

THE SHIGA HERO

William F.
Sibley

*Line drawing courtesy of
Iwanami Shoten, Publishers.*

“In any academic or intellectual discipline, there appear from time to time certain books which present a standard of accomplishment so much higher than had ever appeared before and which open up areas of inquiry so wholly unanticipated by previous works in the field that they mark a turning point in the evolution of the entire discipline. I believe *The Shiga Hero* to be such a book.”—Jay Rubin, University of Washington

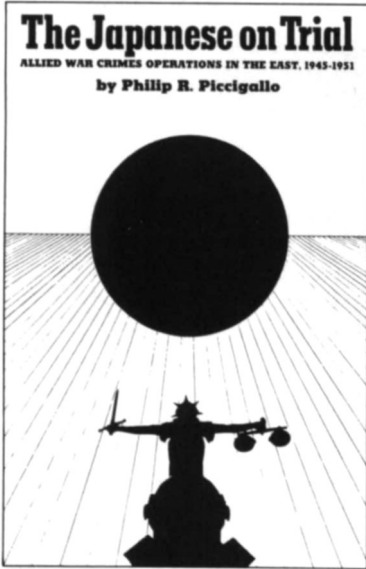

Sibley unifies Shiga’s sparse, fragmented narratives by reconstructing the cyclical biography of a single central character who appears in almost all his works.

This comprehensive study allows a completely new assessment of the post-World War II Allied war crimes trials in the Far East. After discussing the Tokyo tribunals, Piccigallo systematically examines the other more numerous but less well known operations of each Allied nation, documenting procedure and machinery as well as the details of actual trials. His findings show that, with few exceptions, the trials were carefully and fairly conducted, the efforts of defense counsel and the elaborate review procedures being especially noteworthy.

The Development of Kamakura Rule, 1180-1250

A History with Documents

Jeffrey P. Mass. An examination of a formative period in medieval Japanese history, this study analyzes the origins and consequences of the Jōkyū War of 1221, a struggle of modest military proportions but of major political and legal importance. In defeating the traditional Court at Kyoto, the warrior government at Kamakura became the dominant national power; it subsequently created a highly efficient administration that gave Japan a century of social and political stability. Crucial to the success of Kamakura rule was the development of a system of justice that has long been recognized as one of Japan's outstanding achievements. The author studies this system in detail, describing the forms and techniques for arbitrating disputes and showing exactly how suits were brought, expedited, and resolved. The book includes annotated translations of 144 documents, which illuminate the changing power relationships after the Jōkyū War and the developing stages of the judicial process. \$18.50

PROPHETS OF REBELLION

"An outstanding contribution to the comparative study of social phenomena. . . . In the balanced and well organized comparative treatment of five case studies drawn from several areas of the world the author makes a considerable contribution to the specialized study of prophetism and resistance. Migration and Ethnic Conflict in India

MYRON WEINER

Myron Weiner's study of the relationship between internal migration and ethnic conflict in India is exceptional for two reasons: it focuses on intercultural and interstate migration throughout the nation, rather than on merely local or provincial phenomena, and it examines both the social and the political consequences of India's interethnic migrations. \$22.50

The Gradual Revolution

"... The book has boldly taken up the single most important question facing India today, and dared, at least, to examine the pertinent and not the superfluous issues — a challenge which virtually every orthodox development expert in international institutions has shied away from. . . . Ms. Frankel's book, eloquently written and well documented, has established her as a refreshingly incisive, and yet authoritative, critic of Indian development, and by extension, of the worn-out economic growth models still being peddled by some international development institutions."

An Untouchable Community in South India

Structure and Consensus

MICHAEL MOFFATT

While many studies suggest that Indian Untouchables do not entirely share the hierarchical values characteristic of the caste system, Michael Moffatt argues that the most striking feature of the lowest castes is their pervasive cultural consensus with those higher in the system. Based on fourteen months of fieldwork with Untouchable castes in two villages in Tamil Nadu, his study shows how the Untouchables are both excluded and included by the higher castes and how they maintain among themselves a set of hierarchical conceptions and institutions almost identical to those of the dominant social order. \$22.50

The Brahmo Samaj and the Shaping of the Modern Indian Mind

DAVID KOPF

As the forerunners of Indian modernization, the community of Bengali intellectuals known as the Brahmo Samaj played a crucial role in the genesis and development of every major religious, social, and political movement in India from 1820 to 1930. David Kopf launches a comprehensive generation-to-generation study of this group in order to understand the ideological foundations of the modern Indian mind. His book constitutes not only a biographical and a sociological study of the Brahmo Samaj, but also an intellectual history of modern India that ranges from the Unitarian social gospel of Rammohun Roy to Rabindranath Tagore's universal humanism and Jessie Bose's scientism. \$25.00

Japanese Linked Poetry

**An Account with Translations of
Renga and Haikai Sequences**
EARL MINER

As the link between the court poetry of the classical period and the *haiku* poetry of the modern period, the *renga* and *haikai* which constitute Japanese linked poetry have a position of central importance in Japanese literature. This is the first comprehensive study of this major Japanese verse form in a Western language, and includes the critical principles of linked poetry, its placement in the history of Japanese literature, and an analysis of two *renga* and four *haikai* sequences in annotated translation. \$18.50

Modern Japanese Fiction and Its Traditions

An Introduction
J. THOMAS RIMER

"After pathbreaking studies of modern Japanese fiction by Donald Keene, Masao Miyoshi, and Makoto Ueda, the time is ripe for a more or less pantoscopic account of modern Japanese fiction in the light of its traditions. An intelligent *cicerone* is needed, and Rimer fills the need. His book is unquestionably a popularization of Japanese understanding, and it should stimulate study that will lead to a further development in the state of our knowledge of prose fiction in a tradition older than any other in the world."

