VERY HIGH ANGULAR RESOLUTION IMAGING

PROCEEDINGS OF THE 158TH SYMPOSIUM OF THE
INTERNATIONAL ASTRONOMICAL UNION,
HELD AT THE WOMEN'S COLLEGE, UNIVERSITY OF SYDNEY,
AUSTRALIA, 11–15 JANUARY 1993

EDITED BY

J.G. ROBERTSON

and

W.J. TANGO

*School of Physics, University of Sydney,
New South Wales, Australia*

KLUWER ACADEMIC PUBLISHERS

Library of Congress Cataloging-in-Publication Data

International Astronomical Union. Symposium (158th : 1993 : Women's College, University of Sydney, Australia)
Very high angular resolution imaging : proceedings of the 158th Symposium of the International Astronomical Union held at the Women's College, University of Sydney, Australia, 11-15 January 1993 / edited by J.G. Robertson and W.J. Tango.
p. cm.
Co-sponsored by the International Union for Radio Science.
Includes index.
ISBN 0-7923-2632-6 (alk. paper)
1. Imaging systems in astronomy--Congresses. 2. Resolution (Optics)--Congresses. 3. Interferometry--Congresses.
4. Algorithms--Congresses. I. Robertson, J. G. II. Tango, William J. III. International Union for Radio Science. IV. Title.
QB51.3.I45I48 1993

TABLE OF CONTENTS

Preface		xi
Symposium Organizers and Sponsors		xii
List of Participants		xiii

Radio/Optical comparisons

C R Masson	Seeing <i>[invited]</i>	1
R Nityananda	Comparing optical and radio — quantum issues <i>[invited]</i>	11

Transfer of Techniques

C H Townes <i>et al.</i>	Heterodyne interferometry in the infrared <i>[invited]</i>	19
J M Moran	The SAO submillimeter wavelength array <i>[invited]</i>	27
T J Cornwell	Imaging techniques: Limitations to the quality of images <i>[invited]</i>	37
C H Townes	Surprise and sociology in multi-disciplinary sciences <i>[public lecture]</i>	47

Imaging Techniques

R J Hanisch & R L White	HST image restoration: current capabilities and future prospects <i>[invited]</i>	61
A Richichi	Lunar occultations: from past to future achievements <i>[invited]</i>	71
M Tallon & I Tallon-Bosc	Beam combination for wide field imaging <i>[invited]</i>	83
D F Buscher	Direct maximum-entropy image reconstruction from the bispectrum	91
A A Deshpande	Source-noise in radio synthesis images of polarized sources	95
M A Holdaway	Phase calibration of the proposed millimeter array	101
A J Beasley <i>et al.</i>	VLBA phase-referencing	105

Radio Array Instruments

R A Perley	Radio arrays - mm to meters <i>[invited]</i>	109
P J Napier	The Very Long Baseline Array <i>[invited]</i>	117

P J Diamond & A J Beasley	Recent results from the VLBA	125
T W B Muxlow	MERLIN — A phase-stable ‘VLBI’ array	128
“The SHEVE Team”	The Southern Hemisphere VLBI Experiment program, SHEVE	131

Optical and Infrared Interferometers and Arrays

J Davis	The Sydney University Stellar Interferometer (SUSI) [<i>invited</i>]	135
T R Bedding <i>et al.</i>	The VLT Interferometer [<i>invited</i>]	143
R S Simon	The Big Optical Array [<i>invited</i>]	151
I Tallon-Bosc <i>et al.</i>	Progress on GI2T	155
G C Cox	The COAST interferometer	163
E K Hege <i>et al.</i>	An adaptive steerable imaging array	167
J Y Xu & Z M Wang	CIROI project	171

Instrumentation and Techniques

N M Elias & D J Hutter	The baseline metrology system of the USNO astrometric interferometer	174
D Mozurkewich	Design and construction of a beam combiner and related hardware	177
R A Minard <i>et al.</i>	An overview of the SUSI control system	181
P R Lawson & A J Booth	The fringe tracking servo in SUSI	184
N Ageorges <i>et al.</i>	Motion of the delay lines of an optical interferometer when reconstructing an image by redundant spacing calibration	187
B Hines <i>et al.</i>	The micro-precision interferometer testbed instrument design	193
J-L Monin <i>et al.</i>	Phase and image reconstruction from pupil-plane observations in the near infrared: integration of the phasors	197
N Shapirovskaya <i>et al.</i>	Radio source variability as a tool for very high resolution	201

Imaging Theory

F Tsumuraya <i>et al.</i>	Iterative blind deconvolution method with use of Lucy’s algorithm: application to IR speckle data	205
E Thiébaud	Speckle imaging with the bispectrum and without reference star	209

D S Briggs & T J Cornwell	CLEAN/MEM deconvolution errors: semicompact sources	212
A T Bajkova	Generalized versus classical maximum entropy for imaging	215
D Fraser & B R Hunt	Super-resolution by phase-gradient unravelling	218
G Thorpe & D Fraser	Restoration over fields of view wider than the isoplanatic patch	221
M Hrynevych	Differential diffraction in Michelson stellar interferometry	224

Impact of Technology I: Radio and Millimeter Waves

A C Young	Optical fibres in radioastronomy <i>[invited]</i>	227
M Ishiguro	Recent developments in mm and sub-mm interferometry <i>[invited]</i>	235
R A Perley <i>et al.</i>	High resolution radio source maps at 73.8 MHz	243
R P Norris	AIPS++: A new astronomical imaging package <i>[invited]</i>	247

