or New York office of the Cambridge University Press.

ISI Tear Service, 325 Chestnut Street, Philadelphia, Pennsylvania 19106, U.S.A. is authorized to supply single copies of separate articles for private use only.

JOURNAL OF PLASMA PHYSICS is published once every two months in February, April, June, August, October and December, by Cambridge University Press, P.O. Box 92, London NW1 2DB and 32 East 57th Street, New York, N.Y. 10022.

Three parts form a volume. The subscription price (which includes postage) Volume 13 and 14 (1975) is £20.00 net (US $60.00 in the U.S.A. and Canada). single parts cost £8.00 net (US $24.00 in the U.S.A. and Canada) plus postage.

Copies of the journal for subscribers in the United States of America and Canada are sent by air to New York to arrive with minimum delay.

Second class postage paid at New York, N.Y.

CONTENTS TO VOLUME 14

PART 1 AUGUST 1975

Effect of ionic temperature on propagation of ion–acoustic solitary waves in a collisionless plasma of warm-ion fluid and non-isothermal electrons. S. G. TAGARE *page* 1

Dispersion relation for electron waves propagating in an isotropic plasma containing Maxwellian and suprathermal electrons. J. R. SANMARTIN 7

On the interaction of wave beams in plasmas. M. J. GILES 19

Quasi-static modes of oscillation of a cold toroidal plasma. J. D. LOVE 25

Shock reflexion and shock-wave interaction in field-aligned flows. M. NATTER 39

The second-harmonic resonance for nonlinear hydromagnetic waves. Y. MATSUMOTO, N. SUGIMOTO and Y. INOUE 53

The expansion of a plasma into a vacuum. J. E. CROW, P. L. AUER and J. E. ALLEN 65

Kinetic description of linear theta-pinch equilibria. D. B. BATCHELOR and R. C. DAVIDSON 77

Criteria for three-wave instabilities in a cold collisionless plasma. A. HRUŠKA 93

Parametric backscattering and absorptive instabilities in homogenous unmagnetized plasmas. M. BORNATICI 105

The electromagnetic interchange mode in a partly-ionized collisional plasma. M. K. HUDSON and C. F. KENNEL 121

The collisional drift mode in a partly-ionized plasma. M. M. HUDSON and C. F. KENNEL 135

Water-bag stability theory for planar bounded plasmas with counter-streaming injection. Part 1. The neutralized diode. K. M. HU and E. H. KLEVANS 143

Derivation and properties of a Balescu–Lenard like equation for stationary plasma turbulence in the weak-coupling approximation. G. PELLETIER and C. POMOT 153

The totality of waves in a homogeneous Vlasov plasma. S. PURI, F. LEUTERER and M. TUTTER 169

Landau damping of surface waves at a plasma–vacuum interface. P. C. CLEMMOW and J. N. ELGIN 179

https://doi.org/10.1017/S0022377800009673 Published online by Cambridge University Press

PART 2 OCTOBER 1975

Effects of lithium and heavier ions on electromagnetic proton cyclotron instability. S. CUPERMAN, L. GOMBEROFF and A. STERNLIEB *page* 195

Theory of the mutual impedance of two small dipoles in a warm isotropic plasma. R. POTTELETTE, B. ROOY and V. FIALA 209

Stimulated backscattering of electromagnetic waves from ion–ion hybrid waves in a magnetized plasma. K. F. LEE 245

Surface waves at the boundary of a magneto-active plasma. J. N. ELGIN 255

Some comments on magnetic field reconnection. E. R. PRIEST and S. W. H. COWLEY 271

Resistive MHD stagnation-point flows at a current sheet. B. U. Ö. SONNERUP and E. R. PRIEST 283

Plasma heating with multiple ion-cyclotron resonance. V. V. DOLGOPOLOV, A. M. HUSSEIN and SH. M. KHALIL 295

On the analytic solution of the helical equilibrium equation in the MHD approximation. M. L. WOOLLEY 305

On re-normalization in the theory of weak turbulence in plasmas. J. VACLAVIK 315

An absolute Raman instability in an inhomogeneous plasma. R. A. CAIRNS 327

Switch shock-wave structure in a magnetized partly-ionized gas. N. F. CRAMER 333

Nonlinear decay of a large-amplitude ion-acoustic wave. N. T. HUNG 347

Ion–acoustic solitons excited by a single grid. S. WANTANABE 353

Charge transfer from low-lying excited states: effects on the reactive thermal conductivity. M. CAPITELLI. 365

PART 3 DECEMBER 1975

The use of magneto-acoustic oscillations as a plasma diagnostic technique. J. J. B. FROMMELT and I. R. JONES 373

Generation of monochromatic electrostatic waves of large amplitude in a bounded beam–plasma system. M. BITTER and P. J. PARIS 389

Propagation of electromagnetic waves parallel to a magnetic field in a cold plasma between conducting planes: asymmetric model. H. N. WEBER 399

On the maximum rate of magnetic-field reconnexion for Petschek's mechanism. B. ROBERTS and E. R. PRIEST 417

https://doi.org/10.1017/S0022377800009673 Published online by Cambridge University Press

Interaction of a test particle with a magnetized plasma. E. W. LAING and A. L. GIBSON *page* 433

Hydromagnetic stability of a compressible jet. B. B. CHAKRABORTY and H. K. S. IYENGAR 443

A composite solution of field-line reconnexion. T. YEH 449

Magnetohydrodynamic combustion waves in aligned fields. N. ASANO 455

Three-wave interaction in a magnetized Vlasov plasma. J. LARSSON 467

Magnetic field-line reconnexion in a highly-conducting incompressible fluid: properties of the diffusion region. S. W. H. COWLEY 475

Fluctuation spectrum in turbulent plasma. G. PELLETIER and C. POMOT 491

Nonlinear, periodic waves in a cold plasma: a quantitative analysis. A. C.-L. CHIAN and P. C. CLEMMOW 505

Dispersion formulae for waves in a relativistic plasma. P. MISRA 529

Nonlinear theory of a whistler wave. T. YAMAMOTO 543

CORRIGENDUM 551

REVIEW

Plasma Instabilities and Nonlinear Effects of Physics and Chemistry in Space, by A. Hasegawa 553
