This new journal is being produced as a direct response to the increasing recognition of the fundamental importance of sound systematics in biology, especially as applied to those parasitic organisms which affect the health of man, animals and plants throughout the world.

In scope, it will cover Nematelminthes (including plant parasites), Platyhelminthes, parasitic Arthropoda and Protozoa, and parasitic genera in other invertebrate groups.

The highest scientific standards of work will be required and descriptions of new taxa will not normally be accepted unless specimens are made available for scrutiny by the referees.

Initially, the journal will be issued quarterly, the first part to appear early in 1979. Papers, brief communications and research notes describing original work and major revisions of a high standard will be acceptable for publication. It is the aim to publish within six months of acceptance.

Subscription information.

The subscription price for volume 1 (4 issues), 1979, is Dfl. 120,00 plus Dfl. 18,50 for postage and handling.

Private subscribers are entitled to a 50% discount on the subscription price (i.e. Dfl. 60,00 plus Dfl. 18,50 for postage and handling).

Orders should be sent to our distribution centre: Kluwer Academic Publishers Group, P.O. Box 322, 3300 AH Dordrecht, The Netherlands.
