
INSTRUCTIONS TO CONTRIBUTORS

The *Journal of Helminthology* publishes papers on all aspects of animal parasitic helminths, particularly those of medical or veterinary importance, but only in exceptional circumstances will systematic or taxonomic studies be acceptable.

Manuscripts, which must be in English or French (with an English summary) should be accompanied by a letter signed by *all* the authors and should be addressed to:

The Editors, Journal of Helminthology,
London School of Hygiene and Tropical Medicine,
395A Hatfield Road,
St Albans, Herts AL4 0XQ.
England.

Three copies of a typescript, on size A4 paper with double spacing, should be submitted. Papers should be preceded by a short abstract and will normally have the following sections: brief Introduction; Materials and Methods; Results; Discussion; Acknowledgements; References. However, the form of the paper may vary, depending on its subject matter; recent past issues should be consulted for a suitable form. Research Notes should also be preceded by a brief abstract. Illustrations should be drawn in Indian ink, preferably not more than double the final size. Care should be taken that all illustrations fit into the format of the Journal. The maximum size an illustration will be printed is 12.0×20.0 cm. Where many separate drawings are made, some indication of how they may be grouped to make a corporate plate without undue wastage of space, should be indicated. Some indication of scale (preferably a scale bar) should normally be given on the figure. Photocopies of illustrations should be enclosed for refereeing purposes. Lettering and numbering, which must be of a high standard, should be added by the author, with due regard for subsequent reduction.

Photographs should be glossy prints of the same size as they are to appear in the Journal (maximum size 12.0×20.0 cm). Composite prints must be mounted and can have the separate photographs abutting; they will then have a separating line inserted by the printers. All figures and letters on photographs must be inserted by the author.

Information should not be repeated in the text and in tables or figures. The legends to tables and to figures should be sufficiently detailed for the information to be understood without reference to the text.

References should be given in alphabetical order with the full title of the journal. The following are examples:

ASHFORD, R. W. & BARNISH, G. (1989) *Strongyloides fuelleborni* and similar parasites in animals and man. In: *Strongyloidiasis: a major roundworm infection of man* (editor, D. I. Grove) pp. 271–286. Taylor & Francis: London.

GARSIDE, P. & BEHNKE, J. M. (1989) Primary infection of hamsters with *Ancylostoma ceylanicum*. *Parasitology*, **98**, 283–289.

Contents

	Pages
Redial generations of <i>Fasciola gigantica</i> in the pulmonate snail, <i>Lymnaea truncatula</i> . RAKOTONDRAVAO, A. MOUKRIM, P. HOURDIN and D. RONDELAUD	159-166
Ultrastructural observations on the redial tegument of <i>Paramphistomum epiclitum</i> from the planorbid snail, <i>Indoplanorbis exustus</i> . T. S. DUNN, P. H. DANG, G. MATTISON, R. E. B. HANNA and W. A. NIZAMI	167-176
The diagnostic value of haematuria and proteinuria in <i>Schistosoma haematobium</i> infection in southern Nigeria. O. C. NWAORGU and E. U. ANIGBO	177-185
Abundance/host size relationship in a fish trematode community. A. SAAD-FARES and C. COMBES	187-192
A hidden break in the 28.0S rRNA from <i>Diphyllobothrium dendriticum</i> . K. A. KARLSTEDT, G. I. L. PAATERO, J.-H. MÄKELÄ and B.-J. WIKGREN	193-197
Experimental infection with <i>Taenia saginata</i> (Poland strain) in Taiwanese pigs. P. C. FAN, W. C. CHUNG, C. Y. LIN and Z. S. PAWLOWSKI	198-204
Cytochemical observations on cholinergic, serotonergic and peptidergic neuronal pathways in <i>Cephalochlamys namaquensis</i> . D. M. MCKAY, D. W. HALTON, C. F. JOHNSTON, C. SHAW and I. FAIRWEATHER	205-212
Influence of desiccation of faeces on survival and infectivity of first-stage larvae of <i>Muellerius capillaris</i> and <i>Neostromylus linearis</i> . P. MORRONDO-PELAYO, P. DIEZ-BAÑOS and J. CABARET	213-219
Immunodiagnosis of human dirofilariasis by enzyme-linked immunosorbent assay using recombinant DNA-derived fusion protein. S. SUN and K. SUGANE	220-226
Experimental infections with <i>Nematodirus spathiger</i> in rabbits. H. HOSTE and G. FORT	227-230
A longitudinal study of porcine serological responses to experimental infections with T-1 and T-3 Spanish <i>Trichinella</i> isolates. F. BOLAS, E. ALBARRAN, T. GARATE, R. M. E. PARKHOUSE and A. R. MARTINEZ	231-237
Use of an aceto-carmine procedure to examine the excysted metacercariae of <i>Echinostoma caproni</i> and <i>E. trivolvis</i> . B. FRIED and P. M. MANGER, Jr. (Research Note)	238-240
Acanthocephalan infection in man in northern Nigeria. E. I. IKEH, J. C. ANOSIKE and E. OKON (Research Note)	241-242
