

SCIENCE AND THE SECRETS OF NATURE

Books of Secrets in Medieval and Early Modern Culture
WILLIAM EAMON

IN THE EYE'S MIND

Vision and the Helmholtz-Hering Controversy
R. STEVEN TURNER

New paperback edition
With a new preface by the author

THE NATURALIST IN BRITAIN

A Social History
DAVID ELLISTON ALLEN

KEPLER'S PHYSICAL ASTRONOMY

BRUCE STEPHENSON

According to William Eamon, it is in the "how-to" books written by medieval alchemists, magicians, and artisans that modern science has its roots. In closely examining this rich but little-known source of literature, Eamon reveals that printing technology and popular culture had as great an impact on early modern science as did the traditional academic disciplines.
Cloth: £38.50 ISBN 0-691-03402-8

One of the most persistent controversies of modern science has dealt with human visual perception. It erupted in Germany during the 1860s as a dispute between physiologists Hermann von Helmholtz, Ewald Hering, and their schools. Here R. Steven Turner explores the impassioned exchanges of those rival schools, both to illuminate the clash of theory and to explore the larger role of controversy in the development of science.
Cloth: £37.50 ISBN 0-691-03397-8

At once a major resource for historians of science and an excellent introduction to natural history for the general reader, David Allen's *The Naturalist in Britain* established a precedent for investigating natural history as a social phenomenon. His comprehensive and entertaining discussion creates a vibrant portrait of a scientific movement inextricably woven into a particular culture.

"Allen has made a caring, pioneering attempt towards mapping this vast forest.... It is a book which is unlikely to be superseded."—Roy Porter, *Annals of Science*
Paper: £10.95 ISBN 0-691-03632-2 Due July 1994

"... Unlikely to be surpassed; a more lucid and thorough account is scarcely imaginable. A good deal that was previously murky is here made clear. For an understanding of Keplerian endeavor 'from the inside,' Stephenson's book is undoubtedly the best guide now available."
—Curtis Wilson, *Centaurus*

"A landmark contribution to Keplerian studies and one that must not be missed by any historian or astronomer who seeks an understanding of the genesis of Kepler's laws."
—Owen Gingerich, *Isis*
Paper: £12.95 ISBN 0-691-03652-7 Due July 1994

THE COLLECTED PAPERS OF ALBERT EINSTEIN

VOLUME 3

The Swiss Years: Writings, 1909-1911

EDITED BY

MARTIN J. KLEIN, A. J. KOX,
JÜRGEN RENN, AND ROBERT SCHULMANN

This volume presents Einstein's writings for the two-year period starting in October 1909. The initial date marks the beginning of his first academic appointment, at the University of Zurich. The volume concludes with the masterful report that Einstein gave to the original Solvay Congress. Almost half of this volume consists of the previously unpublished notes he wrote in preparation for his lectures.

264 line illustrations.

Cloth: \$85.00 ISBN 0-691-08772-5

Paperback translation: \$29.95 ISBN 0-691-10250-3

VOLUME 5

The Swiss Years: Correspondence,
1902-1914

EDITED BY

MARTIN J. KLEIN, A. J. KOX,
AND ROBERT SCHULMANN

This volume begins when Einstein went to work at the Swiss Patent Office and closes as Einstein left Switzerland to take up his appointment as a member of the Prussian Academy of Sciences in Berlin. The great majority of the more than 500 letters from and to Einstein presented here have never been published before.

Cloth: \$85.00 ISBN 0-691-03322-6

Paperback translation: \$27.95 ISBN 0-691-00099-9

Each document in these volumes appears in the language in which it was written. The introduction and notes are in English. An English translation of the documents is available.

