CONTENTS OF VOLUME 35, 2008

No. 1 MARCH 2008

| | <i>Pages</i> |
|--|--------------|
| COMMENTS | |
| Why conserve marine environments? By <i>Susan Owens</i> | 1 |
| Evolving governance arrangements in multi-tenure reserve networks By <i>James A. Fitzsimons and Geoff Wescott</i> | 5 |
| Chance and randomness in design versus model-based approaches to impact assessment: comments on Bulleri <i>et al.</i> (2007) By <i>Allan Stewart-Oaten</i> | 8 |
| The analysis of ecological impacts in human-dominated environments: reply to Stewart-Oaten (2008) By <i>F. Bulleri, A. J. Underwood and L. Benedetti-Cecchi</i> | 11 |
| PAPERS | |
| Indigenous ecotourism in the Amazon: a case study of 'Casa Matsigenka' in Manu National Park, Peru By <i>Julia Ohl-Schacherer, Elke Mannigel, Chris Kirkby, Glenn H. Shepard Jr and Douglas W. Yu</i> | 14 |
| Estimating the number of trees and forest area necessary to supply internationally traded volumes of big-leaf mahogany (<i>Swietenia macrophylla</i>) in Amazonia By <i>J. Grogan and M. Schulze</i> | 26 |
| Engagement in co-management of marine benthic resources influences environmental perceptions of artisanal fishers By <i>Stefan Gelcich, Michel J. Kaiser, Juan Carlos Castilla and Gareth Edwards-Jones</i> | 36 |
| Broadening reef protection across the Marine Conservation Corridor of the Eastern Tropical Pacific: distribution and diversity of reefs in Las Perlas Archipelago, Panama By <i>Hector M. Guzman, Sarah Benfield, Odalisca Breedy and James M. Mair</i> | 46 |
| Managing international 'problem' species: why pan-European cormorant management is so difficult By <i>Vivien Behrens, Felix Rauschmayer and Heidi Wittmer</i> | 55 |
| Projected environmental shifts under climate change: European trends and regional impacts By <i>M. J. Metzger, R. G. H. Bunce, R. Leemans and D. Viner</i> | 64 |
| Distributing conservation incentives in the buffer zone of Chitwan National Park, Nepal By <i>Arian Spiteri and Sanjay K. Nepal</i> | 76 |

BOOK REVIEWS

| | |
|--|----|
| <i>Lawn People. How Grasses, Weeds and Chemicals Make Us Who We Are</i> , by Paul Robbins (BILL ADAMS); <i>Redesigning Environmental Valuation: Mixing Methods Within Stated Preference Techniques</i> , by Neil A. Powe (ANDREW ANGUS); <i>The Social Construction of Climate Change: Power, Knowledge, Norms, Discourses</i> , edited by Mary E. Pettenger (MAXWELL T. BOYKOFF); <i>Vietnam: A Natural History</i> , by Eleanor Jane Sterling, Martha Maud Hurley and Le Duc Minh; Illustrations by Joyce A. Powzyk (DANIEL HARDER); <i>Tourism and Climate Change. Risks and Opportunities</i> , by Susanne Becken and John E. Hay (RICHARD LADLE); <i>Markets and the Environment</i> , by Nathaniel O. Keohane and Sheila M. Olmstead (MARKKU LEHTONEN); <i>Wetland Drainage, Restoration, and Repair</i> , by Thomas R. Biebighauser (E. MALTBY); <i>Peace Parks: Conservation and Conflict Resolution</i> , edited by Saleem H. Ali (ARTHUR H. WESTING) | 87 |
|--|----|

No. 2 JUNE 2008

PAPERS

| | |
|---|-----|
| Deforestation dynamics in a fragmented region of southern Amazonia: evaluation and future scenarios By <i>Fernanda Michalski, Carlos A. Peres and Iain R. Lake</i> | 93 |
| Compromise between seabird enjoyment and disturbance: the role of observed and observers By <i>Alejandro Martínez-Abrán, Daniel Oro, David Conesa and Juan Jiménez</i> | 104 |

