General Notes

FOURTH INTERNATIONAL CONGRESS OF OTO-RHINO-LARYNGOLOGY.

Amsterdam, July 29th to August 3rd, 1940.

In 1940 the fourth International Congress of Oto-Rhino-Laryngology will take place in Amsterdam from July 29th to August 3rd.

HONORARY CHAIRMEN :

- Dr. H. Colijn, Prime Minister.
- Mr. J. A. N. Patijn, Minister of Foreign Affairs.
- Professor Dr. J. R. Slotemaker de Bruïne, Minister of Education, Arts and Sciences.
- Professor Mr. C. P. M. Romme, Minister of Social Affairs.

ORGANIZING COMMITTEE :

- President* : Professor Dr. H. Burger.
 - First Secretary* : Dr. A. Marres, Willemsparkweg 31, Amsterdam.
 - Joint Secretary* : Dr. A. J. H. Dokkum.
 - Treasurer* : Dr. M. J. ten Cate.
- The three main subjects for discussion are :

1. "CILIARY MOVEMENT OF THE MUCOUS MEMBRANES OF THE UPPER AIR PASSAGES." Reporters: Professor Dr. A. Hermann, Erfurt (Germany): "Ciliary Movement of the Mucous Membranes". Mr. V. E. Negus, London (England): "Ciliary Movement in the Larynx and Lower Air Passages." Dr. Arthur W. Proetz, St. Louis, Mo. (U.S.A.): "Ciliary Action in the Nose."
2. "ALLERGIC DISEASES. Reporters: Dr. Paul Kallós, Stockholm (Sweden): "Allergy from a general point of view." Professor C. E. Benjamins, Groningen (Holland): "Hay Fever." Dr. French K. Hansel, St. Louis, Mo. (U.S.A.): "Allergy in Oto-Laryngology and its Relations to other manifestations."
3. "DISEASE OF MÉNIÈRE." Reporters: Dr. Maurice Aubry and Dr. Marcell Ombriandane, Paris (France): "Surgical Treatment of Disease of Ménière." Professor Dr. Giorgio Ferreri, Rome (Italy): "Non-Surgical Treatment of Disease of Ménière."

Peroral Endoscopy Table

Fitted with Head Rest for BRONCHOSCOPY, ŒSOPHAGOSCOPY,
NASAL OPERATIONS Etc.

Designed by V. E. NEGUS, M.S., F.R.C.S.

The head rest enables the operator himself to place the patient in the desired position for a variety of operations. All parts touched by the operator are sterilisable.

The apparatus is an elaboration of Haslinger's Bronchoscopic head rest, but its range of utility is extended to enable the patient to be supported with the shoulders beyond the end of the table for œsophagoscopy, and to be kept in the correct attitude during operations performed in the sitting or semi-sitting position.
