MARINE BIOLOGICAL ASSOCIATION OF THE UNITED KINGDOM

PATRON

H.R.H. THE PRINCE PHILIP, DUKE OF EDINBURGH, F.R.S.

OFFICERS AND COUNCIL

President: Prof. C. F. A. PANTIN, Sc.D., D.Sc., Dr Univ., F.R.S.

Vice-Presidents

The Earl of IVEAGH, K.G., C.B., C.M.G., F.R.S. Prof. Sir JAMES GRAY, Kt., C.B.E., M.C., Sc.D.,
LL.D., F.R.S.
Prof. A. V. HILL, C.H., O.B.E., Sc.D., LL.D., G. M. GRAHAM, C.M.G., O.B.E.
F.R.S. Prof. Sir ALISTER C. HARDY, Kt., D.Sc., F.R.S.
Sir EDWARD J. SALISBURY, Kt., C.B.E., D.Sc., C. M. YONGE, C.B.E., D.Sc., F.R.S.
LL.D., F.R.S. Rear Admiral E. G. IRVING, C.B., O.B.E.
Major E. G. CHRISTIE-MILLER

Honorary Members

Dr H. B. BIGELOW Dr A. C. REDFIELD
E. H. E. HAVELOCK, C.B., C.B.E. Prof. G. THORSON, D.Phil.
Prof. Sir ALISTER C. HARDY, Kt., D.Sc., F.R.S. C. M. YONGE, C.B.E., D.Sc., F.R.S.
Dr A. G. HUNTSMAN Prof. L. A. ZENKEVITCH
Prof. HANS PETTERSSON, For. Mem. R.S.

COUNCIL

Elected Members

H. A. COLE, D.Sc. R. D. KEYNES, Ph.D., F.R.S.
Prof. D. J. CRISP, Ph.D. Prof. E. W. KNIGHT-JONES, Ph.D.
R. I. CURRIE C. E. LUCAS, C.M.G., D.Sc.
Prof. G. E. FOGG, Ph.D., F.R.S. C. H. MORTIMER, Dr.phil., D.Sc., F.R.S.
Dr F. C. FRASER, C.B.E., D.Sc. Prof. J. E. SMITH, Sc.D., F.R.S.
Prof. J. E. HARRIS, C.B.E., Ph.D., F.R.S. N. TEBBLE
Prof. A. L. HODGKIN, Sc.D., F.R.S. Prof. W. F. WHITTARD, D.Sc., F.R.S.
Prof. B. KATZ, M.D., D.Sc., F.R.S.

Governors

W. C. TAME (Ministry of Agriculture, Fisheries
and Food) S. SMITH, Ph.D. (Cambridge University)
The Worshipful Company of Fishmongers: EDWARD HINDLE, Sc.D., F.R.S. (British
The Prime Warden Association)
Sir EDWARD CHADWYCK-HEALEY, Bt., M.C. Prof. G. P. WELLS, Sc.D., F.R.S. (Zoological
Col. Sir JOHN G. CAREW POLE, Bt., D.S.O., T.D. Society)
Prof. Sir ALISTER C. HARDY, Kt., D.Sc., F.R.S. Prof. Sir JAMES GRAY, Kt., C.B.E., M.C., Sc.D.,
(Oxford University) LL.D., F.R.S. (Royal Society)

Royal Society Research Professor of Bristol University

JOURNAL OF THE MARINE BIOLOGICAL ASSOCIATION
INSTRUCTIONS FOR THE PREPARATION
OF MANUSCRIPTS

TITLE

The title of the paper should be kept as short as possible.

The name of the author at the beginning of the paper should be followed only by senior qualifications.

TEXT

Manuscripts must be typed (double-spaced) on one side of the paper, leaving ample margins, with the folios numbered. Words to be printed in italic should be underlined. The first mention of Latin names of species should be followed by the authority, except where reference is made to a work in which the authority appears (e.g. *Plymouth Marine Fauna*).

Manuscripts should be as concise as possible. Undue length will undoubtedly lead to delay in publication as the paper will be returned to the author for shortening.

All linear measurements and weights should be in the metric scale.

For symbols and abbreviations, the recommendations of the Royal Society (1951) are followed.

TABLES

Tables should be set out on separate sheets numbered in Arabic numerals, and given a concise heading.

TEXT-FIGURES

Text-figures should be in black ink. It is important to make the lines sufficiently black. Areas to be mechanically stippled should be indicated by light-blue pencil shading.

No drawing should be so large that it must be reduced to less than one-third of its original size. The degree of reduction need not be inserted by the author.

The size of the printed area of the *Journal* page is 18 × 12 cm. The maximum size for a full-page figure (with legend) is 19½ × 13½ cm.

Lettering, numerals, etc., should be marked clearly in blue pencil and indicating the position in which they are to be inserted by an arrow in blue pencil. This should be kept to a workable minimum, all details being included in the legend.

Axes and graduation marks on graphs must be inked in. The lines on graph paper

are not normally reproduced, and should be blue or faint grey.

Legends for figures must be typed all together on a separate sheet, and not inserted on the actual illustrations.

Text-figures are numbered in arabic numerals, and referred to in the text as 'Fig. 1', etc. Where there is a plate containing several figures, the text-figures are referred to as 'Text-fig. 1', etc.

All line-drawings are printed as text-figures, as well as photographs for which fine detail is not required.

PLATES

Photographs should be on smooth-surfaced paper, semi-matt or glossy. The edges of the photograph must be trimmed square. It is important that the background in the photograph be of a uniform tone and free from blemishes. Where several photographs make up a single plate, they are numbered 'Fig. 1', etc.

