Aims and Scope

Chinese Journal of Agricultural Biotechnology brings cutting-edge Chinese research to an international audience. This journal takes carefully selected papers published in Chinese in the *Journal of Agricultural Biotechnology*, translates them and makes them available to the international scientific community.

Brought to you through a unique partnership between Cambridge University Press, the China Agricultural University and the Chinese Society of Agricultural Biotechnology, the *Chinese Journal of Agricultural Biotechnology* will feature high-quality Chinese research translated into English presented alongside specially commissioned material, providing a wider context.

Chinese Journal of Agricultural Biotechnology will cover subjects such as biotechnology (cellular, chromosomal, enzymatic, genetic and fermentation engineering) of plants, animals and relevant microorganisms (including nitrogen fixing bacteria and pathogens), and related biochemistry and structural analysis.