| | |
|--|-----|
| Conservation of grassland patches failed to enhance colonization of ground-active beetles on formerly cultivated plots By <i>Sylvain Fadda, Jerome Orgeas, Philippe Ponel, Elise Buisson and Thierry Dutoit</i> | 109 |
| Influence of cultivation, settlements and water sources on wildlife distribution and habitat selection in south-east Kajiado, Kenya By <i>J. K. Mworio, J. I. Kinyamario and J. M. Githaiga</i> | 117 |
| Wild sheep and livestock in Nepal Trans-Himalaya: coexistence or competition? By <i>Rinjan Shrestha and Per Wegge</i> | 125 |
| Ecosystem model predictions of fishery and conservation trade-offs resulting from marine protected areas in the East China Sea By <i>Hong Jiang, He-Qin Cheng, William J. F. Le Quesne, Hai-Gen Xu, Jun Wu, Hui Ding and Francisco Arreguín-Sánchez</i> | 137 |
| Forest environmental income in Vietnam: household socioeconomic factors influencing forest use By <i>Pamela D. Mcelwee</i> | 147 |
| Biodiversity in small-scale tropical agroforests: a review of species richness and abundance shifts and the factors influencing them By <i>Ben R. Scales and Stuart J. Marsden</i> | 160 |
| Role of bioregionalism in Bookmark Biosphere Reserve, Australia By <i>Sharron L. Pfueller</i> | 173 |

BOOK REVIEWS

| | |
|--|-----|
| <i>Surviving Climate Change: The Struggle to Avert Global Catastrophe</i> , edited by David Cromwell and Martin Levene (GARRY W. TROMPF); <i>Advanced Distance Sampling. Estimating Abundance of Biological Populations</i> , by S. T. Buckland, D. R. Anderson, K. P. Burnham, J. L. Laake, D. L. Borchers and L. Thomas (MURRAY EFFORD); <i>The Kyoto Protocol and Beyond. Legal and Policy Challenges of Climate Change</i> , edited by W. TH. Douma, L. Massai and M. Montini (PEKKA JOKINEN); <i>Sharing Power: A Global Guide to Collaborative Management of Natural Resources</i> , by Grazia Borrini-Feyerabend, Michel Pimbert, M. Taghi Farvar, Ashish Kothari and Yves Renard (ROBERT ARTHUR); <i>Wildlife Conservation in Western China: Preserving the Habitat of China's Wild West</i> , by Richard B. Harris (DANIEL MILLER); <i>Harnessing Farms and Forests in the Low-Carbon Economy. How to Create, Measure, and Verify Greenhouse Gas Offsets</i> , edited by Zac Willey and Bill Chameides (COELI M. HOOVER); <i>Old Fields. Dynamics and Restoration of Abandoned Farmland</i> , edited by Viki A. Cramer and Richard J. Hobbs (JONATHAN MITCHLEY); <i>Europe's Living Landscapes: Essays Exploring our Identity in the Countryside</i> , edited by Bas Pedroli, Anne Van Doorn, Geert de Blust, Maria Luisa Paracchini, Dirk Wascher and Freda Bunce (MAGGIE ROE) | 187 |
|--|-----|

No. 3 SEPTEMBER 2008

COMMENTS

| | |
|--|-----|
| Making empirical progress in observational ecology By <i>M. Aaron Macneil</i> | 193 |
| Will urbanization cause deforested areas to be abandoned in Brazilian Amazonia? By <i>Philip M. Fearnside</i> | 197 |

PAPERS

| | |
|---|-----|
| Coercion, voluntary compliance and protest: the role of trust and legitimacy in combating local opposition to protected areas By <i>Marce J. Stern</i> | 200 |
| The impact of hunting with dogs on wildlife harvests in the Bosawas Reserve, Nicaragua By <i>Jeremy Koster</i> | 211 |
| Length-based assessment of sustainability benchmarks for coral reef fishes in Puerto Rico By <i>Jerald S. Ault, Steven G. Smith, Jianguang Luo, Mark E. Monaco and Richard S. Appeldoorn</i> | 221 |
| Transforming reef fisheries management: application of an ecosystem-based approach in the USA Caribbean By <i>Richard S. Appeldoorn</i> | 232 |
| Conservation on community lands: the importance of equitable revenue sharing By <i>Rosemary Groom and Stephen Harris</i> | 242 |

- Conserving Mackinder's eagle owls in farmlands of Kenya: assessing the influence of pesticide use, tourism and local knowledge of owl habits in protecting a culturally loathed species
By *Darcy L. Ogada and Paul Muriithi Kibuthu* 252

- Assessing the importance of fishing impacts on Hawaiian coral reef fish assemblages along regional-scale human population gradients
By *I. D. Williams, W. J. Walsh, R. E. Schroeder, A. M. Friedlander, B. L. Richards and K. A. Stamoulis* 261

