Upcoming MRS Bulletin Topics:

July 1995 - Single Articles and Special Features: Defects in Intermetallic Compounds, Blue/Green Diodes, Perturbed Angular Correlation Spectroscopy.

**Deadline for advertising:
June 1, 1995**

August 1995 - Single Articles and Special Features: Paths to Materials Information, Fundamental Properties of Intermetallic Compounds, Semiconductor Nanocrystals.

**Deadline for advertising:
July 3, 1995**

SURFACE & COATINGS TECHNOLOGY

An International Journal Devoted to the Science and Application of Advanced Surface Treatments for Improvement of Material Properties

For:
Chemists, Physicists,
Materials Scientists, Metallurgists,
Electrochemists, Engineers, Tribologists

Editors: A. Matthews, Hull, UK
B. D. Sartwell, Washington, DC, USA

Surface and Coatings Technology is a principal forum for the interchange of information on the science, technology and applications of thin and thick coatings and modified surfaces which alter the properties of materials. The scope includes all types of coatings and surface modification techniques (including physical vapour deposition, chemical vapour deposition, electroplating and surface modification by directed energy techniques). Of particular emphasis are the emerging advanced processes such as thermal spraying, sputter deposition, activated reactive evaporation, ion plating, molecular beam epitaxy, ion implantation and pulsed laser surface deposition. Contributions range from original scientific articles concerned with applied research or direct applications of coatings to reviews of current technology in specific areas.
