

# MOLECULAR EVOLUTION AND THE FOSSIL RECORD

SHORT COURSES IN PALEONTOLOGY

NUMBER 1

1988

convened by Bruce Runnegar and J. William Schopf

Thomas W. Broadhead, Series Editor

A Publication of The Paleontological Society

# MOLECULAR EVOLUTION AND THE FOSSIL RECORD

SHORT COURSES IN PALEONTOLOGY

NUMBER 1

1988

convened by Bruce Runnegar and J. William Schopf

Thomas W. Broadhead, Series Editor

A Publication of The Paleontological Society

## CONTENTS

Program. . . . .	ii
Preface. . . . .	iii
Speakers . . . . .	iv
Introduction to the Short Course and to Basic Biochemistry . . . . .	1
by Bruce Runnegar	
Immunological Methods for Determining Phylogenetic Relationships . . . . .	12
by Jerold M. Lowenstein	
Amino Acids and Proteins from Fossils. . . . .	20
by Gordon B. Curry	
The Use of Amino Acid Sequences in Phylogenetic Analysis . . . . .	34
by K.A. Joysey	
Molecular Time Scale for Evolution . . . . .	49
by Allan C. Wilson, Howard Ochman and Ellen M. Prager	
Ribosomal RNA Sequences and the Early History of the Metazoa . . . . .	63
by Rudolf A. Raff	
DNA-DNA Hybridization, Phylogenetic Reconstruction and the Fossil Record .	75
by Charles R. Marshall	
Precambrian Biochemical Evolution. . . . .	89
by J. William Schopf	
Biomarkers: Molecular Fossils. . . . .	98
by Roger E. Summons	
Biochemical Innovations, Oxygen and Earth History. . . . .	114
by Kenneth M. Towe	
The Role of Macromolecules in the Formation of Mineralized Skeletons . .	130
by Stephen Weiner	
Biochemical Evolution and the History of Life. . . . .	138
by W. Ford Doolittle	
References . . . . .	146
