Cambridge **Core**

CAMBRIDGE
UNIVERSITY PRESS

- 671 Wind turbine wakes over hills
S. Shamsoddin & F. Porté-Agel
- 703 The effect of imposed rotary oscillation on the flow-induced vibration of a sphere
A. Sareen, J. Zhao, J. Sheridan, K. Hourigan & M. C. Thompson
- 736 Direct simulation on nonlinear thermokinetic phenomena due to induced-charge electroosmosis
H. Sugioka
- 770 Fluid deformation in random steady three-dimensional flow
D. R. Lester, M. Dentz, T. Le Borgne & F. P. J. de Barros
- 804 Dynamics and stability of gap-flow interference in a vibrating side-by-side arrangement of two circular cylinders
B. Liu & R. K. Jaiman
- 839 Thermocapillary instabilities in a horizontal liquid layer under partial basal slip
K. N. Kowal, S. H. Davis & P. W. Voorhees
- 860 Squeeze flows in liquid films bound by porous disks
D. C. Venerus
- 882 Steady Mach reflection with two incident shock waves
X.-K. Guan, C.-Y. Bai & Z.-N. Wu
- 910 Boundary layer of elastic turbulence
S. Belan, A. Chernykh & V. Lebedev
- 922 Optimal perturbation for two-dimensional vortex systems: route to non-axisymmetric state
Navrose, H. G. Johnson, V. Brion, L. Jacquin & J. C. Robinet
- 953 Spectral analysis of jet turbulence
O. Schmidt, A. Towne, G. Rigas, T. Colonius & G. Brès
- 983 Anisotropic wall permeability effects on turbulent channel flows
K. Suga, Y. Okazaki, U. Ho & Y. Kuwata
- 1017 The shape and motion of gas bubbles in a liquid flowing through a thin annulus
Q. Lei, Z. Xie, D. Pavlidis, P. Salinas, J. Veltin, O. K. Matar, C. C. Pain, A. H. Muggeridge, A. J. Gyllensten & M. D. Jackson
- 1040 Turbulent wake behind side-by-side flat plates: computational study of interference effects
F. H. Dadmarzi, V. D. Narasimhamurthy, H. I. Andersson & B. Pettersen
- 1074 Inertial drag on a sphere settling in a stratified fluid
R. Mehaddi, F. Candelier & B. Mehlig
- 1088 Three-dimensional instability of a flow past a sphere: Mach evolution of the regular and Hopf bifurcations
A. Sansica, J.-Ch. Robinet, F. Alizard & E. Goncalves
- 1116 Turbulence coherence and its impact on wind-farm power fluctuations
N. Tobin & L. P. Chamorro
- S 1130 Stability and collapse of holes in liquid layers
C. Lv, M. Eigenbrod & S. Hardt
- 1156 A vortex-dynamical scaling theory for flickering buoyant diffusion flames
X. Xia & P. Zhang
- 1170 The influence of a poroelastic till on rapid subglacial flooding and cavity formation
D. R. Hewitt, G. P. Chini & J. A. Neufeld
- S 1208 Transition to turbulence over convex surfaces
M. Karp & M. J. P. Hack
- 1238 BOOK REVIEW
- 1242 CORRIGENDUM

JFM Rapids (online only)

- SR1 Upstream-travelling acoustic jet modes as a closure mechanism for screech
D. Edgington-Mitchell, V. Jaunet, P. Jordan, A. Towne, J. Soria & D. Honnery
- R2 Active attenuation of a trailing vortex inspired by a parabolized stability analysis
A. M. Edstrand, Y. Sun, P. J. Schmid, K. Taira & L. N. Cattafesta III
- R3 Three-dimensional mode selection of the flow past a rotating and inline oscillating cylinder
D. Lo Jacono, R. Bourguet, M. C. Thompson & J. S. Leontini
- SR4 Nonlinear dynamics of electrostatic Faraday instability in thin films
D. S. Pillai & R. Narayanan

S indicates supplementary data or movies available online.

- S 1 From a steady plume to periodic puffs during confined carbon dioxide dissolution
P. Meunier & F. Nadal
- 28 Particle fountains in a confined environment
M. C. Lippert & A. W. Woods
- S 43 Complex dynamics in a stratified lid-driven square cavity flow
K. Wu, B. D. Welfert & J. M. Lopez
- 67 From electrodiffusion theory to the electrohydrodynamics of leaky dielectrics through the weak electrolyte limit
Y. Mori & Y.-N. Young
- 131 Aerofoil broadband noise reductions through double-wavelength leading-edge serrations: a new control concept
P. Chaitanya, P. Joseph, S. Narayanan & J. W. Kim
- 152 Newly identified principle for aerodynamic heating in hypersonic flows
Y. Zhu, C. Lee, X. Chen, J. Wu, S. Chen & M. Gad-el-Hak
- 181 Marangoni-enhanced capillary wetting in surfactant-driven superspreading
H.-H. Wei
- 210 Two-dimensional pulse dynamics and the formation of bound states on electrified falling films
M. G. Blyth, D. Tseluiko, T.-S. Lin & S. Kalliadasis
- 236 Control of flow around a cylinder by rotary oscillations at a high subcritical Reynolds number
E. Palkin, M. Hadžiabdić, R. Mullyadzhanov & K. Hanjalić
- 267 Breaking of modulated wave groups: kinematics and energy dissipation processes
F. De Vita, R. Verzicco & A. Iafraiti
- 299 Vortex sheet roll-up revisited
A. C. DeVoria & K. Mohseni
- 322 Particle paths in nonlinear Schrödinger models in the presence of linear shear currents
C. W. Curtis, J. D. Carter & H. Kalisch
- 351 The impact of dynamic roughness elements on marginally separated boundary layers
P. Servini, F. T. Smith & A. P. Rothmayer
- 371 Large-eddy simulation of flow over a rotating cylinder: the lift crisis at $Re_D = 6 \times 10^4$
W. Cheng, D. I. Pullin & R. Samtaney
- 408 On viscous propulsion in active transversely isotropic media
G. Cupples, R. J. Dyson & D. J. Smith
- 421 A higher-order slender-body theory for axisymmetric flow past a particle at moderate Reynolds number
A. S. Khair & N. G. Chisholm
- 445 Oblique waves in steady supersonic flows of Bethe–Zel’dovich–Thompson fluids
D. Vimercati, A. Kluwick & A. Guardone
- 469 Modal analysis of the wake past a marine propeller
F. Magionesi, G. Dubbioso, R. Muscari & A. Di Mascio
- 503 Propagation, proppant transport and the evolution of transport properties of hydraulic fractures
J. Wang, D. Elsworth & M. K. Denison
- 535 Hydrodynamic interactions between aerosol particles in the transition regime
J. Corson, G. W. Mulholland & M. R. Zachariah
- 554 Squirming motion in a Brinkman medium
H. Nganguia & O. S. Pak
- 574 Thermocapillary flow between longitudinally grooved superhydrophobic surfaces
E. Yariv
- S 595 Numerical modelling of two-dimensional melt fracture instability in viscoelastic flow
Y. Kwon
- 616 Pore-scale modelling of multiphase reactive flow: application to mineral dissolution with production of CO_2
C. Soulaine, S. Roman, A. Kovscek & H. A. Tchelepi
- S 646 Very small insects use novel wing flapping and drag principle to generate the weight-supporting vertical force
X. Cheng & M. Sun
