

Corrigendum

The wrong table was presented as Table 2 on page 594 in the paper by Jacobsen *et al* (2011) Voluntary ingestion of buprenorphine in mice. *Animal Welfare* 20: 591-596. *Animal Welfare* apologises to the authors for this error. The correct table is included below and the online version has been corrected.

Table 2 Mean and median values of duration of voluntary ingestion when providing female and male BALB/c and C57BL/6 mice doses of 1 or 3 mg kg⁻¹ bw buprenorphine mixed in 10 mg kg⁻¹ bw Nutella[®] or Nutella[®] without buprenorphine (10 mg kg⁻¹ bw).

Sex	Mean duration (min)	Median duration (min)	SD	N
Female	40.3	18	43.7	44
Male	63.1	64.5	46.5	43
Total	51.5	41.5	46.3	87

No strain or dose-related difference in duration of voluntary ingestion time was observed when comparing the three treatments, and thus the groups were pooled.
