The only
percutaneous device dressing
proven to reduce the incidence of
CRBSI and local infections¹

BIOPATCH Dressing is specifically designed to inhibit bacterial growth around all percutaneous devices, including catheters and orthopedic pins.

**Powerful protection...
Powerful proof.**

- BIOPATCH Dressing provides protection against a broad spectrum of bacteria including resistant strains MRSA and VRE, as well as *Candida albicans*.
- In a controlled, randomized trial, use of BIOPATCH Dressing resulted in a reduction in the incidence of CRBSI and local infections as compared with standard care.¹

BIOPATCH^{*}
ANTIMICROBIAL DRESSING
with Chlorhexidine Gluconate

B.E.S.T. Practice means BIOPATCH Every Single Time.[†]

For additional information or technical support,
call **1-877-384-4266** or visit our website at www.biopatch.com.

[†] Not for use on premature infants, patients with known sensitivity to CHG.
Safety and effectiveness in children under 16 years of age has not been established.

Infection Control and Hospital Epidemiology (ISSN 0899-823X) is published monthly by the University of Chicago Press, 1427 East 60th St., Chicago, IL 60637-2954 (<http://www.journals.uchicago.edu/ICHE/>). The editorial offices are in Chicago, Illinois.

Editorial Office

Communications should be addressed to the Editor, *Infection Control and Hospital Epidemiology*, 1427 E. 60th St, Chicago, IL 60637-2954; (e-mail: iche@press.uchicago.edu); telephone: [773] 702-2448, fax: [773] 753-4247. Contributors should consult the Information for Authors, which is available at the *ICHE* Web site.

Advertising

Publication of an advertisement in *Infection Control and Hospital Epidemiology* does not imply endorsement of its claims by the Society for Healthcare Epidemiology of America, by the Editor, or by the University of Chicago. Correspondence regarding advertising should be addressed to the business office in Chicago (see above).

Permissions

The copyright code on the first page of an article in this journal indicates the copyright owner's consent that copies of the article may be made only for personal or internal use or for the personal or internal use of specific clients and provided that the copier pays the stated per-copy fee through the Copyright Clearance Center (CCC), 222 Rosewood Dr., Danvers, MA 01923. To request permission for other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale, please write to the Permissions Department, University of Chicago Press, 1427 East 60th St., Chicago, IL 60637-2954. For articles in the public domain, permission to reprint should be obtained from the author.

Subscriptions

Subscription orders and correspondence should be addressed to the University of Chicago Press, P.O. Box 37005, Chicago, IL 60637-2954. Checks should be made out to the University of Chicago Press. All orders must be in US currency. Telephone: (8:00 A.M.–5:00 P.M. Central Standard Time, Monday–Friday) US and Canada toll free, (877) 705-1878; Rest of World, (773) 753-3347. Fax: US and Canada toll free, (877) 705-1879; Rest of World, (773) 753-0811. E-mail: subscriptions@press.uchicago.edu; Web site: <http://www.journals.uchicago.edu>.

Subscription rates (1 year) for *Infection Control and Hospital Epidemiology (ICHE)*:

	Domestic	Foreign With Air Freight	Canadian
Institutions	350.00	399.00	389.50
Individuals	150.00	199.00	175.50
Fellows	55.00	104.00	73.85

Note: All rates in US dollars. All new subscriptions will begin with the January issue. All rates include postage. Canadian rates include 7% GST. *ICHE* single copies: institutions, \$30.00; individuals, \$14.00. Japanese subscription agent: Kinokuniya Company Ltd.

Postmaster: Send address changes to *Infection Control and Hospital Epidemiology*, University of Chicago Press, P.O. Box 37005, Chicago, IL 60637-2954.

Periodicals postage paid at Chicago, Illinois, and at an additional mailing office.

VAP

IS A TOUGH
ENEMY.

Are you doing
all you can to
ZAP VAP®?

You are when you add the *Mallinckrodt®*
Hi-Lo Evac® endotracheal tube to your
arsenal of VAP interventions.

Clinical studies show hospitals
that added the *Hi-Lo Evac* tube
to existing VAP intervention
efforts, such as head of the bed
elevation and regular oral care, real-
ized **additional** VAP rate reductions up
to **74 percent***. Continuous aspiration
of subglottic secretions (CASS) with the
Hi-Lo Evac endotracheal tube is clinically
proven to significantly reduce VAP – a claim
no other endotracheal tube can make.

Need more proof? Call 1-800-NELLCOR
or go to www.ZAPVAP.com to read published
VAP guidelines and improvement stories
using the *Hi-Lo Evac* endotracheal tube.

* Keith DD, et al. Ventilator-associated Pneumonia:
Improved Clinical Outcomes. *Journal of Nursing
Care Quality*. 2004;19(4):328-333

GEISINGER

Infectious Disease Opportunity

Director of System Epidemiology – Infection Control

Geisinger Health System, a nationally recognized leader in quality initiatives, is seeking a BC/BE Infectious Disease Physician to provide medical leadership of an Infection Control Program in an expanding multi-hospital healthcare system. The ideal candidate will possess data analysis skills and have prior experience in an environment which emphasizes quality healthcare delivery. This position will include inpatient ID responsibilities. An advanced degree (MPH) is desirable but not required dependent upon the applicant's qualifications.

Geisinger Health System Includes:

- Geisinger Medical Center, Danville, PA, a 408-bed, Level I tertiary/quaternary care center that includes the Weis Center for Research, Janet Weis Children's Hospital, and the Center for Health Research.
- Geisinger Wyoming Valley, Wilkes-Barre, PA, a 177-bed acute care community hospital nestled on the edge of the Pocono Mountains. It includes a freestanding heart hospital, a comprehensive cancer center and the Janet Weis Children's Hospital pediatric wing.
- Geisinger South Wilkes-Barre, Wilkes-Barre, PA, a acute care community hospital that is licensed for 190 beds, with an additional 20 skilled nursing beds and a 10-bed Adolescent Psychiatry Unit. GSWB offers a wide range of services including an Emergency Department, a fully accredited Sleep Disorders Center, and a Heart Center featuring comprehensive diagnostic, cardiac catheterization laboratory, surgical and cardiac rehabilitation.
- Geisinger Community Practice, more than 40 single and multi-specialty physician offices throughout northeastern and central Pennsylvania.
- Teaching opportunities through our 75 medical and surgical specialties and 23 accredited residency and fellowship programs.
- Opportunities for clinical trials and outcomes research through Geisinger Center for Health Research and the Weis Center for Research.

Geisinger offers physicians:

- An MPH program in conjunction with The Johns Hopkins Bloomberg School of Public Health. The opportunity to pursue this training would be supported for the appropriate candidate.

Introducing the first alcohol-free chlorhexidine gluconate skin prep in a full-size cloth.

Sage® 2% Chlorhexidine Gluconate¹ Cloths

Fast-acting. Broad-spectrum. Persistent. We've taken the best attributes of CHG and made them easier than ever to apply. Our exclusive cloth removes debris and organic matter—while distributing a uniform dose of CHG to the skin. No drips, runs, spills or pooling associated with other skin preps.

Rinse-free. Quick-drying. Proven effective. Our patent-pending formulation exceeds all FDA requirements for antimicrobial efficacy.² And it does all this without alcohol or harsh detergents. No flammability concerns. Less risk of drying out skin. Just effective, skin-friendly bactericidal action.

Feared by bugs. Loved by skin.

Address a known risk factor
for surgical site infections.^{3,4}
