

THE AERONAUTICAL JOURNAL

Editor-in-chief: Prof Peter Bearman

Associate Editors

Chairman: Prof Mike Graham

Professor Chris Atkin
City University, London

Professor Rene de Borst
Eindhoven University of Technology

Professor Richard Brown
University of Strathclyde, Glasgow

Professor Laurent Dala
University of the Witwatersrand, Johannesburg

Mr Chris Fielding
BAE Systems, Warton

Professor Ismet Gursul
University of Bath

Professor Richard Hillier
Imperial College, London

Dr Ravi Nayak
National Aerospace Laboratories, India

Dr Howard Smith
Cranfield University

Professor John Stollery
Cranfield University

Professor Holger Babinsky
University of Cambridge

Dr Trevor Birch
DSTL

Professor Jonathan Cooper
University of Liverpool

Professor Glyn Davies
Imperial College, London

Professor Victor Giurgiutiu
University of South Carolina

Professor Keith Hayward
RAeS Head of Research

Dr John Loizou
VEGA Space

Professor Gareth Padfield
University of Liverpool

Professor Marilyn Smith
Georgia Institute of Technology

Professor Anthony Waas
University of Michigan

Professor Ken Badcock
University of Liverpool

Wg Cdr Mike Bratby
RAeS Air Power Group

Mr Anthony Cross
BAE Systems, Warton

Professor Dimitris Drikakis
Cranfield University

Dr John Green
Consultant Chief Scientist, ARA

Professor Michael Henshaw
Loughborough University

Professor Ken Morgan
Swansea University

Professor Shahrokh Shahpar
Rolls-Royce

Professor Constantinos Soutis
University of Sheffield

Aims and scope

The aims and scope of *The Aeronautical Journal* are intended to reflect the objectives of the Royal Aeronautical Society as expressed in its Charter of Incorporation. Briefly, these are to encourage and foster the advancement of all aspects of aeronautical and space science. Thus the topics of *The Aeronautical Journal* include most of those covered by the various Specialist Groups of the Society, which include:

Aircraft design, aerodynamics, air law, air power, air transport, air navigation, airworthiness and maintenance, aviation medicine, avionics and systems, environmental issues, flight operations, flight simulation, fluid dynamics, fluid mechanics, general aviation, guided flight, human factors, human powered flight, light aviation, management studies, propulsion, rotorcraft, safety, space, structures and materials, structural mechanics, systems and test procedures and UAVs.

Papers are therefore solicited on all aspects of research, design and development, construction and operation of aircraft and space vehicles. Papers are also welcomed which review, comprehensively, the results of recent research developments in any of the above topics.

We recognise the inhibiting pressures of time and confidentiality and acknowledge that many of the design testing, manufacturing and operational problems that industry has to solve contain important information for the whole aerospace community. *The Aeronautical Journal* provides a platform for refereeing and presenting your work to an international audience.

Papers will be considered for publication in *The Aeronautical Journal* if they meet the terms and conditions listed in The Instructions for authors. If these are not met, the Editor reserves the right to withdraw the paper without redress, which may be at any time up to publication.

Papers should be sent to: Prof Peter Bearman, Royal Aeronautical Society, No. 4 Hamilton Place,
London W1J 7BQ, United Kingdom or wayne.davis@aerosociety.com

CONTENTS

Volume 116 Number 1178

April 2012

- S. Özgen and M. Canıbek**
In-flight Ice formation simulation on finite wings and air intakes 337
- P.O. Jemitola, J. Fielding and P. Stocking**
Joint fixity effect on structural design of a box wing aircraft 363
- Y. Jiao, J. Wang, X. Pan and H. Zhou**
Influence analysis of measurement errors in satellite attitude determination based on extended Kalman filter 373
- A.V.G. Cavalieri and P. A.O. Soviero**
Analysis of compressible potential flow over aerofoils using the dual reciprocity method 391
- G. Doig, T.J. Barber, A.J. Neely and D.D. Myre**
Aerodynamics of an aerofoil in transonic ground effect: numerical study at full-scale Reynolds numbers 407

Front Cover: A box wing design airliner by Lockheed Martin. (NASA/Lockheed Martin)