BOOK REVIEWS

- Global Warming. Looking Beyond Kyoto*, edited by Ernesto Zedillo (ALISON ASHLIN); *Implementation of Environmental Policies in Developing Countries. A Case of Protected Areas and Tourism in Brazil*, by Jose Antonio Puppim de Oliveira (BILL BRAMWELL); *The International Law of Environmental Impact Assessment: Process, Substance and Integration*, by Neil Craik (SIMON MARSDEN); *Plan B 3.0: Mobilizing to Save Civilization*, by Lester R. Brown (NORMAN MYERS); *Ecological Modeling. A Common-Sense Approach to Theory and Practice*, by William E. Grant and Todd M. Swannack (STEVEN RUSHTON) 273

No. 4 DECEMBER 2008

COMMENT

- Adaptive management of an estuarine integrated conservation and development project in Morocco
By *L. Ernoul and F. Mesleard* 279

PAPERS

- Biological invasions and biocultural diversity: linking ecological and cultural systems
By *Jeanine M. Pfeiffer and Robert A. Voeks* 281

- An integrated and adaptive management model to address the long-term sustainability of tourist interactions with cetaceans
By *J. E. S. Higham, L. Bejder and D. Lusseau* 294

- Temporal fluctuations in Amazonian deforestation rates
By *Robert M. Ewers, William F. Laurance and Carlos M. Souza Jr* 303

- Tropical dry forests in Venezuela: assessing status, threats and future prospects
By *J. P. Rodríguez, J. M. Nassar, K. M. Rodríguez-Clark, I. Zager, C. A. Portillo-Quintero, F. Carrasquel and S. Zambrano* 311

- The biodiversity implications of changes in coastal tourism due to climate change
By *Emma G. Coombes, Andy P. Jones and William J. Sutherland* 319

- Evaluating the legacy of an integrated conservation and development project around a tiger reserve in India
By *Sanjay Gubbi, Matthew Linkie and Nigel Leader-Williams* 331

- Management preferences, perceived benefits and conflicts among resource users and managers in the Mafia Island Marine Park, Tanzania
By *T. R. McClanahan, J. Cinner, A. T. Kamukuru, C. Abunge and J. Ndagala* 340

- Are citizens' juries a useful tool for assessing environmental value?
By *Jackie Robinson, Beth Clouston, Jungho Suh and Milani Chaloupka* 351

BOOK REVIEWS

- Seamounts: Ecology, Fisheries and Conservation*, by Tony J. Pitcher, Telmo Morato, Paul J. B. Hart, Malcolm R. Clark, Nigel Haggan and Ricardo S. Santos (ASHLEY A. ROWDEN); *Environmental Anthropology: A Historical Reader*, by Michael R. Dove and Carol Carpenter (BONNIE J. MCCAY); *Demographic Toxicity: Methods in Ecological Risk Assessment*, edited by H. Reşit Akçakaya, John D. Stark and Todd S. Bridges (JENNIFER GERVAIS); *Tropical Conservation Biology*, by Navjot S. Sodhi, Barry W. Brook and Corey J. A. Bradshaw (ARIEL E. LUGO); *Large-Scale Ecosystem Restoration: Five Case Studies from the United States*, edited by Mary Doyle and Cynthia A. Drew (WILLIAM J. MITSCH); *The World System and the Earth System. Global Socioenvironmental Change and Sustainability since the Neolithic*, edited by Alf Hornborg and Carole Crumley (SVERKER SÖRLIN); *Trees, Truffles, and Beasts: How Forests Function*, by Chris Maser, Andrew W. Claridge and James M. Trappe (CHRISTOPHER W. WOODALL) 361

Environmental Conservation – Instructions for Authors

Environmental Conservation welcomes papers relevant to scientifically based management of the Earth's environment. The Journal publishes:

- subject reviews (normally <10 000 words)
- research papers (up to 8 000 words)
- reports (<400 words including references)
- comments (<1000 words)
- book reviews (<750 words).

The main criteria for acceptance of subject reviews and research papers are originality, scientific rigour, international interdisciplinary appeal to the readership and acceptability of style. Papers must not have been published previously, nor be under consideration for publication elsewhere. *Environmental Conservation* employs an interactive processing and editing procedure. We receive many more submissions than we have space to publish and the final authority in all matter relating to publication lies with the Editor. All papers are initially assessed by the Editorial Office and are likely to be returned to the authors for revision before peer review. Papers are accepted on the understanding that the underlying work has been conducted in an environmentally and socially responsible manner. In order for the Journal to deal with any copyright matters, the corresponding author is required to assign the copyright of any paper published to the Foundation for Environmental Conservation. All authors must ensure that all necessary permissions have been obtained for reproducing any other copyright material, including the right to reproduce and publish electronically.