New from Yale

Richard Owen

Victorian Naturalist

Nicolaas Rupke

Richard Owen (1804-92), one of the leading naturalists of nineteenth-century Britain, is best remembered as a renowned opponent of the Darwinian principle of natural selection. In this first intellectual biography of Owen, Nicolaas Rupke looks beyond the evolution dispute and presents the complete range of Owen's scientific and intellectual achievements, portraying him as the founder of London's monumental Natural History Museum, a leader in Victorian scientific reform, and, after Darwin, the leading naturalist of nineteenth-century Britain. 480pp. 27 illus. £35.00

Yale University Press • 23 Pond Street • London NW3 2PN

VESTIGIA MATHEMATICA
Studies in medieval and early modern mathematics
in honour of H.L.L. Busard

Ed. by M. Folkerts and J.P. Hogendijk.

Amsterdam/Atlanta, GA 1993. 473 pp.

ISBN: 90-5183-536-1

Bound Hfl. 200,-/US-\$ 117.-

Dr. H.L.L. Busard (Venlo) is one of today's leading experts in medieval European mathematics and its transmission from the Arabic. It is in his honour and on the occasion of his 70th birthday that this selection of studies has been prepared.

Almost half of the volume consists of critical editions of important medieval Latin texts which have not been edited before. They include a treatise on the medieval game *Rithmachia*, and the important medieval Latin translation of a series of works by the 9th century Islamic mathematician Abū Kāmil: the *Algebra*, *On the pentagon and decagon* and a fragment on indeterminate equations. The Latin translations have been compared with their Arabic originals and extensive Latin-Arabic glossaries have been added. There is also a text by Roger Bacon on theoretical geometry and the underlying philosophy which is also edited for the first time and translated into English.

Various articles in the volume relate to the Euclidean tradition, which has been an important theme in Dr. Busard's research. There is an article on the intricate medieval Arabic tradition of Euclid's *Elements*; an edition of the (hitherto unpublished) Arabic translation of his minor work *On Division*, lost in Greek; an explanation of Latin nicknames for theorems in the *Elements* and their Arabic origin (which has often been misunderstood); and a discussion of the identity of the mysterious "Ocreatus" mentioned in Latin manuscripts of the *Elements*.

One of the leading themes in the volume is practical mathematics in different cultures, presented by way of concrete examples: mathematics and architecture in Islam, methods for finding the direction of Mecca, the measurement of wine in casks and other practical geometrical problems in 15th century Italy, recreational mathematical problems concerned with the sale of eggs in medieval Byzantium, etc. One article concerns the methodology of dating mathematical manuscripts by means of the numbers used in mathematical problems and other "hidden" information.

Together these articles present a fascinating panorama of mathematical activity at all levels and in all its aspects from the 9th to the 17th century.

Robert Boyle Reconsidered

Edited by M. HUNTER

This study presents a reevaluation of the ideas of the scientist, philosopher and lay theologian, Robert Boyle (1627–91). It consists of eleven essays by leading European and North American scholars on various aspects of Boyle's writings.

£30.00 net HB 0 521 44205 2 249 pp. 1994

A Calendar of the Correspondence of Charles Darwin, 1821–1882

F. BURKHARDT and the late SYDNEY SMITH

The revised edition of this Calendar provides a complete listing of the known correspondence of Charles Darwin with corrections and a supplement updating the information to 1994.

£95.00 net HB 0 521 43423 8 752 pp. 1994

Early Quantum Electrodynamics: A Sourcebook

A. I. MILLER

It provides a panoramic view during 1927–1938 of the development of quantum electrodynamics. The published papers of Bohr, Dirac, Heisenberg and Pauli take us on a fascinating analysis into the meaning and structure of a scientific theory.

£40.00 net HB 0 521 43169 7 285 pp. 1994

The Rise of Early Modern Science

Islam, China and the West

T. E. HUFF

This is a study of why modern science arose only in the West, despite the fact that, by the Middle Ages, Islam and China were more scientifically advanced. The author examines the differences in religious, philosophical and legal institutions of the three civilizations, focusing on the legal concept of 'corporation'.

£35.00 net HB 0 521 43496 3 448 pp. 1993

Anglo-Saxon Medicine

M. L. CAMERON

This is the first book to study Old English medical texts, comparing Anglo-Saxon medical practice with that of the Greeks and Romans, and concluding that it was as good as any previously practised in Western Europe.

