

ZOLTÁN KODÁLY CHORAL METHOD

Zoltán Kodály's method of teaching, which has been phenomenally successful in Hungary, is now available in English translation. Based on unaccompanied part-singing from the beginning of a child's school music, perfect intonation and certainty of rhythmic pattern can be attained at a much earlier age than is usual in this country at present.

333 elementary exercises in sight-singing

50 nursery songs within the range of five notes

**Let us sing correctly:
107 exercises in intonation**

**Bicinia Hungarica I:
60 progressive two-part songs**

NEW RELEASE ANTON VON WEBERN

Sketches 1926 - 1945

From the composer's autograph sketchbooks
in the Moldenhauer Archive

Webern's musical sketches belong to the most fascinating specimens of their kind. They allow us to observe step by step progress made by a composer other than Schoenberg himself in applying the principles of the twelve-tone technique to practical composition. A unique aspect of these sketches is their relatively unbroken continuity and they are remarkable because they also represent a personal document of Webern's life. Not only is nearly every musical statement dated, but very frequently there are diary notes interspersed, recording private affairs, such as birthdays, travel, excursions and the like.
