

(CONTINUED)

- 792–812 Evidence for the diet and habitat of two late Pleistocene mastodons from the Midwest, USA**  
*Hilary H. Birks, Bas van Geel, Daniel C. Fisher, Eric C. Grimm, Wim J. Kuijper, Jan van Arkel, and Guido B.A. van Reenen*
- 813–828 Quaternary tephra from the Valles caldera in the volcanic field of the Jemez Mountains of New Mexico identified in western Canada**  
*John A. Westgate, Giday WoldeGabriel, Henry C. Halls, Colin J. Bray, René W. Barendregt, Nicholas J.G. Pearce, Andrei M. Sarna-Wójcicki, Michael P. Gorton, Richard E. Kelley, and Emily Schultz-Fellenz*
- 829–847 Temperatures recorded by cosmogenic noble gases since the last glacial maximum in the Maritime Alps**  
*Marissa M. Tremblay, David L. Shuster, Matteo Spagnolo, Hans Renssen, and Adriano Ribolini*
- 848–860 Late Quaternary micromammals and the precipitation history of the southern Cape, South Africa**  
*J. Tyler Faith, Brian M. Chase, and D. Margaret Avery*
- 861–880 Late Quaternary vegetation, climate, and fire history of the Southeast Atlantic Coastal Plain based on a 30,000-yr multi-proxy record from White Pond, South Carolina, USA**  
*Teresa R. Krause, James M. Russell, Rui Zhang, John W. Williams, and Stephen T. Jackson*
- 881–891 Lake-level variability in Salar de Coipasa, Bolivia during the past ~40,000 yr**  
*J. Andrew Nunnery, Sherilyn C. Fritz, Paul A. Baker, and Wout Salenbien*
- 892–909 Lake-level changes and hominin occupations in the arid Turkana basin during volcanic closure of the Omo River outflows to the Indian Ocean**  
*Xavier Boës, Sandrine Prat, Vincent Arrighi, Craig Feibel, Bereket Haileab, Jason Lewis, and Sonia Harmand*

LETTERS TO THE EDITOR

- 910–913 Another perspective on the age and origin of the Berelyokh mammoth site—Comment to the paper published by Lozhkin and Anderson, *Quaternary Research* 89 (2018), 459–477**  
*Vladimir V. Pitulko, Elena Y. Pavlova, Aleksandr E. Basiyan, and Pavel A. Nikolskiy*
- 914–915 Another perspective on the age and origin of the Berelyokh mammoth site: response to Pitulko et al.**  
*Anatoly V. Lozhkin and Patricia M. Anderson*

# QUATERNARY RESEARCH

*Quaternary Research* is an international journal devoted to the advancement of the interdisciplinary understanding of the Quaternary Period. We aim to publish articles of broad interest with relevance to more than one discipline, and that constitute a significant new contribution to Quaternary science. The journal's scope is global, building on its nearly 50-year history in advancing the understanding of earth and human history through interdisciplinary study of the last 2.7 million years. Research areas include geoarcheology, geochemistry and geophysics, geochronology, geomorphology, glaciology, neotectonics, paleobotany and paleoecology, paleoclimatology, paleogeography, paleohydrology, paleontology, paleoceanography, paleopedology, Quaternary geology, volcanology and tephrochronology.

**Submit manuscripts** online at <http://editorialmanager.com/qr>. See instructions for submitting your manuscripts at <https://www.cambridge.org/core/journals/quaternary-research/information/guide-for-authors>.

**Subscription Information:** *Quaternary Research* published two volumes per year with three issues each. The journal is published on behalf of Quaternary Research Center by Cambridge University Press, One Liberty Plaza, 20<sup>th</sup> Floor, New York, NY 10006, USA. Annual subscription rates for Volumes 91 and 92 (2019): Institutional rate, print only: \$1,447.00 (£1026.00 + VAT). Institutional rate, online only: \$1,420.00 (£1008.00 + VAT). Institutional rate, print and online: \$1,506.00 (£1070.00 + VAT). For subscriptions, renewals, and address changes, please visit <https://www.cambridge.org/core/journals/quaternary-research/subscribe>. Email [subscriptions\\_newyork@cambridge.org](mailto:subscriptions_newyork@cambridge.org) if you are in the Americas or [journals@cambridge.org](mailto:journals@cambridge.org) for the rest of the world.