Impact of Technology II: Optical and Infrared

M Bester <i>et al.</i>	Latest technical developments at the infrared spatial interferometer	257
V Coudé du Foresto	Integrated optics in astronomical interferometry <i>[invited]</i>	261

Adaptive Optics and Seeing

F Roddier	Adaptive optics: performance and limitations <i>[invited]</i>	273
S S Olivier & C E Max	Laser guide star adaptive optics: present and future <i>[invited]</i>	283
R Q Fugate	Laser guide star adaptive optics on the 1.5 m telescope at the Starfire Optical Range	293
J Nishikawa <i>et al.</i>	Minimum redundant aperture masking interferometry with tip-tilt wavefront correction	296
W Livingston <i>et al.</i>	Observations of seeing at 0.5 and 12.4 μm	299
T A ten Brummelaar <i>et al.</i>	Preliminary seeing measurements for SUSI	302
R W Wilson & C R Jenkins	Aspects of the theoretical performance of modal adaptive optics	305
D W Tyler & G C Loos	Simulation study of a low-light-level wavefront sensor driving a low-order, near-IR adaptive optics system	308

Aperture Distributions

M Shao	Fringe visibility and phase measurements <i>[invited]</i>	311
C A Haniff	Speckle <i>vs</i> non-redundant masking <i>[invited]</i>	317
T R Bedding <i>et al.</i>	MAPPIT: optical interferometry with non-redundant masks	327
R G Marson	Optimal linear arrays for wide bandwidths	331
V Migenes <i>et al.</i>	High resolution and high sensitivity spectral-line imaging with multiple arrays	334

Imaging Results: Radio and Millimeter Waves

R C Jennison	High resolution imaging forty years ago	337
B Anderson & R D Davies	Results with the extended MERLIN	343
P Qiu <i>et al.</i>	High resolution image reconstruction at Yunnan Observatory	346
W C Erickson <i>et al.</i>	High resolution imaging at mm-wavelengths with the Hat Creek Array	349
X Zhang & Y Zheng	Miyun 232 MHz survey and some new imaging techniques	352
D A Forbes <i>et al.</i>	Compact array mapping of the nuclear starburst in NGC 7552	355
R Beck <i>et al.</i>	ATCA radio polarization observations of NGC 1566 and NGC 1672	358
A Kukushkin	Fluctuations of polarized radiation in a random magnetoplasma	361
B Stecklum <i>et al.</i>	High angular resolution observations of Her 36	364
P N Wilkinson <i>et al.</i>	The Caltech-Jodrell Bank (CJ) VLBI snapshot surveys	367

Imaging Results: Optical and Infrared

S R Restaino <i>et al.</i>	First experimental results from pupil masking on a solar telescope	370
T Reinheimer <i>et al.</i>	Optical interferometry in the multi-speckle mode	373
T Chandrasekhar <i>et al.</i>	Near infrared high angular resolution observations of stars and circumstellar regions by the technique of lunar occultations	376
A Eckart <i>et al.</i>	Diffraction-limited near infrared imaging of the central parsec of the Galaxy	379
W C Danchi <i>et al.</i>	Long baseline interferometric observations of circumstellar dust shells at 11 microns	383

J-L Monin <i>et al.</i>	High angular resolution observations of protostellar disks	387
E Thiébaud <i>et al.</i>	The extended H α component of T Tau	391
P G Tuthill <i>et al.</i>	An interferometric survey of Mira variables and M supergiants	395
C R de Boer & F Kneer	Speckle observations of solar granulation	398
C R O'Dell & X Hu	Comparison of HST and VLA images at 0.1'' of the Orion nebula	401
D A Forbes <i>et al.</i>	An HR diagram for the LMC from the medium deep survey	404
A Quirrenbach	Stellar diameters, limb darkening, extended atmospheres and shells: observations with the Mark III Interferometer	407
C A Hummel & J T Armstrong	Mark III Interferometer: milliarcsec "visual" orbits of spectroscopic binaries	410
X Pan <i>et al.</i>	High resolution interferometric observations of eclipsing binary stars	413
A Richichi <i>et al.</i>	Lunar occultations of young stellar objects in the Taurus and Ophiuchus star forming regions	416
C M de Vos <i>et al.</i>	Pupil plane interferometry: some conclusions from SCASIS	419
T R Bontekoe & D Kester	HIRAS: high-resolution IRAS images	422

Astrometry

K J Johnston	The present status of astrometry at optical and radio wavelengths [<i>invited, presented by G Westerhout</i>]	423
D J Hutter	The USNO Astrometric Interferometer [<i>invited</i>]	427
J E Reynolds	VLBI astrometry [<i>invited</i>]	437
J M Marcaide & J C Guirado	High precision differential astrometry in large angular separation pairs of radiosources	445
C A Hummel	Five years of stellar position measurements with the Mark III optical interferometer	448

Frontier Techniques

R L Webster	Imaging with a gravitational lens [<i>invited</i>]	451
D O Muhleman <i>et al.</i>	Radar imaging of the planets using the Very Large Array [<i>invited</i>]	457

Future Prospects

M M Colavita	Limitations to optical/IR interferometry from the ground and space <i>[invited]</i>	469
N S Kardashev <i>et al.</i>	The ultimate radio resolution <i>[invited]</i>	477
A Labeyrie <i>et al.</i>	Progress of the Optical Very Large Array <i>[invited, presented by I Tallon-Bosc]</i>	485
L I Gurvits	The cosmological application of very high angular resolution in radio astronomy	493
