IXRF Systems, Inc.

The Company

IXRF Systems, Inc. has provided innovative X-ray products since its incorporation in 1993. Offering intuitive, flexible, and powerful X-ray systems at a reasonable price, has separated IXRF from "traditional" EDS companies. IXRF offers its complete suite of analytical tools to *ALL* customers. This means IXRF does *NOT* strip its software down into various expensive packages that graduate in price as "options" are added. Additionally, IXRF extends any new software or feature upgrades to *ALL* its customers, *FREE*, for *LIFE*! To demonstrate that the IXRF System is superior specification-to-specification and price-to-price, IXRF challenges *ANY* EDS company to pit their EDS products against the IXRF Microanalysis System. On the IXRF website, very descriptive "movies" are displayed illustrating the power and performance of the products. This new marketing approach takes the "guess work" out of choosing the correct EDS system, rather than fancy brochures and sales talk. Still not convinced? Contact IXRF and schedule a *LIVE* online demo today!
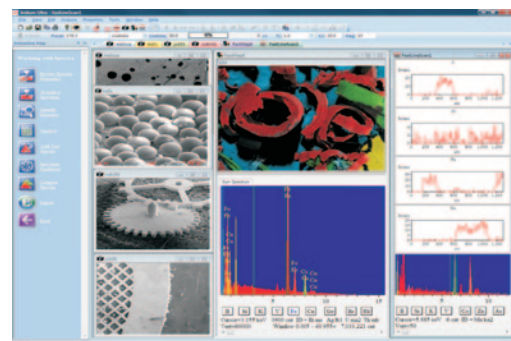

IXRF's Current Products Include

- **Complete New EDS Systems**—IXRF provides complete EDS systems, including new detectors (SDD and Si-Li).

- **EDS System Upgrades**—Using an existing EDS detector, older EDS systems can be upgraded to state-of-the-art systems for a much lower cost than that of new systems.

- **ƒX SEM Tube**—Provides a 500 micron to 5 mm X-ray spot (XRF) analysis in the SEM.

- **X-Beam**—State-of-the-Art Micro XRF. Excitation spot sizes 10, 20, 40 microns or larger sizes with 50 kV excitation.

- **Custom X-ray Applications**—IXRF develops specialty products for a variety of customers. Customized Analytical software, Stage Automation, and product development.

- **Piezo Sub-Stages**—Offer the fastest stage movement available, where high throughput of EDS and Micro-XRF applications is needed.

Advantages

- High Performance Features—offered *Standard*, NOT as option packages

- State-of-the-Art Electronics Design

- Excellent Service and Support (3 year warranty)

- Free Software Updates/Upgrades—includes any platform changes (for the life of the system)

Today

IXRF has recently released its latest software version (free for existing customers) Iridium ULTRA™. IXRF is compatible with 64-bit Microsoft Windows 7—the very latest in PC software compatibility. All features are highly intuitive to the new customer, and offer unsurpassed flexibility and power for advanced applications.