Atoms, Metaphors and Paradoxes

Niels Bohr and the Construction of a New Physics

S. PETRUCCIOLI

Translated by IAN MCGILVRAY

This book gives a detailed study of Niels Bohr's *Principle of Correspondence*. It examines the development of crucial and original insights of Bohr during the birth of quantum mechanics in the 1920s and 1930s.

£30.00 net HB 0 521 40259 X 256 pp. 1993

Renaissance and Revolution

Humanists, Scholars, Craftsmen and Natural Philosophers in Early Modern Europe

Edited by J. V. FIELD and F. A. J. L. JAMES

Renaissance and Revolution is a well-illustrated collection of essays which shed light on the beginning of modern science in the period from 1450 to 1750. Figures discussed include Piero della Francesca, Johannes Hevelius, Robert Boyle and Isaac Newton.

£37.50 net HB 0 521 43427 0 309 pp. 1994

Darwinism, War and History

The Debate over the Biology of War from *The Origin of Species* to the First World War

P. CROOK

This book challenges the received view that Darwinism generated essentially aggressive and warlike social values and throws important new light upon militarism, peace movements, the origins of World War I and British social thought.

£45.00 net HB 0 521 44465 9 320 pp. 1994

The Scientific Revolution

A HISTORIOGRAPHIC INQUIRY

H. Floris Cohen

In this first book-length historiographical study of the Scientific Revolution, H. Floris Cohen examines the body of work on the intellectual, social, and cultural origins of early modern science. Cohen critically surveys a wide range of scholarship since the nineteenth century, offering new perspectives on how the Scientific Revolution changed forever the way we understand the natural world and our place in it.

*Paper \$30.95/£21.50 696 pages illus.

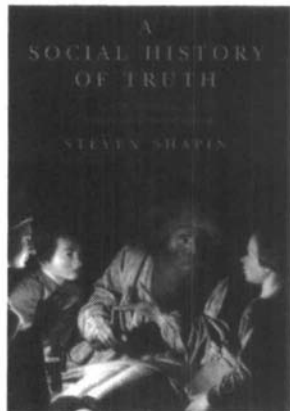

Lords of the Fly

DROSOPHILA GENETICS AND THE EXPERIMENTAL LIFE

Robert E. Kohler

Kohler vividly recounts the material culture and working customs of Thomas Hunt Morgan's "Drosophilists." Through a detailed examination of the ways in which flies have been used in genetic experiments and the moral economy of geneticists, this book brings to light essential features of experimental science.

*Paper \$20.75/£14.25 344 pages illus.

A Social History of Truth

CIVILITY AND SCIENCE IN SEVENTEENTH-CENTURY ENGLAND

Steven Shapin

"Since Thomas Kuhn's *Structure of Scientific Revolutions*, few books have had the same power to enrich our view of the Scientific Revolution."—Stephen Toulmin

Through an elegant recreation of the social world of gentlemen-philosophers, Shapin examines the relations between gentlemanly culture and scientific practice and makes a powerful argument for the importance of trust, honor, and integrity in establishing knowledge about the natural world.

Science and Its Conceptual Foundations series

*Cloth edition available

THE UNIVERSITY OF CHICAGO PRESS

5801 SOUTH ELLIS AVENUE, CHICAGO, ILLINOIS 60637

Membership of the Society, which normally includes a subscription to *The British Journal for the History of Science*, is open to all persons approved by the Council of the Society and elected at an ordinary meeting. The annual subscription for the membership year 1994 is £22.00 (\$45.00) or £11.00 (\$25.00) for associate membership, which includes students at centres of higher education. There is an Introductory Offer for ordinary members who pay £17.00 (\$35.00) for the first year. Applications for membership should be made on a form which is available from the Society's Executive Secretary at the address below. Other sterling rates may apply to overseas members.

