ICDD Clinic on X-Ray Powder Diffraction June 1993 Fundamentals

June 1993 Advanced Techniques

ICDD Headquarters, Newtown Square, Pennsylvania, USA

The ICDD X-Ray Clinics are the continuation of the SUNY
Clinics which, for some twenty-five years, were held at the
State University of New York at Albany. The ICDD assumed
responsibility for these clinics in 1990. The Clinic is presented
in two separate week-long sessions, each of which stands
alone as a complete course.

ICOTOM 10 – Tenth International Conference on Textures of Materials

September 20-24, 1993

Clausthal, Germany

The conference will address all problems related to crystal orientation in polycrystalline materials of any kind, (*e.g.*, in materials sciences, earth sciences, etc.). Topics to be covered include: Determination of pole figures and individual orientation analysis; Calculation and representation of ODF, MODF and other textural quantities; Experimental studies of texture formation; Texture and directional properties of materials; Mathematical modelling of texture formation and materials properties; Technical applications of texture studies. Although the conference will deal with classical basic metals, particular emphasis will be put on "new materials" such as intermetallics, ceramics, polymers, and composites, including natural materials such as geological and biological ones. Pre- and post-conference workshops will be held on ODF Calculation, Neutron texture analysis and Microscale textures.
