# Journal of Fluid Mechanics

## Editor

M. G. Worster, University of Cambridge, UK

*Journal of Fluid Mechanics* is the leading international journal in the field and is essential reading for all those concerned with developments in fluid mechanics. It publishes authoritative articles covering theoretical, computational and experimental investigations of all aspects of the mechanics of fluids. Each issue contains papers on both the fundamental aspects of fluid mechanics, and their applications to other fields such as aeronautics, astrophysics, physiology, chemical and mechanical engineering, hydraulics, meteorology, oceanography, geology, acoustics and combustion.

# Geological Magazine

## Editors

Mark Allen, University of Durham, UK  
Graham E. Budd, University of Uppsala, Sweden  
Philip Leat, British Antarctic Survey, UK  
Andy Whitham, CASP, University of Cambridge, UK

*Geological Magazine*, established in 1864, is one of the oldest and best-known periodicals in the Earth Sciences. Its worldwide circulation, broad scope and high production values keep the journal at the forefront of the field. It publishes original papers, review articles, rapid communications and discussions about all aspects of the geosciences. It covers petrology, geochemistry, palaeontology, sedimentology, stratigraphy, structural geology, geophysics, and geomorphology, and it includes contributions on volcanology, marine geology, glaciology, palaeoclimatology, palaeoceanography, geochronology, biostratigraphy, geohazards and Earth history, providing a niche for interdisciplinary papers on regional geology and Earth history.

# Polar Record

A Journal of Arctic and Antarctic Research

The official journal of the Scott Polar Research Institute

## Editor-inChief

Ian R. Stone, Scott Polar Research Institute, Cambridge, UK

*Polar Record* is the premier international, peer-reviewed, scholarly journal, publishing articles on a wide variety of areas of polar research in both the Arctic and the Antarctic and keeping its readers up-to-date with an extensive range of topics and concerns. The journal includes original primary research papers in the physical sciences, life sciences, polar technology, humanities, and social sciences, as well as papers concerning current political, economic, legal, and environmental issues. *Polar Record* provides rapid publication, normally within nine months of the initial submission.

# Antarctic Science

Published on behalf of Antarctic Science Ltd, Cambridge

## Editors

David W. H. Walton, British Antarctic Survey, Cambridge, UK

Alan P. M. Vaughan, British Antarctic Survey, Cambridge, UK

Christina L. Hulbe, Portland State University, USA

*Antarctic Science* provides a truly international forum for the broad spread of studies that increasingly characterize scientific research in the Antarctic. The journal attracts papers from all countries currently undertaking Antarctic research. Whilst emphasising interdisciplinary work, the journal publishes papers from environmental management to biodiversity, from volcanoes to icebergs, and from oceanography to the upper atmosphere. No other journal covers such a wide range of Antarctic scientific studies.

## Plasma Medicine

Applications of Low Temperature Gas Plasmas in Medicine and Biology

*Edited by* M. LAROUSSE, M. G. KONG, G. MORFILL,  
*and* W. STOLZ

The introduction of low temperature plasma technology to medical research and to the healthcare arena in general is set to revolutionize the way we cure diseases. This innovative medium offers a valid and advantageous replacement of traditional chemical-based medications. Its application in the inactivation of pathogens in particular, avoids the recurrent problem of drug resistant microorganisms. This is the first book dedicated exclusively to the emerging interdisciplinary field of plasma medicine. The opening chapters discuss plasmas and plasma chemistry, the fundamentals of non-equilibrium plasmas and cell biology. The rest of the book is dedicated to current applications, illustrating a plasma-based approach to wound healing, electrosurgery, cancer treatment and even dentistry. The text provides a clear and integrated introduction to plasma technology and has been devised to answer the needs of researchers from different communities. It will appeal to graduate students and physicists, engineers, biologists, medical doctors and biochemists.

