SIR JOHN PRINGLE

Medicine

Books and Journals from
Cambridge University Press

The Cambridge Medicine programme focuses its book publishing in a defined set of core clinical areas with our great strength in the clinical brain sciences. Other specialties of significant focus include reproductive medicine/obstetrics and gynaecology, anaesthesia and critical care, emergency medicine and pathology.

Our journals programme covers a broad spectrum of medical disciplines including emergency and disaster medicine, epidemiology and infectious diseases, biomedical science, genetics, nutrition, mental health and psychiatry, and neuroscience.

We partner with many learned societies including The Society for Healthcare Epidemiology of America, the Neuroscience Education Institute, and the Royal College of Obstetricians and Gynaecologists.

Core

CAMBRIDGE
UNIVERSITY PRESS

CONTENTS

Original Articles

- 135** Analysis of a high-prescribing state's 2016 outpatient antibiotic prescriptions: Implications for outpatient antimicrobial stewardship interventions
Milner B. Staub, Youssoufou Ouedraogo, Christopher D. Evans, Sophie E. Katz, Pamela P. Talley, Marion A. Kainer and George E. Nelson
- 143** Antibiotic stewardship teams and *Clostridioides difficile* practices in United States hospitals: A national survey in The Joint Commission antibiotic stewardship standard era
Valerie M. Vaughn, M. Todd Greene, David Ratz, Karen E. Fowler, Sarah L. Krein, Scott A. Flanders, Erik R. Dubberke, Sanjay Saint and Payal K. Patel
- 149** Screening of *Clostridioides difficile* carriers in an urban academic medical center: Understanding implications of disease
Sarah W. Baron, Belinda E. Ostrowsky, Priya Nori, David Y. Drory, Michael H. Levi, Wendy A. Szymczak, Michael L. Rinke and William N. Southern
- 154** Interfacility patient sharing and *Clostridioides difficile* infection incidence in the Ontario hospital system: A 13-year cohort study
Kevin A. Brown, Allison McGeer, Kevin L. Schwartz, Christina Diong, Jacob Etches, Gary Garber, Jennie Johnstone, Bradley Langford and Nick Daneman
- 161** Comparison of surveillance and clinical cultures to measure the impact of infection control interventions on the incidence of methicillin-resistant *Staphylococcus aureus* and vancomycin-resistant *Enterococcus* in the hospital
Surbhi Leekha, Lyndsay M. O'Hara, Alyssa Sbarra, Shanshan Li and Anthony D. Harris
- 166** Environmental contamination by carbapenem-resistant *Acinetobacter baumannii*: The effects of room type and cleaning methods
Anat Or Lerner, Jalal Abu-Hanna, Yehuda Carmeli and Vered Schechner
- 172** The polytetrafluoroethylene (PTFE) channel model of cyclic-buildup biofilm and traditional biofilm: The impact of friction, and detergent on cleaning and subsequent high-level disinfection
Maíra M. Ribeiro, Kazuko U. Graziano, Nancy Olson, Rodrigo França and Michelle J. Alfa
- 181** Shifting focus toward healthcare-associated bloodstream infections: The need for neonatal intensive care unit-specific NHSN definitions
Sonali D. Advani, Thomas S. Murray, Christina M. Murdzek, Michael J. Aniskiewicz and Matthew J. Bizzarro
- 187** Effects of daily treatment with acid suppressants for stress ulcer prophylaxis on risk of ventilator-associated events
Xiaojuan Li, Michael Klompas, John T. Menchaca and Jessica G. Young

- 194** A framework to develop semiautomated surveillance of surgical site infections: An international multicenter study
Stephanie M. van Rooden, Evelina Tacconelli, Miquel Pujol, Aina Gomila, Jan A. J. W. Kluytmans, Jannie Romme, Gonny Moen, Elodie Couvé-Deacon, Camille Bataille, Jesús Rodríguez Baño, Joaquín Lanz and Maaïke S.M. van Mourik
- 202** A family empowerment strategy is associated with increased healthcare worker hand hygiene in a resource-limited setting
Jeffrey I. Campbell, Thanh Thuy, Le Trang, Dang Thi Thu Huong, Celeste J. Chandonnet, Truong Thi Hoa, Hao Duong, Nguyen Duc Duat, Le Thi Huyen, Tran Thi Ha, Nguyen Thi Kim Oanh, Ho Thi Minh Than, Le Kien Ngai, Todd M. Pollack and Thomas J. Sandora

