GEOLOGICAL MAGAZINE

ORIGINAL ARTICLES

- Emended Sandbian (Ordovician) conodont biostratigraphy in Baltoscandia and a new species of *Amorphognathus*** 411–427
Tõnn Paiste, Peep Männik and Tõnu Meidla
- Early biomineralization and exceptional preservation of the first thrombolite reefs with archaeocyaths in the lower Cambrian of the western Anti-Atlas, Morocco** 428–443
Abdelfattah Azizi, Abderrazak El Albani, Asmaa El Bakhouché, Olev Vinn, Olabode M. Bankole, Claude Fontaine, Ahmid Hafid, Khaoula Kouraiss and Khadija El Hariri
- Major and rare earth element mineral chemistry of low-grade assemblages inform dynamics of hydrothermal ocean-floor metamorphism in the Dinaridic Neotethys** 444–470
Branimir Šegvić, Damir Slovenec and Luka Badurina
- Mineral textures, mineral chemistry and S isotopes of sulphides from the Tianbaoshan Pb–Zn–Cu deposit in the Sichuan–Yunnan–Guizhou triangle: implications for mineralization process** 471–489
Yu-Long Yang, Cui-Hua Chen, Shun-Ping Qin, Yao Tang, Wen-Qi Guo and Zhi-Peng Qin
- Neo-Tethyan subduction triggered Eocene–Oligocene magmatism in eastern Iran** 490–510
Siavash Omidianfar, Iman Monsef, Mohammad Rahgoshay, Hadi Shafaii Moghadam, Brian Cousens, Ming Chen, Shahrokh Rajabpour and Jianping Zheng
- Chitinozoan biostratigraphy of the regional Arenig Series in Wales and correlation with the global Lower–Middle Ordovician series and stages** 511–534
Chloé EA Amberg, Stewart G Molyneux, Jan A Zalasiewicz and Thijs RA Vandenbroucke
- Multispectral satellite imaging improves detection of large individual fossils** 535–544
Elena Ghezzi, Matteo Massironi and Edward B. Davis
- Post-depositional history of the lower Palaeocene interval using petrographic, CL and geochemical data in the East Tethys: Kopet-Dagh Basin, northeast Iran** 545–560
Akbar Heidari, Luis A Gonzalez, Reza Moussavi-Harami and Narges Shokri
- Persistent increase in carbon burial in the Gulf of Mannar, during the Meghalayan Age: Influence of primary productivity and better preservation** 561–578
Rajeev Saraswat, Karan Rampal Rajput, Sripad Rohidas Bandodkar, Sudhir Ranjan Bhadra, Sujata Raikar Kurtarkar, Hilda Maria João, Thejasino Suokhrie and Pankaj Kumar
- Climate-controlled organic matter accumulation as recorded in the Upper Jurassic Argiles de Châtillon Formation, a shallow-marine counterpart of the Kimmeridge Clay Formation** 579–600
I. C. van der Hoeven, R. M. C. H. Verreussel, A. Riboulleau, N. Tribouillard and B. van de Schootbrugge
- Petrogenesis and tectonic implications of the early Mesozoic granitoids in the northern Alxa region, Central Asian Orogenic Belt** 601–622
Xiaochen Zhao, Chiyang Liu, Jianqiang Wang, Yazhuo Niu, Lei Huang, Shaohua Zhang, Fangpeng Du, Heng Peng, Yingtao Chen, Tao Peng and Zhengzheng Mao
