

## MARY WOLLSTONECRAFT AND POLITICAL ECONOMY

Why was Wollstonecraft's landmark feminist work, the *Vindication of the Rights of Woman*, categorised as a work of political economy when it was first published?

Taking this question as a starting point, *Mary Wollstonecraft and Political Economy* gives a compelling new account of Wollstonecraft as critic of the material, moral, social, and psychological conditions of commercial modernity. Offering thorough analysis of Wollstonecraft's major writings – including her two *Vindications*, her novels, her history of the French Revolution, and her travel writing – this is the only book-length study to situate Wollstonecraft in the context of the political economic thought of her time. It shows Wollstonecraft as an economic as much as a political radical, whose critique of the emerging economic orthodoxies of her time anticipates later Romantic thinkers. *This title is part of the Flip it Open Programme and may also be available Open Access. Check our website Cambridge Core for details.*

CATHERINE PACKHAM is Professor of Eighteenth-Century Literature and Thought at the University of Sussex. She is the author of *Eighteenth-Century Vitalism: Bodies, Culture, Politics* (2012) and the co-editor of *Political Economy, Literature and the Formation of Knowledge, 1720–1850* (2018). She was the recipient of a Leverhulme Research Fellowship and has published widely on Wollstonecraft and eighteenth-century political economy.

This series aims to foster the best new work in one of the most challenging fields within English literary studies. From the early 1780s to the early 1830s, a formidable array of talented men and women took to literary composition, not just in poetry, which some of them famously transformed, but in many modes of writing. The expansion of publishing created new opportunities for writers, and the political stakes of what they wrote were raised again by what Wordsworth called those ‘great national events’ that were ‘almost daily taking place’: the French Revolution, the Napoleonic and American wars, urbanization, industrialization, religious revival, an expanded empire abroad, and the reform movement at home. This was an enormous ambition, even when it pretended otherwise. The relations between science, philosophy, religion, and literature were reworked in texts such as *Frankenstein* and *Biographia Literaria*; gender relations in *A Vindication of the Rights of Woman* and *Don Juan*; journalism by Cobbett and Hazlitt; and poetic form, content, and style by the Lake School and the Cockney School. Outside Shakespeare studies, probably no body of writing has produced such a wealth of commentary or done so much to shape the responses of modern criticism. This indeed is the period that saw the emergence of those notions of literature and of literary history, especially national literary history, on which modern scholarship in English has been founded.

The categories produced by Romanticism have also been challenged by recent historicist arguments. The task of the series is to engage both with a challenging corpus of Romantic writings and with the changing field of criticism they have helped to shape. As with other literary series published by Cambridge University Press, this one will represent the work of both younger and more established scholars on either side of the Atlantic and elsewhere.