Concise Communication

- 209** Antibiotic assessment at hospital discharge—Room for stewardship intervention
Susanne Gapen Barnett, Paul Lata, Meredith Kavalier, Christopher Crnich and Prakash Balasubramanian
- 212** Patterns of use and perceptions of an institution-specific antibiotic stewardship application among emergency department and urgent care clinicians
Timothy C. Jenkins, Jason S. Haukoos, Heather L. Young, Bryan C. Knepper, Katherine C. Shihadeh, Jeffrey Sankoff and Nancy L. Asdigian
- 216** Efficacy of a stewardship intervention focused on reducing unnecessary use of non-*Clostridioides difficile* antibiotics in patients with *Clostridioides difficile* infection
Michelle T. Hecker, Andrea H. Son, Heba Alhmidi, Brigid M. Wilson, Peter M. Wiest and Curtis J. Donskey
- 219** Accuracy and reliability of electronic versus CDC surveillance criteria for non-ventilator hospital-acquired pneumonia
Haiyan Ramirez Batlle and Michael Klompas, for the CDC Prevention Epicenters Program
- 222** A systematic review and meta-analysis of risk factors associated with acquisition of waterborne healthcare-associated infection or colonization in high-risk units
Lina M. Parra, Mireia Cantero, Juliana Sierra, Ángel Asensio and Fernando J. García
- 226** Elution efficiency of healthcare pathogens from environmental sampling tools
Rolieria M. West-Deadwyler, Heather A. Moulton-Meissner, Laura J. Rose and Judith A. Noble-Wang
- 229** The holy grail of hand hygiene compliance: Just-in-time peer coaching that leads to behavior change
Emily E. Sickbert-Bennett, Lauren M. DiBiase, Lisa J. Teal, Shelley K. Summerlin-Long and David J. Weber
- 233** Transmission of *Clostridioides difficile* infection (CDI) from patients less than 3 years of age in a pediatric oncology setting
Elizabeth Robilotti, Weihua Huang, N. Esther Babady, Donald Chen and Mini Kamboj

Research Brief

- 237** Achieving *Clostridioides difficile* infection Health and Human Services 2020 goals: Using agile implementation to bring evidence to the bedside
Lana Dbeibo, Kristen Kelley, Cole Beeler, Areeba Kara, Patrick Monahan, Anthony J. Perkins, Yun Wang, Allison Brinkman, William Snyderman, Nicole Hatfield, Justin Wrin, Joan Miller, Douglas Webb and Jose Azar
- 239** Multidrug-resistant organisms on patients hands in an ICU setting
Aaron N. Dunn, Curtis J. Donskey, Steven M. Gordon and Abhishek Deshpande
- 240** Understanding reasons clinicians obtained endotracheal aspirate cultures and impact on patient management to inform diagnostic stewardship initiatives
Anna C. Sick-Samuels, James C. Fackler, Sean M. Berenholtz and Aaron M. Milstone
- 242** Microbial contamination of heater cooler units used in extracorporeal membrane oxygenation is not aerosolized into the environment: A single-center experience
Stephanie Thomas, David Stevenson, Akaninyene A. Otu, Pascalis Vergidis, Julian Barker, Alan Ashworth, Paul Exton, Malcolm Richardson, Ryan George and Ginny Moore
- 244** Efficacy of a wearable ultraviolet-C light device for semiautomated decontamination of stethoscopes between each use
Greg R. Faulx, Erica L. Emig, Heba Alhmidi, Yilen K. Ng-Wong, Thriveen S.C. Mana, Jennifer L. Cadnum and Curtis J. Donskey
- 246** The little things matter—How peer audits contribute to CLABSI prevention
Lauren M. DiBiase, Shelley K. Summerlin-Long, Mark O. Buchanan, Lisa J. Teal and Emily E. Sickbert-Bennett
- 248** Chronic hepatitis B infection in healthcare personnel identified after nonresponse to hepatitis B vaccine: A report of 4 cases
Natalie Guynn, Emily J. Ciccone, Emily E. Sickbert-Bennett and David J. Weber
- 250** Physician burnout and healthcare epidemiology: Dual implications worthy of greater scrutiny
Gonzalo Bearman, Susy S. Hota and Sarah D. Haessler

Letter to the Editor

- 252** The use of survey-driven feedback to improve antimicrobial stewardship efforts at a single center
Fritzie S. Albarillo, Cara J. Joyce and Maressa Santarossa
- 254** Central venous catheter-related bloodstream infections in patients with hematological malignancies: Comparison of data from a clinical registry and a randomized controlled trial
Enrico Schalk, Daniel Teschner, Marcus Hentrich, Boris Böll, Jens Panse, Martin Schmidt-Hieber, Maria J.G.T. Vehreschild and Lena M. Biehl
- 256** A pseudo-outbreak of Legionnaires' disease in an acute-care hospital
Roland Schulze-Röbbecke

MICROBIAL SURVEILLANCE TESTING MADE EASY

Healthmark offers the One-Two Punch to Identify and Document the Efficacy of Your Endoscope Reprocessing

SCREEN WITH THE **NOW! TEST**

*Rapid Indicator of
Gram-Negative bacteria*

Immediate, practical screening test. Simply flush the lumen of a flexible endoscope, such as a duodenoscope, and follow the procedure for gram-negative bacteria detection in less than 12 hours.