SUMMARY

Each paper must be accompanied by an informative Summary, giving the main results of the work published.

REFERENCES

References are listed alphabetically at the end of the paper. The full title of the paper must be given. Titles of papers, but not of books, are decapitalized. Titles of Journals are abbreviated as in the *World List of Scientific Publications* (4th ed., 1963 on). Volume (Vol.), Band (Bd.), or Tome (T.) numbers are in Arabic numerals. Where a volume appears in parts the part need only be specified where each has separate pagination. References to books should include the publisher. Citations in text to be given by author's name followed by date in brackets.

Examples:

MARSHALL, S. M., NICHOLLS, A. G. & ORR, A. P., 1939. On the growth and feeding of young herring in the Clyde. *J. mar. biol. Ass. U.K.*, Vol. 23, pp. 427-55.

RUSSELL, F. S. & YONGE, C. M., 1928. *The Seas*. 379 pp. London: Frederick Warne.

Authors are requested to see that their manuscripts are in finished form and completely ready for publication so that corrections may be reduced to a minimum, and these are confined as far as possible to the first proof. If the cost for corrections exceeds a reasonable figure, the author is liable to be charged to the full extent of the excess.

The Journal of General Microbiology

Editors: B. C. J. G. KNIGHT and A. F. B. STANDFAST

Contents of Volume 39, No. 1, April 1965

- J. G. Calderone and M. J. Pickett.** Characterization of Brucellaphages.
- P. Fay.** Heterotrophy and nitrogen fixation in *Chlorogloea fritschii*.
- C. H. Clarke.** Methionine as an antimutagen in *Schizosaccharomyces pombe*.
- Caroline A. McNelly-Ingle and L. C. Frost.** The effect of temperature on the production of Perithecia by *Neurospora crassa*.
- J. F. Morningstar, jun. and R. L. Kisliuk.** Interrelations between two pathways of methionine biosynthesis in *Aerobacter aerogenes*.
- R. A. Altenbern and H. B. Stull.** Inducible lytic systems in the genus *Bacillus*.
- J. A. Broadbent and H. P. Charles.** Some carbon-dioxide requiring mutants of *Neurospora crassa*.
- T. S. Theodore and A. L. Schade.** Growth of *Staphylococcus aureus* in media of restricted and unrestricted inorganic iron availability.
- Barbara Weiss.** An electron microscope and biochemical study of *Neurospora crassa* during development.
- Jean M. Schmidt and R. Y. Stanier.** Isolation and characterization of bacteriophages active against stalked bacteria.
- F. P. Errington, E. O. Powell and N. Thompson.** Growth characteristics of some Gram-negative bacteria.
- S. Kawakita and N. van Uden.** Occurrence and population densities of yeast species in the digestive tracts of gulls and terns.
- C. Panos.** Cellular physiology during logarithmic growth of a Streptococcal L-form.
- M. Elizabeth Davies.** Cellulolytic bacteria in some ruminants and herbivores as shown by fluorescent antibody.
- S. T. Cowan.** Principles and practice of bacterial taxonomy—a forward look.

The subscription rate is 80s. net per volume of 3 parts, single parts 35s. each, plus postage. Three volumes will be issued each year. Orders should be sent to

THE QUARTERLY JOURNAL OF MICROSCOPICAL SCIENCE

JOINT EDITORS:

JOHN R. BAKER, D.Sc., F.R.S.

H. G. CALLAN, D.Sc.

After full discussion with the Board of Directors of the Company of Biologists it has been decided to make a gradual change in the scope of this Journal. It is the Editors' intention to transform the Quarterly Journal of Microscopical Science into a journal of cytology and of the study of organic fine structure. The subject-matter of the journal will continue to be varied, since we interpret the word cytology in the widest sense.

Subscription Price per Volume of 4 Parts £4. 4s.

Single Parts 30s. net (postage extra)

OXFORD UNIVERSITY PRESS
Amen House, Warwick Square, London, E.C. 4

**MEMORIAL UNIVERSITY OF
NEWFOUNDLAND**

St John's, Newfoundland, Canada

*Professor and Head of the
Department of Biology*

Applications are invited for this appointment from established and experienced marine biologists: the University would also be prepared to consider freshwater biologists who are contemplating a realignment of interests in marine work.

The Department of Biology, which incorporates physiology, biochemistry, microbiology, botany and zoology, and which has a heavy concentration of interests on the marine side, will shortly enjoy greatly increased facilities to the extent of approximately 46,000 square feet of laboratory space on the University campus; among the additional facilities of the department will be a new \$750,000 Marine Sciences Laboratory on a 200-acre shore site five miles from the campus. The Director of the Laboratory will be a member of the staff of the Biology Department and responsible to the Professor.

Salary will be in the vicinity of \$14,000 p.a.

Applications, with complete curriculum vitae, list of publications, the names and addresses of three referees, and enclosing a recent photograph, should be sent by airmail to the Dean of Arts and Sciences at the University, St John's, Newfoundland, Canada (from whom further details may be obtained); a copy of the application should also be sent to the Secretary-General, Association of Commonwealth Universities (Branch Office), Marlborough House, Pall Mall, London, S.W. 1.

Modern Biological Studies

Announcing the first volume in a new series

**MARINE
MICROBIAL ECOLOGY**

E. J. FERGUSON WOOD

This book gives the reader a conspectus of Marine Microbial Ecology, and indicates the course of the recent progress and interest in what is a relatively new discipline. It will be of considerable use to many who are not actually interested in Marine Microbiology, providing basic information for workers in other fields, such as Physical and Chemical Oceanography, Marine Biology and Planktology. 42s.
