Ecuador Airlift -

(Above) A Grumman amphibian aircraft lands on the Aguarico river near a survey camp in the Oriente region of Ecuador.

(Inset) A typical scene in a survey camp in the Oriente region of Ecuador.

Oil is found in awkward places. Much of it would stay there without the help of air transport which builds up the necessary airlift for survey and eventual drilling operations on inaccessible jungle and mountain sites. Airwork Limited play a leading part in the provision of these vital air services. Men, machinery and supplies are

dropped by parachute, are landed on improvised airstrips, or on nearby lakes and rivers. In their 22 years of aviation experience, Airwork have been early on the scene of most important developments in the use of air transport. Generally speaking, if a job is better done by air, it's better done by Airwork.

THE SERVICES OF AIRWORK

- Air Transport Contracting • Servicing and Maintenance of Aircraft • Overhaul and Modification of Aircraft • Sale and Purchase of Aircraft • Operation and Management of Flying Schools and Clubs • Radio Sales and Service • Insurance

AIRWORK LIMITED · 15 CHESTERFIELD STREET · LONDON · W.1 · TEL: GROSVENOR 4841

Also at: Blackbushe Airport, Nr. Camberley, Surrey. Booker Aerodrome, Marlow, Bucks. Gatwick Airport, Horley, Surrey. Langley Aerodrome, Bucks. Loughboro' Aerodrome, Dishley, Leics. Perth Aerodrome, Perthshire. R.A.F. Station, Digby, Lincs. Royal Naval Air Station, Brawdy, Nr. Haverfordwest, Wales. Usworth Aerodrome, Castletown, Co. Durham.

Advantages of the new 'R' TYPE FUEL COCK

The new 'R' type Fuel Cock is a most practical proposition. Operation is simple: a rotary arm link is attached to a carrier containing two stainless steel valve plates which have a sliding action over the 'Duralumin' valve seats.

Among the many advantages of the 'R' Cock are light weight and the low operating torque required at the various pressures and temperatures covered by R.A.E. Specifications AD.102 and AD.152. Installation in the fuel system is easy and maintenance simple. For example, the actuator may be removed without detaching the cock from the pipeline. Three mounting lugs are provided to aid installation.

Sizes available: 1", 1¼", 1½", 1¾", 2" B.S.P.

Metric and American threads are available.

AUSTRALIA'S INTERNATIONAL AIRLINE

In meeting today's requirements of trade and travel by air to the East, Australia, and the Pacific, Qantas provides a valuable international service—qualified by the experience of 30 years. Services covering over 30,000 miles of unduplicated air routes include—London-Sydney via Rome, Cairo, Karachi, Calcutta (alternatively via Bombay and Colombo), Singapore, Darwin, Sydney—in parallel with B.O.A.C.

Sydney-Hong Kong, via Labuan (North Borneo) · Sydney-Tokyo, via Manila · Sydney-New Guinea, New Britain and Solomon Islands, via North Queensland airports · Sydney-Pacific Islands, including Norfolk Island, Noumea and Suva · Sydney-Auckland and Sydney-Wellington (by TEAL) linking with the London-Sydney Service. Full details from travel agents.

WESTON

AIRCRAFT INSTRUMENTS

No. 1. Temperature Measuring

The comprehensive range of Weston temperature measuring instruments covers the requirements of existing production aircraft, as well as types now under development. In addition to thermometry for the indication of cylinder, air, oil and radiator temperatures, Weston equipment for aircraft includes instruments for supply, navigational aid instruments, selector switches, etc.

Model S. 128. Dual Engine Temperature Indicator, comprising two Millivoltmeters of 100° scale housed in large-size S.A.E. case. For use in conjunction with copper/constantan, iron/constantan, or chrome/alumel thermocouples.

Model S. 127. Dual Ratiometer Indicator, comprising two 100° ratiometer movements housed in large-size S.A.E. case. For use in conjunction with thermometer bulbs, electrical oil pressure transmitters, electrical position indicators or any combination of two of these to indicate a variety of temperatures, pressures or positions.

Bristol sleeve-valve engines in service

Nearly thirty years ago the prototype of the famous "Bristol" Jupiter delivered about 350 B.H.P. Today, the mighty Centaurus sleeve-valve engine gives nearly 3,000 B.H.P., a story of achievement in technical evolution, quality of manufacture, and world wide service. "Bristol" pioneered the sleeve-valve aero engine, and today the Hercules and Centaurus types are chosen by leading aircraft constructors at home and overseas for their high performance, great reliability, economy and ease of maintenance.

Electric Equipment for Aircraft

With unrivalled manufacturing resources, backed by continual research and development and fifty-three years' experience. BTH enjoys an enviable reputation for the quality of its products. Reliability is of prime importance on land, but is vital in the air, hence the success of BTH aircraft magnetos, and electrical equipment including :

Motor-generating sets with electronic regulators · Gas-operated turbo-starters · Actuators · A.C. and D.C. Motors · Generators · Mazda lamps, etc.

6 *Successive starts
on one battery
charge*

LR 14A

Although ground starting of the jet engines is the normal procedure, these batteries have been specially designed to start the Comet from inside the aircraft when required. On test recently a fully-charged 24-volt set of batteries gave six successive starts without any charge during the intervening 5-minute rest periods. An exceptional performance for a 60 ampere-hour battery weighing only 52½ lb.

Extrusions in 'Hiduminium'

Because of its easy flow and the fact that it can be extruded with a minimum amount of wear on dies and tools 'Hiduminium' sections can be produced in an almost endless variety of shapes. Following the extrusion process, sections are straightened and checked for trueness in the 250 ton straightening machine shown above. 'Hiduminium' Extrusions enable many industries to

make light work of it with