Meetings: The Society mounts an ambitious programme of meetings. The pattern is flexible, but includes a three-day summer meeting, usually held at a different British University or Polytechnic each year. About four other meetings, lasting for between one and three days, are held during the year, sometimes devoted to a clearly defined theme or an important anniversary, and often arranged in conjunction with other scholarly societies.

The British Journal for the History of Science is the official organ of the Society. All correspondence on the contents of the *Journal* should be addressed to the Editor, Dr Janet Browne, The Wellcome Institute for the History of Medicine, 183 Euston Road, London, NW1 2BE, England. Books for review should be sent to the Reviews Editor, Dr John Henry, Science Studies Unit, University of Edinburgh, 21 Buccleuch Place, Edinburgh EH8 9LN.

Advertising: Contact the Journals Advertising Manager, Cambridge University Press, The Edinburgh Building, Shaftesbury Road, Cambridge CB2 2RU.

Other publications: BSHS Monograph Series is designed to allow the publication of monographic studies in the history of science quickly and cheaply. All correspondence on the subject of monographs, and any new suggestions for titles, should be sent to the Series Editor, Dr P. Weindling, Wellcome Unit for the History of Medicine, 45-47 Banbury Road, Oxford OX2 6PE, England. Monographs are available to members at a special price, post-free from the Society's Executive Secretary. Non-members may obtain them through bookshops, or post-free from the Executive Secretary. Titles are as follows:

2. *The Letters of Georges Cuvier: A Summary Calendar*. Ed. by Dorinda Outram. 1980. £4.50/\$10.00 (£3.50/\$8.00 to members).
3. *Rationality and Ritual: The Windscale Inquiry and Nuclear Decisions in Britain*. By Brian Wynne. 1982. £7.00/\$15.00 (£5.00/\$11.00 to members).
4. *The Royal Society and Its Fellows 1660-1700: The Morphology of an Early Scientific Institution*. By Michael Hunter. Reprint with additional material (expected early 1994).
5. *Francis Bacon's Natural Philosophy: A New Source. A Transcription of Manuscript Hardwick 72A with Translation and Commentary*. By Graham Rees, assisted by Christopher Upton. 1984. £7.90/\$17.00 (£5.60/\$12.00 to members).
6. *Archives of the British Chemical Industry, 1750-1914: A Handlist*. By Peter J. T. Morris and Colin A. Russell. Contributing editor John Graham Smith. 1988. £14.50/\$31.00 (£9.00/\$19.00 to members).
7. *Index to the Scientific Correspondence of John William Dawson*. By Susan Sheets-Pyenson. 1992. £20.00/\$44.00 (£12.00/\$26.00 to members).
8. *Science and Nature: Essays in the History of the Environmental Sciences*. Ed. by Michael Shortland. 1993. £10.00/\$19.00 (£8.00/\$15.00 to members).

Each year, the Society publishes a *List of Theses in History of Science* in British universities. This is available free to members, and at £3.00 (\$6.00) to non-members on request to the Executive Secretary. Standing orders are accepted from members or non-members who wish to receive the list regularly.

The Society's *Newsletter*, an informal publication edited by Dr Frank A. J. L. James, RICHST, The Royal Institution, 21 Albemarle Street, London W1X 4BS, appears in January, May and September each year. It is free to members, £6.00 (\$12.00) for institutions and non-members. The Society's Education Section also has a regular Newsletter, *Education Forum*, edited by Dr Isobel Falconer, Lumbo Farmhouse, St Andrews, Fife KY16 8NS.

Administrative business of the Society is handled by The Executive Secretary, Wing-Commander G. Bennett, 31 High Street, Stanford in the Vale, Faringdon, Oxfordshire SN7 8LH. The Society is registered in England as a Limited Company (No. 562208) and is a Registered Charity (No. 258854).

Copying: This journal is registered with the Copyright Clearance Center, 222 Rosewood Drive, Danvers, MA 01923. Organizations in the USA who are also registered with the CCC may therefore copy material (beyond the limits permitted by sections 107 and 108 of US copyright law) subject to payment to CCC of the per-copy fee of \$5.00.