Manuscript submission

Papers should be submitted online by registering with our Manuscript Central service at <http://mc.manuscriptcentral.com/envcon> and uploading the paper. Please ensure that your document is double-spaced and written in a 12-point common font such as Times New Roman. All pages must be numbered and a word count given (including references and figure legends). Please remember that a separate abstract <200 words is required at submission. In the event that substantial English improvement is required at any stage during the processing of a manuscript a quote will be supplied for the work involved. Authors are urged to read the detailed instructions for submitting their manuscript online. These can be found at the submission website by clicking on the 'Instructions and Forms' link in the top right of the screen; and then clicking on the link for 'Environmental Conservation Online Submission Instructions for Authors' on the following page. Authors who are unable to submit online should contact the Editorial Office (envcons@ncl.ac.uk) for assistance. When a paper is accepted for publication the preferred formats for papers are Microsoft Word for text, and .tif or .eps for any Figures saved electronically.

Journal style guide

A recent issue of the journal from Volume 30 onwards should be consulted for style. Units, symbols and related matters are based on the CBE Manual *Scientific Style and Format* (6th Edition, 1994, ISBN 0-521-47154-0). The first page must include author names (capitals) and full addresses where the work was carried out. The corresponding author should provide an email address. Current addresses, where different, should also be given, and a word count including references and legends. The second page should contain a Summary followed by the main body of text. A research paper will normally have such sections as: Introduction; Methods; Results; Discussion; Acknowledgments; References; Tables (numbered in textual sequence and including captions); Figure legends; and Figures, which should accordingly be so ordered. A subject review should have sections appropriate to the topic addressed, but any methods and sources should preferably be detailed in a separate section. The Summary should be concise and informative. It should be <5% of the total word count and is complete in itself. It should succinctly express the context, purpose, methods, findings, approach and implications of the study. There should be no references or unexplained abbreviations. Avoid phrases such as 'are described', 'will be discussed', etc. The Methods section should include essential details of study area, analyses and sources of data. Please note that footnotes are not used in the *Environmental Conservation*.

Spelling

Spelling should conform to The Concise Oxford Dictionary, 10th edition or later. Scientific names of genera, species and subspecies, but not of higher groups, should be italicised. Foreign words should be italicized at their first mention, where they also must be defined and explained, but thereafter may be written in normal typeface.

Units, abbreviations, etc

The International System of units (SI) is to be used. Units, symbols and related matters are based on the CBE Manual *Scientific Style and Format* (6th Edition, 1994, ISBN 0-521-47154-0). Acronyms and abbreviations are generally in upper case and should be expanded at the first mention. All

currencies should at first mention have a US\$ exchange rate (e.g. '£1 = US\$1.89, January 2005).

References

All references to cited literature should be given in alphabetical order on a new page at the end of the paper. Where a Reference is not to a recognized periodical or substantive book, but rather to an official document, internal technical or consultancy report, greater flexibility may be exercised. The chief criterion for correct referencing is that a reader be provided with the information necessary to find the item cited. References should also be given to international treaties (UNTS number). Unnecessary references should be omitted. Please refer to the online 'Instructions for Authors' for examples.

Tables

Tables should be on sheets separate from the main text and presented one per page complete with heading. They should be numbered and referred to by their number in the text. Tables should be suitable for production on a single journal page or less. Table captions should be brief and ensure the Table is comprehensible without reference to the text. They should incorporate any scale, key or symbols, etc. necessary to interpret the information.

Figures

Figures should again be on sheets separate from the text. Each Figure must be on a separate page, unboxed and clearly identified. These may be line drawings or photographs and all should be referred to consecutively in the text as Fig. 1, etc. Figures should be as simple as possible, avoiding 3-dimensional graphs, with fine lines, stippling and unusual symbols, which cannot be reproduced satisfactorily when reduced to one (84mm) or two-column width (175mm). Where various shadings are used within a figure please ensure that it is easy to differentiate between them. Labels on Figures should be added to the original drawing before submission. They should be brief and explained in the legend. Preferred symbols are open and filled circles, boxes and triangles, and these should be used consistently between Figures and as near as possible to 9 point when reproduced in the final journal. Figure legends should be in a list separate from the Figures and make the Figure comprehensible without reference to the text. They should incorporate any scale, key or symbol, etc. necessary to interpret the information. Maps must bear scales and photographs should include some indication of scale. Figures reproduced from other sources should be fully acknowledged in the legend, and permission for their reproduction in both written and electronic format should be sought before use. Colour illustrations are acceptable if they significantly inform/add information to the text, and provided that they are of a very high quality. However, the cost will be charged to the author(s) and an agreement to meet the costs will be required before the manuscript can be accepted for publication. For the purposes of reviewing, high-resolution graphics for figures are not necessary; authors may submit low-resolution or pdf versions of figures, but should ensure that they are of sufficient quality for viewing on-screen or by laser printing. You may insert your figures into the document, but please put all figures and tables at the end. When your paper has been accepted for publication, if there are figures then you need to supply them as high resolution images. Please refer to the online 'Instructions for Authors' for the formats and resolutions that Cambridge Journals recommend for supplying electronic figures.

Tracking your submission

Your paper will be acknowledged by email on receipt. A reference number will be allocated which you should use in all correspondence and for tracking an electronic submission on Manuscript Central. All submissions approved for peer review are seen by at least two reviewers. The journal makes every effort to ensure that reviewers report swiftly. As soon as the Editor has reached a decision on your paper you will be notified by e-mail. Appeals on any decisions made by the Editors must be made within a month of the decision email in order for them to be considered. Authors of papers supported by reviews can expect normally to have their paper returned to them, with comments of both reviewers and Editor. The revised manuscript should be submitted as directed with an accompanying letter detailing how substantive points raised have been addressed. After acceptance, the copy-editor and publishers deal with all matters relating to printing. Proofs and offprint order forms will be sent to corresponding authors of subject reviews, research papers and comments. If authors are to be away from their correspondence address during the ten weeks after acceptance, they must have arrangements in place for queries from the copyeditor to be addressed promptly, and the proofs to be carefully read and swiftly returned. Corresponding authors of subject reviews and research papers will receive 25 free offprints.

International Journal of Interdisciplinary Environmental Science

VOLUME 35 No. 4 DECEMBER 2008

CONTENTS

COMMENT

- Adaptive management of an estuarine integrated conservation and development project in Morocco
By *L. Ernoul and F. Mesleard* 279

PAPERS

- Biological invasions and biocultural diversity: linking ecological and cultural systems
By *Jeanine M. Pfeiffer and Robert A. Voeks* 281
- An integrated and adaptive management model to address the long-term sustainability of tourist interactions with cetaceans
By *J. E. S. Higham, L. Bejder and D. Lusseau* 294
- Temporal fluctuations in Amazonian deforestation rates
By *Robert M. Ewers, William F. Laurance and Carlos M. Souza Jr* 303
- Tropical dry forests in Venezuela: assessing status, threats and future prospects
By *J. P. Rodriguez, J. M. Nassar, K. M. Rodriguez-Clark, I. Zager, C. A. Portillo-Quintero, F. Carrasquel and S. Zambrano* 311
- The biodiversity implications of changes in coastal tourism due to climate change
By *Emma G. Coombes, Andy P. Jones and William J. Sutherland* 319
- Evaluating the legacy of an integrated conservation and development project around a tiger reserve in India
By *Sanjay Gubbi, Matthew Linkie and Nigel Leader-Williams* 331
- Management preferences, perceived benefits and conflicts among resource users and managers in the Mafia Island Marine Park, Tanzania
By *T. R. McClanahan, J. Cinner, A. T. Kamukuru, C. Abunge and J. Ndagala* 340
- Are citizens' juries a useful tool for assessing environmental value?
By *Jackie Robinson, Beth Clouston, Jungho Suh and Milani Chaloupka* 351

BOOK REVIEWS

- Seamounts: Ecology, Fisheries and Conservation*, by Tony J. Pitcher, Telmo Morato, Paul J. B. Hart, Malcolm R. Clark, Nigel Haggan and Ricardo S. Santos (ASHLEY A. ROWDEN); *Environmental Anthropology: A Historical Reader*, by Michael R. Dove and Carol Carpenter (BONNIE J. MCCAY); *Demographic Toxicity: Methods in Ecological Risk Assessment*, Edited by H. Reşit Akçakaya, John D. Stark and Todd S. Bridges (JENNIFER GERVAIS); *Tropical Conservation Biology*, by Navjot S. Sodhi, Barry W. Brook and Corey J. A. Bradshaw (ARIEL E. LUGO); *Large-Scale Ecosystem Restoration: Five Case Studies from the United States*, Edited by Mary Doyle and Cynthia A. Drew (WILLIAM J. MITSCH); *The World System and the Earth System. Global Socioenvironmental Change and Sustainability since the Neolithic*, Edited by Alf Hornborg and Carole Crumley (SVERKER SÖRLIN); *Trees, Truffles, and Beasts: How Forests Function*, by Chris Maser, Andrew W. Claridge and James M. Trappe (CHRISTOPHER W. WOODALL) 361
