

Price 1s. 6d. Monthly.

THE PRACTITIONER, a Monthly Journal of Therapeutics.

Edited by FRANCIS E. ANSTIE, M.D., F.R.C.P.  
Senior Assistant Physician to Westminster Hospital, and Lecturer on Medicine in  
Westminster Hospital School.

MACMILLAN and Co., 16, Bedford Street, Covent Garden, London.

Crown 8vo. Price 5s.

BODY and MIND: An Inquiry into their Connexion and

Mutual Influence, specially in reference to Mental Disorders. Being the Gula-  
tonian Lectures for 1870, with additions. By HENRY MAUDSLEY, M.D.

MACMILLAN and Co., London.

Now ready, 8vo., 5s.

HANDBOOK OF LAW AND LUNACY; or, the

Medical Practitioner's Complete Guide in all Matters relating to Lunacy Practice.  
By J. T. SABBEN, M.D., and J. H. BALFOUR BROWNE, Barrister-at-Law.

J. and A. CHURCHILL, New Burlington-street.

Now ready, 8vo., 6s.

ON CEREBRIA AND OTHER DISEASES OF THE

BRAIN. By CHARLES ELAM, M.D., Lond., F.R.C.P., Assistant Physician to  
the National Hospital for Paralysis and Epilepsy.

J. and A. CHURCHILL, New Burlington-street.

DR. DAVEY ON THE GANGLIONIC NERVOUS SYSTEM.

Vol. 1., 8vo., pp. 309.

THE GANGLIONIC NERVOUS SYSTEM: Its

STRUCTURE, FUNCTIONS, and DISEASES. By JAMES GEORGE DAVEY,  
M.D., Member of the Royal College of Physicians, London; formerly Medical  
Superintendent of the Asylums at Hanwell and Colney Hatch, Middlesex.

"An interesting and important work. \* \* \* The work is full of interesting  
and original matter, and will amply repay perusal."—JOURNAL OF MENTAL SCIENCE.

"We give Dr. Davey credit for considerable argumentative acumen: he writes  
with force and clearness."—MEDICAL CIRCULAR.

"We can safely recommend its perusal."—DUBLIN MEDICAL PRESS.

"An instructive and suggestive book. \* \* \* A valuable contribution to  
medical literature."—HYDROPATHIC RECORD.

"A volume of peculiar interest to medical and psychological readers."—LEADER.

"A work full of the most suggestive and original thought. \* \* \* Dr. Davey  
has most clearly appreciated the functions of the organic nervous centres, and has  
described his views in a volume which, when the *jealousies, prejudices, and ignorances*  
that always beset the present, concerning the present, have passed away, will be dis-  
covered by some future and unbiased scholar as a *neglected classical work of the physic*  
*of the nineteenth century.*"—B. W. RICHARDSON, M.A., M.D., F.R.S., President of the  
St. Andrew's Medical Graduates' Association (See Vol. 3, Transactions, 1869).

By the same Author, post 8vo., pp. 77, cloth, 3s.

ON THE NATURE AND PROXIMATE CAUSE OF INSANITY.

"It gives us much pleasure to state that the method of treatment inculcated is  
most judicious, and that the general statements which pervade the work are such as to  
do honour to the head and heart of the writer."—PSYCHOLOGICAL JOURNAL.

"The views themselves are, *practically*, of great importance, and we have much  
pleasure in urging them upon the attention of our readers."—HALF-YEARLY ABSTRACT  
OF MEDICAL SCIENCES.

London: J. and A. CHURCHILL, New Burlington-street.

# LIBRARY

## THE COUNTY ASYLUM, DORCHESTER.

FIVE ATTENDANTS (all Musicians), having given notice to leave their situations at the above Asylum, are anxious to obtain employment in the same capacity.

Good references (from one to six years respectively) can be given. Address—"Z," the Post Office, Dorchester.

*Now Ready, No. III., Vol. IV. New Series.*

## GLASGOW MEDICAL JOURNAL.

CONTENTS, May, 1872.

