

**JOURNAL OF
PLASMA PHYSICS**

JOURNAL OF PLASMA PHYSICS exists for the publication of experimental and theoretical research papers on plasma physics and its applications.

EDITOR

DR J. P. DOUGHERTY

*Department of Applied Mathematics and Theoretical Physics, University of Cambridge,
Silver Street, Cambridge, CB3 9EW England*

ASSOCIATE EDITORS

PROF. D. BERSHADER

*Department of Aeronautics and Astronautics,
Stanford University, Stanford, California 94305, U.S.A.*

PROF. F. D. KAHN

*Department of Astronomy,
University of Manchester, Manchester M13 9PL, England*

PROF. W. B. THOMPSON

*Department of Physics,
University of California, La Jolla, California 92037, U.S.A.*

Authors wishing to have papers published in the JOURNAL should communicate them to any one of the persons named above, choosing one in their own country where possible.

Authors are urged to ensure that their papers are written clearly and attractively, in order that their work will be readily accessible to readers.

Manuscripts should be typed in double spacing on one side of the paper only, with references listed at the end in alphabetical order of authors. Drawings should be done in Indian ink on plain white or transparent paper, and should not be larger than 15 in. by 24 in. Lettering should be shown clearly in pencil for reproduction by the printer, and as far as possible information relating to a figure should be placed in the caption rather than on the figure. A typed list of captions should be provided at the end of the manuscript. Proofs of papers from overseas will usually be despatched to authors by airmail. There is no charge for publication. Authors are entitled to receive 50 offprints of a paper in the JOURNAL free of charge, and additional offprints can be purchased if ordered in advance.

For permission to reproduce material from *Journal of Plasma Physics*, please apply to the London or New York office of the Cambridge University Press.

ISI Tear Service, 325 Chestnut Street, Philadelphia, Pennsylvania 19106, U.S.A. is authorized to supply single copies of separate articles for private use only.

JOURNAL OF PLASMA PHYSICS is published once every two months in February, April, June, August, October and December, by Cambridge University Press, P.O. Box 92, London NW1 2DB and 32 East 57th Street, New York, N.Y. 10022.

Three parts form a volume. The 1975 subscription price of a volume (which includes postage) is £20.00 net (US \$60.00 in the U.S.A. and Canada). Single parts cost £8.00 net (US \$24.00 in the U.S.A. and Canada) plus postage.

Copies of the journal for subscribers in the United States of America and Canada are sent by air to New York to arrive with minimum delay.

Second class postage paid at New York, N.Y.

CONTENTS TO VOLUME 13

PART 1 FEBRUARY 1975

The role of energy and momentum conservation in nonlinear beam-plasma interaction. K. JUNGWIRTH	<i>page</i> 1
Closed inner region solution including viscosity for resistive tearing in cylindrical geometry. R. J. HOSKING	27
Kinetic equations for plasmas subjected to a strong time-dependent external field. Part 3. Stochastic equations for plasma turbulence. R. BALESCU and J. H. MISGUICH	33
Kinetic equations for plasmas subjected to a strong time-dependent external field. Part 4. Dynamics of stochastic correlations. R. BALESCU and J. H. MISGUICH	53
The multiple water-bag model for forced oscillations in a warm isotropic plasma. M. L. NOYER, N. NAVET and M. R. FEIX	63
Energy absorption due to continuous spectrum of ideal MHD. J. A. TATARONIS	87
Confluence of three shock waves for transverse shocks and shocks in an aligned MHD field. A. R. BESTMAN	107
Space-charge limits in unneutralized relativistic electron beams. M. E. READ and J. A. NATION	127
Analytic BGK models and their modulational instability. H. SCHAMEL	139
A new and extended concept for reflexion and transmission coefficients for waves propagating in isotropic and anisotropic plasma. J. HEADING	147
Kinetic energy corrections for the free electrons in a high-frequency fully-ionized plasma. G. LUPU	167
On the stability of nonlinear waves coexisting with plasma beams. E. INFELD and G. ROWLANDS	173
On the stability of nonlinear magneto-sonic waves in a collisionless plasma. E. INFELD and G. ROWLANDS	189

PART 2 APRIL 1975

The Maxwellian plus water-bag model: application to the propagation of longitudinal electron waves in a plasma with Maxwellian and mono-energetic supra-thermal electrons. J. P. TREGUIER and D. HENRY	193
Formation and recurrence of ion wave solitons. S. WATANABE	217
Nonlinear waves in a hot plasma by Lorentz transformation. P. C. CLEMMOW	231

