Journal of State Medicine.—"No medical man can afford to do without this Annual."

Glasgow Medical Journal.—"The amount of information contained in the volume is almost incredible, and nothing of the nature of new discovery has been omitted."

Journal of the Royal Naval Medical Service.—"The work is invaluable to those wishing to keep pace with modern theory and practice, and should be carefully read."

New York Medical Journal.—"The general practitioner may well feel grateful for this work, even if he has been a fairly diligent reader of the medical periodicals."

ESTABLISHED OVER FIFTY YEARS.

Regulating Apparatus for the Administration of Warm Anæsthetic Vapours.

(*Vide* article in LANCET, Jan. 8th, 1916, by FRANCIS E. SHIBWAY, M.A., M.D.Cantab.)

The Administration of Warm Ether Vapour has all the advantages of the Open Ether Method, and is safer. There is less loss of body heat, less shock, less consumption of the anæsthetic.

Price **£3 15 0**

If with Chloroform Attachment and Buxton Bottle, **£4 17 6**

Dan McKenzie's NASAL FORCEPS.

These are a modification of Luc's Nasal Forceps with the handles bent at an angle which permits the operator to keep the blades always in view. They have been found very useful in ordinary nasal work and in submucous resection. The bars on the handles provide additional holds for the fingers and add to the handiness of the instrument.

"Emandem"

Improved Metallic

Filament Lamp.

(Registered Design.)

Gives a light of intense brilliancy (40-50 c.p.), almost equal to the Nernst Lamp, which is now unobtainable. Can be recommended to those who require a good light for special work or for general surgery.

This lamp has been installed in a large number of War Hospitals.

The "Allenburys" (TRADE MARK)

(MEDICATED) Throat Pastilles

Efficient

Palatable

The basis of the "Allenburys" Throat Pastilles is a special *pâte de jujube*. The pastilles are demulcent, soluble and palatable, and contain accurate amounts of pure active drugs. They dissolve slowly and uniformly, so ensuring the thorough suffusion of the mucous membrane, and the prolonged continuous direct effect of the active ingredients.

The following pastilles are largely used, and have been found from long practical experience to be very efficacious.