I. ORIGINAL ARTICLES.—1. Dr. A. Davidson: On Pseudo-Hypertrophic Muscular Paralysis (with two photographs). 2. Dr. J. Donaldson: On the successful Induction of Premature Labour in a case of Diseased Placenta. 3. Dr. John Aikman: Two Cases of rare Congenital Malformation. 4. Dr. Eben Watson: Clinical Surgical Report for 1871. 5. Dr. McCall Anderson: Clinical Memoranda. 6. Dr. Whiteford: Case of Embedded Uterine Fibroid. 7. Dr. G. H. B. Macleod: Clinical Report of Cases treated in the Surgical Wards of the Glasgow Royal Infirmary during the six months ending December 31, 1871. 8. Dr. Joseph Coats: Large Sarcomatous Tumour in the Abdomen, probably of Suprarenal Origin. 9. Dr. John Dougal: Notes of Five Cases of Poisoning occurring in Private Practice. 10. Dr. Jas. B. Russell: Notes on the Use of Xylol in Small-pox, with remarks on the fallacies incidental to the treatment of Small-pox. 11. Dr. W. J. Marshall: Case of Bronzed Skin, with Chronic Disease of the Membranes of the Brain.

CLINICAL RECORD.—Dr. W. T. Gairdner: Visible Pulsation of the Pulmonary Artery. Dr. John Wilson: Ulcerative Stomatitis with Yellow Palms. Dr. Pride: Two Cases of Sciatica. Dr. John Fox: Skin Grafting and other Cases.

REVIEWS.—Milton on Gonorrhœa. Aitken's Practice of Medicine. Athill: Diseases of Women. MacCormac: Consumption and Rebreathed Air. Transactions of Obstetrical Society. Pereira's Materia Medica, New Edition. Lawson on Sciatica.

EXCHANGE JOURNALS.—Abstracts of Virchow's Archiv, Vol. liii., Parts 1 and 2. Reichert's Archiv, Part 4, 1871. Stricker's Medizinische Jahrbucher, Part 4, 1871.

Glasgow Medico-Chirurgical Society's Transactions, Obituary, Medical Intelligence, &c.

Published Quarterly. Edited by a Committee of the Glasgow and West of Scotland Medical Association. Annual Subscription, 12s., now due, and should be remitted at once to Dr. JAMES STEVEN, 331, Renfrew-street, Glasgow. Advertisements intended for next Number to be sent to the Publishers by the middle of July. Names of new subscribers received by the Secretary, Dr. JAS. FINLAYSON, 351, BATH STREET, GLASGOW.

Glasgow: DUNN & WRIGHT, 26, West Nile Street.

## THE NORTH OF ENGLAND SANITARIUM,

A Select Temperance Home for Ladies exclusively.

Is delightfully situated on the north bank of the river Tyne, amid a landscape seldom equalled in rich variety and extent, two miles east from Haltwhistle railway-station, telegraph and post office; and about as far west from that of Bardon Mill, midway between Gilsland and Hexham; all near to that grandest and most interesting of anti-quarian relics in Britain—the Roman Wall.

The remarkable healthfulness of the locality conspicuously indicates Hightown as naturally adapted for the important use to which it is devoted. Of the 623 districts into which the Registrar-General has apportioned England and Wales, that of Bellingham, ten miles to the north-east of Hightown, with a population of 7,000, stands alone as the most healthful; and two of the three next after Bellingham—viz., Glendale and Roth-bury—are also in Northumberland. The atmosphere is most invigorating, and replete with ozone. The height above the sea-level is 350 feet; which according to Weber (see p. 182 of the "Proceedings of the Roy. Med-Chir. Soc. of London," for May, 1869, is so essential to invalids. The annual rainfall is the English average, about thirty inches (see the yearly publication by Mr. Symons, 136, Camden-road, London), such as the laws of nature require for the maintenance of health. The water supply is practically unlimited, and of the rarest excellence for every purpose, from a lively uncontaminated brook, and a copious natural fountain. Hightown stands on its own gentle eminence, naturally sheltered on all sides, except the south, by an amphitheatre of high land, which especially protects it on the north.

All the rooms are ventilated in the most efficient yet agreeable manner, and are thoroughly sunned and cheerful; in fact, the Sanitarium combines the usual comforts of a town residence, with the perfection of a country-house, equally adapted for winter and summer. The number of boarders being limited, Mr. and Mrs. Hurman, assisted by their two daughters, can guarantee the fullest attention to each individual.

No case of legally defined insanity can be received; but those afflicted with Dipso-mania will meet with the kindest and most successful treatment.

Address—Mr. HURMAN, Hightown, Haltwhistle, Northumberland.