On the linear cross-field instability problem. K. B. DYSTHE, K. D. MISRA and J. K. TRULSEN	page 249
Absolute maximum growth rates and enhancement of unstable electromagnetic ion-cyclotron waves in mixed warm-cold plasmas. S. CUPERMAN, L. GOMBEROFF and A. STERNLIEB	259
Hydrodynamic theory of surface-wave fluctuations in inhomogeneous plasma. YU. M. ALEIV, S. VUKOVIĆ, O. M. GRADOV and A. YU. KYRIE	273
Variational calculations for resonance oscillations of inhomogeneous plasmas. Y-K. M. PENG and F. W. CRAWFORD	283
The Maxwell field, its adjoint field and the 'conjugate' field in anisotropic media. K. SUCHY and C. ALTMAN	299
Parametric instability of transverse and Langmuir waves in a plasma. K. F. LEE	317
Wave propagation in a plasma in the presence of a spatially uniform external periodic magnetic field. K. P. DAS	327
Ordinary electromagnetic mode instability. C.-Z. CHENG	335
Thermalization of a beam by beam-plasma interaction. J. H. A. VAN WAKERAN and H. J. HOPMAN	349
A proposed high-current, nanosecond source of energetic ions. J. A. NATION	361
A model laser-compression experiment. J. E. CROW, I. J. SPALDING and J. A. WESSON	367
New, almost electrostatic, anisotropy instability. R. W. LANDAU	377

PART 3 JUNE 1975

Re-normalized quasi-linear approximation of plasma turbulence. Part 1. Modification of the Weinstock weak-coupling limit. J. H. MISGUICH and R. BALESCU	385
Re-normalized quasi-linear approximation of plasma turbulence. Part 2. Validity of short-time expansion and Markovian truncation of the propagator. J. H. MISGUICH and R. BALESCU	419
Re-normalized quasi-linear approximation of plasma turbulence. Part 3. Collective binary correlations and turbulent de-trapping. J. H. MISGUICH and R. BALESCU	429
Reflexion and transmission theorems for characteristic waves in stratified anisotropic absorbing media. K. SUCHY and C. ALTMAN	437
Kelvin-Helmholtz instability of anisotropic plasma in a magnetic field. S. DUHAU and J. GRATTON	451
Plasma flows in a converging and diverging configuration and the associated plasma particle acceleration: kinetic approach. M. FRIDMAN	481

Self-modulation and stability of finite-amplitude ordinary and extraordinary waves in a cold magnetoplasma. Y. FURUTANI	<i>page</i> 499
Monatomic plasma-thermal radiation interaction: a weakly-ionized kinetic model. W. F. PHILLIPS and V. S. ARPACI	523
The propagation of a pulse in a dispersive plasma: an exact solution compared with various approximations. R. BUCKLEY	539
Coherent ion acceleration at a density gradient. S. Y. HSIEH, H. W. BLOOMBERG and S. P. GARY	553
Ion beam ordinary electromagnetic mode instability. J. D. GAFFEY	563
REVIEW	
<i>Basic Principles of Plasma Physics: a Statistical Approach, by S. Ichimaru</i>	571
INDEX TO VOLUME 13	573

JOURNAL OF PLASMA PHYSICS

Volume 13 Part 3 June 1975

CONTENTS

- Re-normalized quasi-linear approximation of plasma turbulence.
Part 1. Modification of the Weinstock weak-coupling limit
J. H. MISGUICH and R. BALESCU *page* 385
- Re-normalized quasi-linear approximation of plasma turbulence.
Part 2. Validity of short-time expansion and Markovian
truncation of the propagator
J. H. MISGUICH and R. BALESCU 419
- Re-normalized quasi-linear approximation of plasma turbulence.
Part 3. Collective binary correlations and turbulent de-trapping
J. H. MISGUICH and R. BALESCU 429
- Reflexion and transmission theorems for characteristic waves in
stratified anisotropic absorbing media
K. SUCHY and C. ALTMAN 437
- Kelvin-Helmholtz instability of anisotropic plasma in a
magnetic field
S. DUHAU and J. GRATTON 451
- Plasma flows in a converging and diverging configuration and
the associated plasma particle acceleration: kinetic approach
M. FRIDMAN 481
- Self-modulation and stability of finite-amplitude ordinary and
extraordinary waves in a cold magnetoplasma
Y. FURUTANI 499
- Monatomic plasma-thermal radiation interaction: a weakly-
ionized kinetic model
W. F. PHILLIPS and V. S. ARPACI 523
- The propagation of a pulse in a dispersive plasma: an exact
solution compared with various approximations
R. BUCKLEY 539
