## ADVERTISING POLICY AND GUIDELINES

### General Statement

*Prehospital and Disaster Medicine* (PDM) is a scientifically based, peer-reviewed, medical journal. It is the policy of the Editorial Board of PDM that all advertising material be sound scientifically, and thus, meet the following guidelines:

1. Claims must be supported scientifically, and references provided—either within the advertisement or made available upon request;
2. Every effort must be directed to minimize the likelihood of possible erroneous interpretations of the claims; and
3. Advertisements should be aimed at a sophisticated, medical audience.

Further information and rates available at our website: <http://pdm.medicine.wisc.edu>.

### Review

Each advertisement considered for publication is submitted to the Editorial Office for review. Any advertisement that does not meet the guidelines will be returned to the advertiser with suggestions for revisions; the Editorial Office is available for consultation at any time.

Use of these guidelines and the process used for review add to the credibility of PDM and of the product.

Questions may be directed to Marvin L. Birnbaum, MD, PhD, Editor-in-Chief; (+1) (608) 263-9641;

# Prehospital and Disaster Medicine

The Official Journal of  
The World Association for Disaster and Emergency Medicine (WADEM)  
and the  
Nordic Society of Disaster Medicine

*Prehospital and Disaster Medicine* (PDM) is a peer-reviewed international medical journal devoted to the publication of Disaster and Humanitarian Medicine research and education. The principal mission of PDM is the distribution of information relevant to the practice of out-of-hospital and in-hospital emergency medical care, disaster medicine, and public health and safety. PDM provides an international forum for the reporting and discussion of scientific studies, both quantitative and qualitative, that have relevance to the above practices. Its major objectives are: (1) the improvement of the types and quality of the care delivered to patients with perceived medical emergencies and to victims of mass-casualty incidents or disasters, including the public health and safety aspects of such events; and (2) the prevention and/or mitigation of the occurrence of such events and of the effects of these events upon the human population and environment.