**THEMATIC SET: FLUVIAL ARCHIVES GROUP (FLAG) POLAND**

- 453–456 **A celebration of the twentieth anniversary of the Fluvial Archives Group (FLAG)**  
*Rebecca M. Briant, David R. Bridgland, Stéphane Cordier, Gilles Rixhon, and Ronald van Balen*
- 457–471 **Quantifying the erosional impact of a continental-scale drainage capture in the Duero Basin, northwest Iberia**  
*Loreto Antón, Alfonso Muñoz-Martín, and Gerardo De Vicente*
- 472–492 **Geomorphic and tectonic implications of the endorheic to exorheic transition of the Ebro River system in northeast Iberia**  
*Ángel Soria-Jáuregui, Francisco Jiménez-Cantizano, and Loreto Antón*
- 493–519 **Drainage evolution in the Polish Sudeten Foreland in the context of European fluvial archives**  
*Dariusz Krzyszkowski, David R. Bridgland, Peter Allen, Rob Westaway, Lucyna Wachecka-Kotkowska, and Jerzy A. Czerwonka*
- 520–532 **Climate control on alluvial sediment storage in the northern foreland of the Tatra Mountains since the late Pleistocene**  
*Janusz Olszak, Józef Kukulak, and Helena Alexanderson*
- 533–547 **Tectonic and climatic controls on Quaternary fluvial processes and river terrace formation in a Mediterranean setting, the Göksu River, southern Turkey**  
*Nurcan Avcın, Jef Vandenberghe, Ronald van Balen, Nafiye Güneç Kıyak, and Tuğba Öztürk*
- 548–569 **Spatial and temporal variations in river terrace formation, preservation, and morphology in the Lower Meuse Valley, The Netherlands**  
*Hessel Antonius Gerardus Woolderink, Cornelis Kasse, Kim Mikkel Cohen, Wim Zacharias Hoek, and Ronald Theodorus Van Balen*
- 570–583 **Interaction of fluvial and eolian sedimentation processes, and response to climate change since the last glacial in a semiarid environment along the Yellow River**  
*Xianyan Wang, Junfei Ma, Shuangwen Yi, Jef Vandenberghe, Yan Dai, and Huayu Lu*
- 584–599 **Late Quaternary geomorphology and geoarchaeology in the rivers of the Holy Cross Mountains region, central Europe**  
*Tomasz Kalicki, Marcin Firczek, Paweł Przepióra, Piotr Kusztal, Edyta Kłusakiewicz, and Emanuela Malęga*
- 600–619 **Geoarchaeological evidence of landscape transformations at the Neolithic and Bronze Age settlement of Nea Raedestos in the Anthemous River valley, central Macedonia, Greece**  
*Jakub Niebieszczański, Iwona Hildebrandt-Radke, Konstantinos Vouvalidis, Georgios Syrides, Stylianos Andreou, Janusz Czebreszuk, Maria Pappa, Panagiotis Tsourlos, Monika Karpińska-Kolaczek, Monika Rządziejewicz, and Piotr Kolaczek*
- 620–637 **Channel planform changes along the Scrivia River floodplain reach in northwest Italy from 1878 to 2016**  
*Andrea Mandarino, Michael Maerker, and Marco Firpo*

**RESEARCH ARTICLES**

- 638–649 **Implications of radiocarbon ages of organic and inorganic carbon in coastal lakes in Florida for establishing a reliable chronology for sediment-based paleoclimate reconstruction**  
*Yang Wang, Oindrila Das, Xiaomei Xu, Jin Liu, Shakura Jahan, Guy H. Means, Joseph Donoghue, and Shijun Jiang*
- 650–664 **Spatiotemporal evolution of paludification associated with autogenic and allogenic factors in the black spruce–moss boreal forest of Québec, Canada**  
*Éloïse Le Stum-Boivin, Gabriel Magnan, Michelle Garneau, Nicole J. Fenton, Pierre Grondin, and Yves Bergeron*
- 665–678 **A high-resolution paleolimnological study of climate and human impacts on Lac Noir, Québec, over the past 1000 yr**  
*Karen Neil and Konrad Gajewski*
- 679–690 **Climate and human influence on late Holocene fire regimes in the British Virgin Islands**  
*Joshua R. Mueller, Mitchell J. Power, and Colin J. Long*
- 691–704 **Shifts of demography and growth in limber pine forests of the Great Basin, USA, across 4000 yr of climate variability**  
*Constance I. Millar, David A. Charlet, Diane L. Delany, John C. King, and Robert D. Westfall*
- 705–713 **A 7600 yr vegetation and fire history from Anthony Lake, northeastern Oregon, USA, with linkages to modern synoptic climate patterns**  
*Colin J. Long, Jacqueline J. Shinker, Thomas A. Minckley, Mitchell J. Power, and Patrick J. Bartlein*
- 714–728 **The environmental impact of a pre-Columbian city based on geochemical insights from lake sediment cores recovered near Cahokia**  
*David P. Pompeani, Aubrey L. Hillman, Matthew S. Finkenbinder, Daniel J. Bain, Alexander Correa-Metrio, Katherine M. Pompeani, and Mark B. Abbott*
- 729–750 **Geochronology, paleogeography, and archaeology of the Acheulian locality of ‘Evron Landfill in the western Galilee, Israel**  
*Maayan Shemer, Orr Crowi, Ron Shaar, Yael Ebert, Ari Matmon, ASTER Team, Liora Kolska Horowitz, Vera Eisenmann, Yehouda Enzel, and Omry Barzilai*
- 751–767 **Mean, variance, and trends of Levant precipitation over the past 4500 years from reconstructed Dead Sea levels and stochastic modeling**  
*Efrat Morin, Tamar Ryb, Itai Gavrieli, and Yehouda Enzel*
- 768–791 **Faunal remains from recent excavations at Shishan Marsh 1 (SM1), a Late Lower Paleolithic open-air site in the Azraq Basin, Jordan**  
*James T. Pokines, Adrian M. Lister, Christopher J. H. Ames, April Nowell, and Carlos E. Cordova*
