JFM ARCHIVE

**Journal of
Fluid Mechanics**
Digital Archive
1956–1996

*Vital research from
the definitive source*

The JFM Digital Archive contains every article from the first 40 years of the journal, scanned and digitised to the highest standards.

Please speak to your librarian about gaining access.

JOURNALS

The European Physical Journal - Applied Physics

Marketed and distributed on behalf of ÉDP Sciences

Editor-in-Chief

B. Drévillon, LPCIM, France

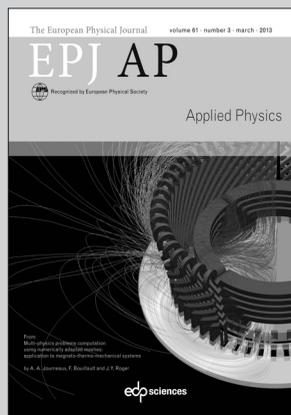

EPJ-AP is an international journal devoted to the promotion of the recent progresses in all fields of applied physics. The articles published in *EPJ-AP* span the whole spectrum of applied physics research including semiconductors, organic materials, thin films, nanotechnology, photonics, spintronics, magnetism, plasma, energy generation transfer, metrology, fluids and microfluidics, biophysics and biosensors, surfaces and interfaces.

European Journal of Applied Mathematics

Co-Editors-in-Chief

S. D. Howison, *University of Oxford, UK*

A. A. Lacey, *DPMMS, Heriot-Watt University, UK*

M. J. Ward, *University of British Columbia, Canada*

Since 2008 *EJAM* surveys have been expanded to cover Applied and Industrial Mathematics. Coverage of the journal has been strengthened in probabilistic applications, while still focusing on those areas of applied mathematics inspired by real-world applications, and at the same time fostering the development of theoretical methods with a broad range of applicability. Survey papers contain reviews of emerging areas of mathematics, either in core areas or with relevance to users in industry and other disciplines. Research papers may be in any area of applied mathematics, with special emphasis on new mathematical ideas, relevant to modelling and analysis in modern science and technology, and the development of interesting mathematical methods of wide applicability.

UNIVERSITY PRESS

- 468 Enumeration, orthogonality and completeness of the incompressible Coriolis modes in a sphere
D. J. Ivers, A. Jackson & D. Winch
- 499 A grid-independent length scale for large-eddy simulations
U. Piomelli, A. Rouhi & B. J. Geurts
- 528 Transition to stably stratified states in open channel flow with radiative surface heating
N. Williamson, S. W. Armfield, M. P. Kirkpatrick & S. E. Norris
- 556 Two-dimensional plastic flow of foams and emulsions in a channel: experiments and lattice Boltzmann simulations
B. Dollet, A. Scagliarini & M. Sbragaglia
- 590 The instability nature of the Vogel–Escudier flow
M. A. Herrada, V. N. Shtern & M. M. Torregrosa
- 611 Determining the relative stability of leading-edge vortices on nominally two-dimensional flapping profiles
J. G. Wong & D. E. Rival
- S 626 Lubricated viscous gravity currents
K. N. Kowal & M. G. Worster
- 656 Book Review
M. Juniper

JFM Rapids (online only)

- R1 Depth-integrated equation for hydro-acoustic waves with bottom damping
A. Abdolali, J. T. Kirby & G. Bellotti
- R2 Orientation and rotation of inertial disk particles in wall turbulence
N. R. Challabotla, L. Zhao & H. I. Andersson

S indicates supplementary data or movies available online.

- 1 Extreme probing of particle motions in turbulence
M. S. Borgas
- 5 Impact of liquids with different densities
Y. A. Semenov, G. X. Wu & A. A. Korobkin
- 28 Three-dimensional flow past a rotating cylinder
Navrose, J. Meena & S. Mittal
- 54 Bubble dynamics in a viscoelastic medium with nonlinear elasticity
R. Gaudron, M. T. Warnez & E. Johnsen
- 76 Numerical investigation of the possibility of macroscopic turbulence in porous media: a direct numerical simulation study
Y. Jin, M.-F. Uth, A. V. Kuznetsov & H. Herwig
- 104 Numerical simulations of aggregate breakup in bounded and unbounded turbulent flows
M. U. Babler, L. Biferale, L. Brandt, U. Feudel, K. Guseva, A. S. Lanotte, C. Marchioli, F. Picano, G. Sardina, A. Soldati & F. Toschi
- S 129 Ultrasonic atomization of liquids in drop-chain acoustic fountains
J. C. Simon, O. A. Sapozhnikov, V. A. Khokhlova, L. A. Crum & M. R. Bailey
- 147 Near-wall nanovelocimetry based on total internal reflection fluorescence with continuous tracking
Z. Li, L. D'eraimo, C. Lee, F. Monti, M. Yonger, P. Tabeling, B. Chollet, B. Bresson & Y. Tran
- 172 A large-scale investigation of wind reversal in a square Rayleigh–Bénard cell
B. Podvin & A. Sergent
- 202 Measurements of the coupling between the tumbling of rods and the velocity gradient tensor in turbulence
R. Ni, S. Kramel, N. T. Ouellette & G. A. Voth
- 226 A thermodynamically consistent phase-field model for two-phase flows with thermocapillary effects
Z. Guo & P. Lin
- 272 Pulsating pipe flow with large-amplitude oscillations in the very high frequency regime. Part 2. Phase-averaged analysis
M. Manna, A. Vacca & R. Verzicco
- 297 On high-frequency sound generated by gust–aerofoil interaction in shear flow
L. J. Ayton & N. Peake
- 326 Measurement of the dispersion relation for random surface gravity waves
T. M. A. Taklo, K. Trulsen, O. Gramstad, H. E. Krogstad & A. Jensen
- 337 Optimal nonlinear eddy viscosity in Galerkin models of turbulent flows
B. Protas, B. R. Noack & J. Östh
- S 368 Linear and nonlinear modelling of a theoretical travelling-wave thermoacoustic heat engine
C. Scalò, S. K. Lele & L. Hesselink
- 405 Optimal wavepackets in streamwise corner flow
O. T. Schmidt, S. M. Hosseini, U. Rist, A. Hanifi & D. S. Henningson
- 436 Thermocapillary migration and interaction of drops: two non-merging drops in an aligned arrangement
Z. Yin & Q. Li