< 10 CFU

 **healthmark**

AUDIT WITH THE **FLEXIBLE ENDOSCOPE SAMPLING KIT**

Surveillance tool for the random testing of duodenoscopes in compliance with CDC guidelines - In association with Nelson Laboratories

A simple and complete kit. After flushing and brushing the lumen and elevator mechanism of a duodenoscope, simply follow the procedure to have the sample solution & brush heads quickly sent to Nelson Laboratories - the leader in independent testing of flexible endoscopes. All tools are included for testing and shipment.

Infection Control & Hospital Epidemiology (ISSN 0899-823X) is published monthly by Cambridge University Press, One Liberty Plaza, New York, NY 10006, USA.

Editorial Office

Communications should be addressed to the Editor, *Infection Control & Hospital Epidemiology*, One Liberty Plaza, New York, NY 10006 (email: iche.managingeditor@cambridge.org). Contributors should consult the Instructions for Contributors, which is available at the journal's Web site.

Advertising

Please direct advertising inquiries to M. J. Mrvica Associates, 2 West Taunton Avenue, Berlin, NJ 08009 (e-mail: mjmrvica@mrvica.com; telephone: 856-768-9360, fax: 856-753-0064). Publication of an advertisement in *Infection Control & Hospital Epidemiology* does not imply endorsement of its claims by the Society for Healthcare Epidemiology of America, by the Editor, or by Cambridge University Press.

Permissions

Articles may be copied or otherwise reused without permission only to the extent permitted by Sections 107 and 108 of the US Copyright Law. Permission to copy articles for personal, internal, classroom, or library use may

be obtained from the Copyright Clearance Center (<http://www.copyright.com>, email: info@copyright.com). For all other uses, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale, please contact Cambridge University Press. Full details may be found at: www.cambridge.org/about-us/rights-permissions.

Subscriptions

The individual subscription rate for 2020 is \$287. Individuals have the option to order directly from Cambridge University Press. Institutional print + electronic and e-only subscriptions are available from Cambridge University Press and include unlimited online access; rates are tiered according to an institution's type and research output and may be reviewed at the journal's homepage on Cambridge Core: cambridge.org/ICHE.

Please direct subscription inquiries and requests for back issues to Customer Services at Cambridge University Press, e-mail: subscriptions_newyork@cambridge.org (USA, Canada, and Mexico) or journals@cambridge.org (outside of USA, Canada, and Mexico).

Postmaster: Send address changes to *Infection Control & Hospital Epidemiology*, Cambridge University Press, One Liberty Plaza, New York, NY 10006 USA.

About the cover:

Since 2015, the cover format of each volume of *Infection Control and Hospital Epidemiology* has been changed to honor one of the many professionals throughout history who recognized not only how disease might be spread but also how those principles could be applied to reduce healthcare-associated infections.

Sir John Pringle (1707–1782) was born into a prominent Scottish family. He initially studied the classics and philosophy followed by 1 year of medical study at the University of Edinburgh. He planned to leave medicine for a mercantile career. While in the Netherlands, Pringle met Boerhaave, and his interest in medicine was re-energized. He received his medical degree in 1730 from the University of Leyden. In 1734, he assumed a chair in the Faculty of Arts in “Pneumatical and Ethical Philosophy” and practiced medicine at the University of Edinburgh.

At the age of 35, Pringle was appointed surgeon to the British Forces, which had formed an alliance with the Habsburg Dynasty against France. In 1745, as Physician General of the Army, Pringle played a role in assuring the humane treatment of prisoners of war and neutrality for military hospitals hundreds of years before the Geneva Convention and the formation of the Red Cross.

In 1748, Pringle returned to London and published his experiences in military hospitals. He recognized that hospital fever and jail fever were spread from person to person and that both syndromes were due to typhus. He mandated that prisoners be washed, that their clothing burnt, and that clean clothes be provided at public expense. He understood that hospitals were a major cause of patient sickness: crowding, filth, and lack of hygiene facilitated the spread of disease. Decades before Florence Nightingale, Pringle advocated for fresh air, cleanliness, and hygiene. He observed that fomites contaminated with body fluids, like bedding, spread sepsis. He adopted microscopy and understood that the mites he saw caused scabies. Many years before Lister and Semmelweis, Pringle used acids and distilled spirits to reduce the spread of sepsis, and the first use of the term “antiseptis” was attributed to him.

During his lifetime, Pringle was recognized for his work as President of the Royal College of Physicians (RCP), Member of the Academy of Sciences, and receipt of the prestigious Copley Gold Medal. He was made a Baronet in 1766 and physician to the King in 1774. By 1780, he retired from medicine and returned to Scotland, but the cold climate did not agree with him. Pringle returned to London, but not before he gifted 10 volumes of his *Medical and Physical Observations* to the RCP (Edinburgh) with the understanding that they would never be published or lent out. He died 4 months later.

The major advances in infection control that Pringle made to the field have too often been attributed to others, and few reminders of him survive to this day. His birthplace was demolished and his grave destroyed during World War II; 2 paintings remain. A memorial to Sir John Pringle can be found in Westminster Abbey albeit in Poets’ Corner; this location is ironic, as one friend noted that an inadequate appreciation of English poetry was one of Pringle’s few failings.
