***Editor-in-chief***

C Borgemeister, ICIPE, Kenya

*The International Journal of Tropical Insect Science* is the only journal devoted exclusively to the latest research in tropical and sub-tropical insect science. Each issue brings you original, peer-reviewed research findings on tropical insects and related arthropods, with special emphasis on their environmentally benign and sustainable management. The journal's scope includes biological diversity, ethnoentomology, biosystematics and environmental issues.

**Price information is available at:**

**Editor-in-Chief**

Stuart J. Marsden, Manchester Metropolitan University, UK

The official journal of BirdLife International, *Bird Conservation International* provides stimulating, international and up-to-date coverage of a broad range of conservation topics, using birds to illuminate wider issues of biodiversity conservation and sustainable resource use. It publishes papers and reviews to promote world-wide research and action for the conservation of birds and the habitats upon which they depend.

Price information is available at [journals.cambridge.org/bci](http://journals.cambridge.org/bci)

## INSTRUCTIONS FOR AUTHORS

*Potential contributors are advised that careful attention to the details below will greatly assist the Editor and thus speed the processing of their manuscripts. Poorly prepared manuscripts will be returned to authors.*

### Submission

All manuscripts must be submitted online via the website:

<http://mc.manuscriptcentral.com/jte>

Detailed instructions for submitting your manuscript online can be found at the submission website by clicking on the 'Instructions and Forms' link in the top right of the screen; and then clicking on the 'Author Submission Instructions' icon on the following page.

The Editor will acknowledge receipt of the manuscript, provide it with a manuscript reference number and assign it to reviewers. The reference number of the manuscript should be quoted in all correspondence with JTE Office and Publisher.

The submission of a manuscript will be taken to imply that the material is original, and that no similar paper has been published or is currently submitted for publication elsewhere. Papers are first inspected for suitability by the Editor or a Board member. Those suitable papers are then critically reviewed by usually two or three expert persons. On their advice the Editor provisionally accepts, or rejects, the paper. If acceptance is indicated the manuscript is usually returned to the author for revision. In some cases a resubmission is invited and on receipt of the new version the paper will be sent to a third referee. If the author does not return the revised or resubmitted version within six months the paper will be classified as rejected. Final acceptance is made when the manuscript has been satisfactorily revised.

### Preparation of the manuscript

Authors are strongly advised to consult a recent issue of the JTE to acquaint themselves with the general layout of articles. Manuscripts should be neatly typewritten on A4 paper i.e. 21 cm × 30 cm. Double sided copy is permissible for review purposes, but final submission for publication must be on one side of the paper only. Double spacing must be used throughout, allowing wide margins (about 3 cm) on all sides. Main text pages should be numbered.

When a revised ms is being returned the author is requested to send a copy of the final version on computer disk (Apple Macintosh or IBM compatible PC) together with the hard copy typescript, giving details of the wordprocessing software used (e.g. Microsoft Word, Word or Word Perfect). However, the publisher reserves the right to typeset material by conventional means if an author's disk proves unsatisfactory.

A paper should be prepared using the following format:

Page 1. *Title page.* This should contain (a) the full title, preferably of less than 20 words and usually containing the geographical location of the study; (b) a running title of not more than 48 letters and spaces; (c) a list of up to 10 key words in alphabetical order suitable for international retrieval systems; (d) the full name of each author; (e) the name of the institution in which the work was carried out; and (f) the present email and postal address of the author to whom proofs should be sent.

Page 2. *Abstract.* This should be a single paragraph, in passive mode, no more than 200 words long, a concise summary of the paper intelligible on its own in conjunction with the title, without abbreviations or references.

Page 3. *et seq.* The main body of the text may contain the following sections in the sequence indicated: (a) Introduction, (b) Methods, (c) Results, (d)

Discussion, (e) Acknowledgements, (f) Literature Cited, (g) Appendices, (h) Tables, (i) Legends to Figures. An extra section between (a) and (b) for Study Site or Study Species might be necessary.

Main headings should be in capital type and ranged left; sub-headings should be ranged left and italicised. A *Short Communication* has a title and keywords but no abstract or section headings until Acknowledgements and item Literature Cited.

*Acknowledgements* should be brief. *Notes* should be avoided if at all possible; any notes will be printed at the end of the paper and not as footnotes.

*Scientific names.* The complete Latin name (genus, species and authority) must be given in full for every organism when first mentioned in the text unless a standard reference is available which can be cited. Authorities might alternatively appear in Tables where they are first used.

*Units of measurement.* Measurements must be in metric units; if not, metric equivalents must also be given. The minus index ( $m^{-1}$ ,  $mm^{-3}$ ) should be used except where the unit is an object, e.g. 'per tree', not 'tree<sup>-1</sup>'). Use  $d^{-1}$ ,  $mo^{-1}$  and  $y^{-1}$  for per day, per month and per year.

*Abbreviations.* In general, abbreviations should be avoided. Numbers one to nine should be spelled out and number 10 onwards given in figures. Dates should follow the sequence day-month-year, e.g. 1 January 1997\*. The 24-hour clock should be used, e.g. 16h 15.

### Language

All papers should be written in English, and spelling should generally follow *The Concise Oxford Dictionary of Current English*. Abstracts in other languages will be printed if the author so desires together with an abstract in English. All abstracts must be provided by the author.

### Literature cited

References to literature in the text should conform to the 'name-and-date' system: e.g. Fleming (1982); (Goh & Sasekumar 1980); Montgomery *et al.* (1981). If a number of references are cited at one place in the text, they should be arranged alphabetically and not chronologically. In the reference list citations should take the forms given below. References with two or more authors should be arranged first alphabetically then chronologically. The names of cited journals should be given in full. Certain foreign language citations may be translated into English, and this should always be done where the English alphabet is not used (e.g. Chinese, Russian, Thai).

