

## Subscription rates

Subscription rates for volume 46 (2014) of *Advances in Applied Probability* (AAP) are as follows (post free and including online access at <http://projecteuclid.org/aap/>): US\$340.00; A\$345.00; £210.00 for libraries and institutions; or US\$114.00; A\$115.00; £70.00 for individuals belonging to a recognised scientific society. The subscription rates for volume 51 (2014) of *Journal of Applied Probability*, the companion publication, are the same; if both journals are ordered directly from the Applied Probability office at the same time, the combined price is discounted by 10%. Please send all enquiries to: Applied Probability Subscriptions, School of Mathematics and Statistics, University of Sheffield, Sheffield S3 7RH, UK (telephone +44 114 222 3922; fax +44 114 222 3926; email [s.c.boyles@sheffield.ac.uk](mailto:s.c.boyles@sheffield.ac.uk)). Cheques, money orders, etc. should be made payable to 'Applied Probability'. Payment is acceptable in US, Australian or UK currency, or by Visa or Mastercard. We can provide back issue prices on application.

## Notes for contributors

Research papers are published in both *Journal of Applied Probability* (JAP) and *Advances in Applied Probability* (AAP), with longer papers typically appearing in AAP. However, assignment of papers between the two journals is made by the Editor on an issue-by-issue basis. A submission to Applied Probability is considered as a submission to either journal. In addition, AAP publishes letters specifically related to papers that have appeared in AAP and JAP publishes short communications of a few printed pages in the nature of notes and letters specifically related to papers that have appeared in JAP. Review papers and papers in *stochastic geometry and statistical applications* are published in AAP.

Fifty offprints of each paper will be provided free, with additional offprints available at cost.

Papers submitted to the Applied Probability journals are considered on the understanding that they have not been published previously and are not under consideration by another publication. Accepted papers will not be published elsewhere without the written permission of the Trust. Submitted papers should be in English. It is the author's responsibility to ensure an acceptable standard of language, and a paper failing to meet this requirement may go back to the author for rewriting before being sent out for review.

Papers should include: (i) a **short abstract** of 4–10 lines giving a non-mathematical description of the subject matter and results; (ii) a list of **keywords** detailing the contents; and (iii) a list of **classifications**, using the 2010 Mathematics Subject Classification scheme (<http://www.ams.org/msc/>). Letters to the Editor need not include these. To assist authors in writing papers in the Applied Probability style, they may use the L<sup>A</sup>T<sub>E</sub>X class file `aptpub.cls`, available from <http://www.appliedprobability.org/>. Use of this class file is not a condition of submission, but will considerably increase the speed at which papers are processed.

Papers should be submitted as hard copy or as electronic files. All submissions will be acknowledged on receipt and **must be accompanied by a covering letter stating the author's postal address and affiliation**. Hard copy: Send **all** submissions to the Applied Probability office in Sheffield, and not to individual editors. Two copies of the paper, at least one of which should be double spaced, should be sent to: **Executive Editor, Applied Probability, School of Mathematics and Statistics, University of Sheffield, Sheffield S3 7RH, UK**. Electronic submission: Please email a **double-spaced** PostScript™ (.ps) or portable document format (.pdf) file, not exceeding 1 Mb. **The files must be clearly identified by name in a separate covering message**. The address for email submissions is [submissions\\_japaap@sheffield.ac.uk](mailto:submissions_japaap@sheffield.ac.uk).

## Copyright

The copyright of all published papers is vested in the Applied Probability Trust. When a paper is accepted for publication, the Trust asks the authors to assign copyright by signing a form in which the terms of copyright are listed. Failure to do this promptly may delay or prevent publication.

Authorisation to photocopy items for internal or personal use, or the internal or personal use of specific clients, is granted by the Applied Probability Trust for libraries and other users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service, provided that the corresponding processing and royalty fees (see <http://www.copyright.com>) are paid directly to CCC, 222 Rosewood Drive, Danvers, MA 01923, USA. 0001–8678/14

PRINTED IN NORTHERN IRELAND AT HISKEY LTD

*Stochastic Geometry and Statistical Applications*

- 1     BARTŁOMIEJ BŁASZCZYSZYN AND D. YOGESHWARAN. On comparison of clustering properties of point processes
- 21    KASPAR STUCKI AND DOMINIC SCHUHMACHER. Bounds for the probability generating functional of a Gibbs point process
- 35    ANNE MARIE SVANE. Local digital estimators of intrinsic volumes for Boolean models and in the design-based setting

*General Applied Probability*

- 59    MATTHIEU JONCKHEERE AND SEVA SHNEER. Stability of multi-dimensional birth-and-death processes with state-dependent 0-homogeneous jumps
- 76    MARIA REMEROVA, SERGEY FOSS AND BERT ZWART. Random fluid limit of an overloaded polling model
- 102   JUKKA LEMPA. Bounded variation control of Itô diffusions with exogenously restricted intervention times
- 121   ULRICH RIEDER AND MARC WITTLINGER. On optimal terminal wealth problems with random trading times and drawdown constraints
- 139   MASAHIKO EGAMI AND KAZUTOSHI YAMAZAKI. On the continuous and smooth fit principle for optimal stopping problems in spectrally negative Lévy models
- 168   TOSHIO NAKATA. The number of collisions for the occupancy problem with unequal probabilities
- 186   LAURA SACERDOTE, OTTAVIA TELVE AND CRISTINA ZUCCA. Joint densities of first hitting times of a diffusion process through two time-dependent boundaries
- 203   RAVI KALPATHY AND HOSAM MAHMOUD. Perpetuities in fair leader election algorithms
- 217   YAN-XIA REN AND TING YANG. Multitype branching Brownian motion and traveling waves
- 241   PETER NEAL. Endemic behaviour of SIS epidemics with general infectious period distributions
- 256   DANIELA BERTACCHI, FÁBIO PRATES MACHADO AND FABIO ZUCCA. Local and global survival for nonhomogeneous random walk systems on  $\mathbb{Z}$
- 279   ALEXANDROS BESKOS, DAN O. CRISAN, AJAY JASRA AND NICK WHITELEY. Error bounds and normalizing constants for sequential Monte Carlo samplers in high dimensions