### CONTENTS & CONTRIBUTORS:

Foreword *R. Satava and R. J. Barker*; Part I. Introduction to Non-equilibrium Plasma, Cell Biology, and Contamination: 1. Introduction *M. Laroussi*; 2. Fundamentals of non-equilibrium plasmas *M. Kushner and M. Kong*; 3. Non-equilibrium plasma sources *M. Laroussi and M. Kong*; 4. Basic cell biology *L. Greene and G. Shama*; 5. Contamination *G. Shama and B. Ahlfeld*; Part II. Plasma Biology and Plasma Medicine: 6. Common healthcare challenges *G. Isbary and W. Stolz*; 7. Plasma decontamination of surfaces *M. Kong and M. Laroussi*; 8. Plasma decontamination of gases and liquids *A. Fridman*; 9. Plasma-cell interaction: prokaryotes *M. Laroussi and M. Kong*; 10. Plasma-cell interaction: eukaryotes *G. Isbary, G. Morfill and W. Stolz*; 11. Plasma based wound healing *G. Isbary, G. Morfill and W. Stolz*; 12. Plasma ablation, surgery, and dental applications *K. Stalder, J. Woloszko, S. Kalghatgi, G. McCombs, M. Darby and M. Laroussi*; Index.

## Instructions for Authors

**Editorial policy** The journal welcomes submissions in any of the areas of plasma physics. Its scope includes experimental and theoretical work on basic plasma physics, the plasma physics of magnetic and inertial fusion, laser–plasma interactions, industrial plasmas, plasma devices and plasmas in space and astrophysics. This list is, of course, merely illustrative of the wide range of topics on which papers are invited, and is not intended to exclude any aspect of plasma physics that is not explicitly mentioned.

Authors are urged to ensure that their papers are written clearly and attractively, in order that their work will be readily accessible to readers. Manuscripts must be written in English. *Journal of Plasma Physics* employs a rigorous peer-review process whereby all submitted manuscripts are sent to recognized experts in their subjects for evaluation. The Editors' decision on the suitability of a manuscript for publication is final.

**Submission of manuscripts** Papers may be submitted to the Editor or any of the Associate Editors, preferably by email in pdf format. When a paper is accepted, the authors will be asked to supply source files in LaTeX or Word. Instructions for the preparation of these files and LaTeX style files are given in the Instructions for Contributors link at [journals.cambridge.org/pla](http://journals.cambridge.org/pla).

**Incremental publishing and DOIs** In order to make articles which have been accepted for publication in *Journal of Plasma Physics* available as quickly as possible, they are now published incrementally online (at Cambridge Journals Online; [journals.cambridge.org](http://journals.cambridge.org)) The online version is available as soon as author corrections have been completed and before the article appears in a printed issue. A reference is added to the first page of the article in the journal catchline. This is the DOI – Digital Object Identifier. This is a global publishers' standard. A unique DOI number is created for each published item. It can be used for citation purposes instead of volume, issue and page numbers. It therefore suits the early citation of articles which are published on the web before they have appeared in a printed issue. See [journals.cambridge.org/pla](http://journals.cambridge.org/pla).

**Proof reading** Only typographical or factual errors may be changed at proof stage. The publisher reserves the right to charge authors for correction of non-typographical errors.

**Offprints** Corresponding authors will receive a PDF of their article upon publication. Print offprints may be purchased from the publisher if ordered at first proof stage.

**Copying** This journal is registered with the Copyright Clearance Center, 222 Rosewood Drive, Danvers, MA 01923. Organizations in the USA who are also registered with C.C.C. may therefore copy material (beyond the limits permitted by sections 107 and 108 of US copyright law) subject to payment to C.C.C. of the per copy fee of \$16.00. This consent does not extend to multiple copying for promotional or commercial purposes. Code 0022–3778/2012 \$16.00.

*ISI Tear Sheet Service*, 3501 Market Street, Philadelphia, Pennsylvania 19104, USA, is authorized to supply single copies of separate articles for private use only.

Organizations authorized by the Copyright Licensing Agency may also copy material subject to the usual conditions.

*For all other use*, permission should be sought from Cambridge or the American Branch of Cambridge University Press.