FLEMING, T. H. 1982. Foraging strategies of plant-visiting bats. Pp. 287–325 in Kunz, T. H. (ed.). *Ecology of bats*. Plenum Press, New York. 425 pp.

GOH, A. H. & SASEKUMAR, A. 1980. The community structure of the fringing coral reef, Cape Rachado. *Malayan Nature Journal* 34:25–27.

MONTGOMERY, G. G., BEST, R. C. & YAMAKOSHI, M. 1981. A radio-tracking study of the American manatee *Trichechus inunguis* (Mammalia: Sirenia). *Biotropica* 13:81–85.

WHITMORE, T. C. 1984. *Tropical rain forests of the Far East*. (2nd edition). Oxford University Press, Oxford. 352 pp.

Use the following as contractions in text: 'pers. obs.', 'pers. comm.'; but 'unpubl. data', 'in press'. Authors should double-check that all references in the text correspond exactly to those in the Literature Cited section.

### Tables and figures

Tables should be typed, together with their titles, on separate pages. Column headings should be brief, with units of measurement in parentheses. Vertical lines should not be used to separate columns. Avoid presenting tables that are too large to be printed across the page; table width must not exceed 80

characters, including spaces between words, figures and columns. Each table should be numbered consecutively with arabic numerals. The author should indicate in the text where tables and figures are to be inserted; all tables and figures must be mentioned in the text.

Authors should ensure that all figures, whether line drawings or photographs, clarify or reduce the length of the text. The preferred graphics package is Freehand, but many others may be accepted. Please indicate file format and graphics software used for originating artwork files. Typefaces should be restricted to Monotype, Adobe and Bitstream font libraries. High resolution figures should be supplied as TIFF or EPS files, but never as Postscript files. Line drawings should be scanned at 300 dpi and use only conventional Postscript files. Half-tones to be scanned at 600 dpi with the preset dot range from 1–96%. If you wish to compress the files use lossless compression package software such as the LZW compression package.

### Proofs

When pdf proofs are received they should be corrected carefully and returned to the publisher without delay. Errors remaining in these first proofs after the author has checked them are the authors responsibility. Any further editorial changes, apart from minor grammatical and syntactical improvements, will be communicated to the author before second proofs are prepared. Ensure that the editorial office knows of changes in your address.

### Offprints

Twenty-five offprints of each paper will be provided free. Additional copies may be purchased from Cambridge University Press, and these should be ordered from the Press when the proofs are returned using the order form provided.

### Copyright

Authors of articles published in the journal assign copyright to Cambridge University Press (with certain rights reserved) and you will receive a copyright assignment form for signature on acceptance of your paper. Authors receiving requests for permission to reproduce their work should contact Cambridge University Press for advice.

### Business correspondence

Correspondence concerning offprints, copyright, back numbers, advertising and sales to libraries should be addressed to the publishers: Journals Department, Cambridge University Press, The Edinburgh Building, Shaftesbury Road, Cambridge CB2 8RU, UK or Cambridge University Press, 32 Avenue of the Americas, New York, NY 10013–2473 USA.

CONTENTS

Tree growth inference and prediction when the point of measurement changes: modelling around buttresses in tropical forests <b>C. J. E. Metcalf, J. S. Clark &amp; D. A. Clark</b>	1
Contrasting foraging patterns for Africanized honeybees, native bees and native wasps in a tropical agroforestry landscape <b>S. Jha &amp; J. H. Vandermeer</b>	13
The impact of forest conversion to oil palm on arthropod abundance and biomass in Sabah, Malaysia <b>E. C. Turner &amp; W. A. Foster</b>	23
The savanna tree <i>Acacia polyacantha</i> facilitates the establishment of riparian forests in Serengeti National Park, Tanzania <b>G. J. Sharam, A. R. E. Sinclair, R. Turkington &amp; A. L. Jacob</b>	31
Analysis of a supra-annual cycle: reproductive phenology of the palm <i>Oenocarpus bataua</i> in a forest of the Colombian Andes <b>R. Rojas-Robles &amp; F. G. Stiles</b>	41
Perception of a fragmented landscape by neotropical marsupials: effects of body mass and environmental variables <b>G. Forero-Medina &amp; M. V. Vieira</b>	53
Dispersal limitation in epiphytic bromeliad communities in a Costa Rican fragmented montane landscape <b>A. Cascante-Marín, N. von Meijefeldt, H. M. H. de Leeuw, J. H. D. Wolf, J. G. B. Oostermeijer &amp; J. C. M. den Nijs</b>	63
Distribution of androdioecious and hermaphroditic populations of the mangrove <i>Laguncularia racemosa</i> (Combretaceae) in Florida and the Bahamas <b>C. L. Landry, B. J. Rathcke &amp; L. B. Kass</b>	75
The pollination ecology of durian ( <i>Durio zibethinus</i> , Bombacaceae) in southern Thailand <b>S. Bumrungsri, E. Sripaoraya, T. Chongsiri, K. Sridith &amp; P. A. Racey</b>	85
<i>Short Communications</i>	
Pollination ecology and breeding system of <i>Oroxylum indicum</i> (Bignoniaceae) in the foothills of the Western Himalaya <b>Vikas, M. Gautam, R. Tandon &amp; H. Y. Mohan Ram</b>	93
Effect of vegetation density on the use of trails by bats in a secondary tropical rain forest <b>T. Caras &amp; C. Korine</b>	97
Herbaceous monocot plant form and function along a tropical rain-forest light gradient: a reversal of dicot strategy <b>N. G. Swenson</b>	103
