

# Glasgow Mathematical Journal

*Formerly Proceedings of the Glasgow Mathematical Association*

## CONTENTS

<b>K. McCann and K. S. Williams</b> , The distribution of the residues of a quartic polynomial	67
<b>Gerhard Michler</b> , On maximal nilpotent subrings of right Noetherian rings	89
<b>Joseph Lehner and Morris Newman</b> , On Riemann surfaces with maximal automorphism groups	102
<b>C. R. Putnam</b> , Hilbert transforms and unitary equivalence	113
<b>J. A. Erdos</b> , On products of idempotent matrices	118
<b>Morton E. Harris</b> , Some results on coherent rings II	123
<b>George E. Andrews</b> , On Schur's second partition theorem	127
<b>Thomas G. Hallam</b> , On the nonexistence of $L^p$ solutions of certain nonlinear differential equations	133

## GLASGOW MATHEMATICAL JOURNAL

The *Glasgow Mathematical Journal* is a continuation of the *Proceedings of the Glasgow Mathematical Association*, founded in 1952 by the late Professor T. M. MacRobert. It is published with the support of the University Court of the University of Glasgow. The *Glasgow Mathematical Journal* is published in Parts twice yearly, in January and July; two Parts complete a Volume of approximately 128 pages.

The prepaid subscription for each Volume is Forty Shillings (U.S.A. \$6.50), post free. Single parts may be supplied at a cost of Twenty Shillings each (U.S.A. \$3.25), net.

Copies may be ordered direct from the publishers or from any bookseller.

### *Information for Contributors*

While the *Glasgow Mathematical Journal* is intended primarily for Pure Mathematics, papers on Applied Mathematics will also be accepted. Manuscripts from all parts of the world will be welcomed and given careful consideration.

Manuscripts, preferably typed, should be prepared so as to conform with the practice in current numbers of the *Journal*, especially with regard to line illustrations, references, tables, and summaries. The name of the author and the date of the receipt of the manuscript will be printed under the title. Text figures must be suitable for line block reproduction, lettered in pencil, numbered, and separated from the text but allocated clearly to sections of the text.

References should be placed at the end of the paper, arranged and numbered in alphabetical order. In the text, reference numbers should be enclosed in square brackets and underlined, to distinguish them from formula numbers, which should be quoted in round brackets. The following particulars should be given, in the order indicated:

for references to books—*author, title, edition, place of publication, year of publication, page reference*;

for references to articles in periodicals—*author, title of article, short title of periodical, series no. (if any), volume no., year, pagination*.

A proof is supplied once in galley form, together with an Order Form for offprints. Offprints are supplied free to the number of twenty-five; additional copies, if ordered prior to publication, will be supplied, at cost, at the request of the contributor. Excessive corrections may be charged to the author.

Manuscripts should be sent to:
