

SUBSCRIPTION RATES

Subscription rates (post free) for volume 39 (2002) of the *Journal of Applied Probability* are as follows:

US\$238.50; \$A376.35; £145.50 for libraries and institutions;
US\$79.50; \$A125.45; £48.50 for individuals belonging to a recognised scientific society.

Members of the London Mathematical Society should apply direct to the Secretary of the Society for copies of the *Journal*.

Please send all enquiries to: Applied Probability, School of Mathematics and Statistics, University of Sheffield, Sheffield S3 7RH, UK.

We can provide back issue prices on application. Cheques, money orders, etc. should be made out to APPLIED PROBABILITY. Payment is accepted in US, UK or Australian currency or by VISA or Mastercard (phone: +44 114 222 3922; fax: +44 114 272 9782).

NOTES FOR CONTRIBUTORS

Papers published in the *Journal* are of two kinds:

- (1) *research papers* not exceeding 20 printed pages;
- (2) *short communications* of a few printed pages in the nature of notes or brief accounts of work in progress.

Review papers, longer research papers and letters to the editor are published in *Advances in Applied Probability*, a companion journal. (Note: Letters relating specifically to papers which have appeared in the *Journal of Applied Probability* will continue to appear in the *Journal*.)

The editors may publish accepted papers in either journal, according to the space available, in order to meet the 15-month deadline in publication referred to below.

Submission of papers

Papers submitted to the Applied Probability journals are considered on the understanding that they have not been published previously and are not under consideration by another publication. Papers will not be reprinted without the written permission of the Trust. It is the policy not to accept for publication papers which cannot appear in print within 15 months of the date of receipt of the final version. Fifty reprints of each paper will be provided free; additional reprints are available at cost.

Papers should be written in English or French; papers in other languages may be accepted by the editors, but will appear (subject to the author's agreement) in English or French translation. Please supply *three* double-spaced hard copies, at least one of which should be printed on one side of the paper only. The paper should include: (1) a short abstract of approximately 4–10 lines giving a non-mathematical description of the subject matter and results; (2) list of keywords detailing the contents for the purpose of computerised information retrieval; (3) primary and secondary classifications according to the 2000 Mathematics Subject Classification.

Authors are advised to consult *The Author's Guide to the Applied Probability Journals* when preparing papers for submission. A copy of this guide may be obtained free of charge from the Applied Probability Office. An updated version of the guide, with LATEX style files, can be obtained in electronic form on <http://www.appliedprobability.org> or on PC-compatible disk from the Applied Probability Office. For instructions on how papers may be submitted electronically, please consult the notes for contributors at the above URL.

For efficiency in processing, authors are requested to send all submissions to the Applied Probability Office in Sheffield, rather than to individual editors. The address for all submissions is:

**Executive Editor, Applied Probability, School of Mathematics and Statistics,
University of Sheffield, Sheffield S3 7RH, UK.**

COPYRIGHT

The copyright of all published papers is vested in the Trust. When a paper is accepted for publication, the Trust asks the author(s) to assign copyright to the Trust by signing a form in which the terms of copyright are listed. Failure to do this promptly may delay or prevent publication.

Authorisation to photocopy items for internal or personal use, or the internal or personal use of specific clients, is granted by the Applied Probability Trust for libraries and other users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service, provided that the base fee of \$00.70 per copy, plus .20 per page is paid directly to CCC, 222 Rosewood Drive, Danvers, MA 01923, USA. 0021-9002/02 \$00.70 + .20.

Research Papers

- 455 J. F. C. KINGMAN. Stochastic aspects of Lanchester's theory of warfare
 466 AIDAN SUDBURY. Inclusion-exclusion methods for treating annihilating and deposition processes
 479 M. MOLINA, M. MOTA AND A. RAMOS. Bisexual Galton-Watson branching process with population-size-dependent mating
 491 JIE MI. On bounds for some optimal policies in reliability
 503 ATTAHIRU SULE ALFA AND I. T. CASTRO. Discrete-time analysis of a repairable machine
 517 CHUNSHENG ZHANG AND RONG WU. Total duration of negative surplus for the compound Poisson process that is perturbed by diffusion
 533 BRUNO BASSAN, SUBHASH KOCHAR AND FABIO SPIZZICHINO. Some bivariate notions of IFR and DMRL and related properties
 545 GWO DONG LIN AND JORDAN STOYANOV. On the moment determinacy of the distributions of compound geometric sums
 555 PHILIP J. BOLAND, HARSHINDER SINGH AND BOJAN CUKIC. Stochastic orders in partition and random testing of software
 566 SERGE GUILLAS. Doubly stochastic Hilbertian processes
 581 N. R. MOHAN AND S. RAVI. Some properties of two families of classes of life distributions
 590 TIJS HUISMAN AND RICHARD J. BOUCHERIE. The sojourn time distribution in an infinite server resequencing queue with dependent interarrival and service times
 604 MASAKIYO MIYAZAWA AND HIROYUKI TAKADA. A matrix exponential form for hitting probabilities and its application to a Markov-modulated fluid queue with downward jumps
 619 GANG UK HWANG, BONG DAE CHOI AND JAE-KYOON KIM. The waiting time analysis of a discrete-time queue with arrivals as a discrete autoregressive process of order 1

Short Communications

- 630 EROL A. PEKÖZ AND NITINDRA JOGLEKAR. Poisson traffic flow in a general feedback queue
 637 FELÍX BELZUNCE AND JOSÉ-MARÍA RUIZ. Multivariate dispersive ordering of epoch times of nonhomogeneous Poisson processes
 644 VLADIMIR V. MAZALOV AND VESA SAARIO. The house-selling problem with reward rate criterion
 650 LUDWIG BARINGHAUS AND RUDOLF GRÜBEL. From matchbox to bottle: a storage problem
 657 ANTONIO MURCIANO, JAVIER ZAMORA, JESUS LOPEZ-SANCHEZ AND EMILIA RODRIGUEZ-SANTAMARIA. Probability distribution of the number of deceptions in collective robotics
 664 Obituary: Maurice Stevenson Bartlett