Japan

A Comparative View

Edited by ALBERT M. CRAIG

Attempting to reverse the trend of non-Japanese scholars to evaluate the history of Japan apart from the Japanese interpretation of its own history, the authors of these essays compare Japan with the West and view the Japanese experience as an equally valid standard for scholarly comparison. A host of new interpretations, hypotheses, and data establish this volume as a significant contribution to a balanced overall perspective on both the universality and the particularity of the Japanese experience. *Sponsored by the Social Science Research Council.* Illus. \$20.00

Songs of Gods, Songs of Humans

The Epic Tradition of the Ainu

DONALD L. PHILIPPI

As an especially beautiful and pure example of the archaic epic styles that were once current among the hunting and fishing peoples of northern Asia, the Ainu epic folklore is of immense literary value. Donald Philippi's translated collection of 33 representative selections treats for the first time, outside of Japan, the Ainu epic folklore in a comprehensive manner. A substantial introduction provides the necessary information about the domain, language, and cultural history of the Ainu people, and devotes particular attention to the type of society that is mirrored in their epic tradition. \$25.00

Indian Malaysians

The View from the Plantation

Paul D. Wiebe and S. Mariappan

This new book by the author of *Social Life in an Indian Slum* (JAS, Feb. 1977) is a look at Malaysia—an ethnically plural society—from the perspective of Indian Malaysians, a minority community. Using the rubber estate context, Wiebe looks at the prospects of this minority community, their relations with the Chinese and the Malays, and their attitudes toward India, their homeland. Wiebe again proves his ability to present his findings in a readable, systematic manner—an important contribution to the study of minority groups and overseas labor migrants. 200pp tables, index, bibl. \$12.00

Defense Policy Formation

Towards Comparative Analysis

edited by James M. Roherty

In this volume, fourteen authorities from six countries present original studies on how defense policy is formed. Public policy analysts and international relations experts delineate a concept of the "defense community" as a framework for comparative defense policy analysis. Both new and established defense communities are compared as the authors examine Australia, South Africa, India, Japan, and France. 320pp tables, charts, figures \$14.95 Winter 1979

Islamic art is perhaps best represented outside the Muslim lands by its ceramic objects which are found in all private and public collections devoted to the Near East. This catalogue, which is devoted to ceramics from the world of Islam, includes ceramics which have not been previously published or studied. They express the taste of the people and are thus distinguished from other secular arts, like gold or silverwork, which were created for members of the court.

Empire and Aftermath

Yoshida Shigeru and the Japanese Experience, 1878–1954

J. W. Dower

This study explores the history of Japan's modern century through one of its most famous political actors, Yoshida Shigeru (1878–1967).

Empire and Aftermath challenges some of the most popular dichotomies in conventional approaches to modern Japan. It demonstrates the persistent dialectic between external and internal issues, and deemphasizes the significance of purportedly "unique" Japanese values and social patterns in explaining either global or domestic power relations. More importantly, it challenges the convenient sharp dichotomy of "Imperial Japan" and the "new Japan." *Harvard East Asian Monographs*, 84 \$20.00

Passage to Power

K'ang-hsi and His Heir Apparent, 1661–1722

Silas H. L. Wu

Wu recreates the conflict and intrigue that marked the struggle for succession to the throne of China during the reign of Emperor K'ang-hsi. K'ang-hsi is depicted here as a psychologically complex individual. His son Ying-jeng had been hand-picked to succeed from infancy, but degenerated into cruelty, immorality, and madness, becoming totally unfit to be the heir to the throne of the Chinese empire. The result is an unusual book that unites history and psychology.

"Double-Edged Secrets sets a new standard of excellence for non-fiction books on intelligence; it should be required reading...by all those involved in the military decision-making process." Admiral Edwin Layton, USN (Ret.), formerly Pacific Fleet Intelligence Officer to Admiral Chester W. Nimitz

DOUBLE-EDGED SECRETS
By Captain W.J. Holmes, USN (Ret.)

Double-Edged Secrets is the first inside account of the gathering and use of intelligence at Pearl Harbor between 1941 and 1945. It is a story that few men living today could tell in the first person, for it covers incidents of the Pacific War that could not be otherwise recorded in those hectic days. Fewer still could write of them as brilliantly as has Captain Holmes.

This story of how the commander in chief in the Pacific used the ever-increasing flow of intelligence is not complete without the details Holmes provides of the herculean efforts put forth by that selfless group of men in a crowded basement in Pearl Harbor. It is all here in this skillfully written book, and it is told with a touch of compassion and humor. 1979. 240 pages. 25 illustrations. 2 maps.
