

appear later. Sir Dyce Duckworth was followed by Dr. F. W. Mott, who spoke at some length on Poison, Stress, and Inherited Tendency. After Dr. G. H. Savage had contributed a spirited criticism Dr. E. Goodall and Dr. Charles Mercier continued the discussion. Travel: its Abuse and Use in Mental Diseases was the subject

of the next address by Dr. Savage. This theme elicited some valuable remarks from Sir Hermann Weber and Dr. Symes Thompson. The meeting had already lasted over two hours but the greater number stayed to hear Dr. Lewis-Jones on the Application of Electricity in certain Forms of Mental Diseases, and an interesting

discussion on this therapeutic suggestion followed.

Corrigendum

Venlafaxine extended release (ER) in the treatment of generalised anxiety disorder.

Twenty-four-week placebo-controlled dose-ranging study. *BJP*, 179, 15–22. Figure 2

(p. 20) was incorrectly labelled as originally published, and should be:

Fig. 2. Percentage of responders at weeks 8 and 24 as assessed by a 50% reduction from baseline score in the Hamilton Rating Scale for Anxiety (HRSA) (left) or a Clinical Global Impression of Improvement (CGI-I) score of 1 or 2 (right): * $P < 0.05$; ** $P < 0.01$ and *** $P < 0.001$ for venlafaxine ER v. placebo in intention-to-treat sample using the last observation carried forward method.
