INTERNATIONAL GLACIOLOGICAL SOCIETY

The Society was founded in 1936 to provide a focus for individuals interested in practical and scientific aspects of snow and ice. Membership is open to all individuals who have a scientific, practical or general interest in aspects of snow and ice study.

Papers on glaciology are printed in the *Journal of Glaciology*, which is published six times a year. The Society also publishes the *Annals of Glaciology*, a peer-reviewed, thematic journal, two to four times a year. The Society's news bulletin, *ICE*, is published three times a year.

The Society sponsors symposia, meetings and workshops in many countries throughout the year.

Journal of Glaciology publishes original articles and letters concerning scientific research into any aspect of ice and snow, and interactions between ice, snow, climate and other environmental phenomena including the biosphere and permafrost. Research techniques described in the Journal include, for example, field studies, remote sensing, computer modelling and laboratory studies. Research topics include the nature of and changes in mountain glaciers and ice sheets, including former ice sheets. For example, ice cores extracted from the glaciers and ice sheets reveal detailed information on past atmospheric composition and climate, and changes in the extent and thickness of the ice sheets are also related to climate change. The physical, chemical and crystallographic properties of ice and snow are included, especially but not only as they relate to the flow of ice and to past climate. The Journal also publishes studies of sea ice, and of icebergs, along with their interactions with climate on shorter time scales, and with the ocean. Snow and avalanche research is included in the Journal, with several recent articles investigating avalanche dynamics. Snow and ice on other planets is also within the realm of the Journal of Glaciology, as are studies of atmospheric ice.

Journal of **GLACIOLOGY**

CONTENTS Vol 66 No 256 2020

- 175 **David R. Rounce, Tushar Khurana, Margaret B. Short, Regine Hock, David E. Shean, Douglas J. Brinkerhoff**
Quantifying parameter uncertainty in a large-scale glacier evolution model using Bayesian inference: application to High Mountain Asia
- 188 **Daniele Giordan, Niccolò Dematteis, Paolo Allasia, Elena Motta**
Classification and kinematics of the Planpincieux Glacier break-offs using photographic time-lapse analysis
- 203 **Reza Zeinali Torbati, Ian D. Turnbull, Rocky S. Taylor, Derek Mueller**
Evaluation of the relative contribution of meteorological and oceanic forces to the drift of ice islands offshore Newfoundland
- 219 **Astrid Lambrecht, Christoph Mayer, Pascal Bohleber, Vladimir Aizen**
High altitude accumulation and preserved climate information in the western Pamir, observations from the Fedchenko Glacier accumulation basin
- 231 **Douglas R. MacAyeal, Ian C. Willis, Alison F. Banwell, Grant J. Macdonald, Becky Goodsell**
Diurnal lake-level cycles on ice shelves driven by meltwater input and ocean tidal tilt
- 248 **Xiaofei Li, Shichang Kang, Michael Sprenger, Yulan Zhang, Xiaobo He, Guoshuai Zhang, Lekhendra Tripathi, Chaoliu Li, Junji Cao**
Black carbon and mineral dust on two glaciers on the central Tibetan Plateau: sources and implications
- 259 **Paul Weber, Liss M. Andreassen, Clare M. Boston, Harold Lovell, Sidsel Kvarteig**
An ~1899 glacier inventory for Nordland, northern Norway, produced from historical maps
- 278 **Lena U. Hansen, Jan A. Piotrowski, Douglas I. Benn, Heidi Sevestre**
A cross-validated three-dimensional model of an englacial and subglacial drainage system in a High-Arctic glacier
- 291 **Constantijn L. Jakobs, Carleen H. Reijmer, C. J. P. Paul Smeets, Luke D. Trusel, Willem Jan van de Berg, Michiel R. van den Broeke, J. Melchior van Wessem**
A benchmark dataset of in situ Antarctic surface melt rates and energy balance
- 303 **Silje Smith-Johnsen, Basile de Fleurian, Kerim H. Nisancioglu**
The role of subglacial hydrology in ice streams with elevated geothermal heat flux
- 313 **Liss M. Andreassen, Hallgeir Elvehøy, Bjarne Kjøllmoen, Joaquín M. C. Belart**
Glacier change in Norway since the 1960s – an overview of mass balance, area, length and surface elevation changes
- 329 **Michael Behm, Jacob I. Walter, Daniel Binder, Feng Cheng, Michele Citterio, Bernd Kulesa, Kirsty Langley, Phillipe Limpach, Stefan Mertl, Wolfgang Schöner, Mikkel Tamstorf, Gernot Weyss**
Seismic characterization of a rapidly-rising jökulhlaup cycle at the A.P. Olsen Ice Cap, NE-Greenland
- Corrigendum*
- 348 **C. Grima, I. Koch, J. S. Greenbaum, K. M. Soderlund, D. D. Blankenship, D. A. Young, D. M. Schroeder, S. Fitzsimons**
Surface and basal boundary conditions at the Southern McMurdo and Ross Ice Shelves, Antarctica – CORRIGENDUM
