

Nutrition Research Reviews

It is hoped to cover the following subjects in future issues.

Comparison of digestive physiology and feeding behaviour in ruminants and camelids
J. Milne

Protein nutrition and livestock reproduction
H. Kaur and S. P. Arora

Early nutrition – later disease
A. Jackson and D. Barker

Novel substrates for gut integrity
B. Rowland

Appetite regulation
J. Blundell and A. Tremblay

Measuring dietary exposure in nutritional epidemiological studies
M. Nelson and B. Margetts

Water intake in pigs
Z. Mroz, A. W. Jongbloed and N. P. Lenis

Food and Mood
P. J. Rogers

Lean tissue growth
J. Grizzard

Vegetarianism and cancer mortality
M. Thorogood

Influence of dietary fatty acids on atherogenic lipoprotein phenotype
B. A. Griffin

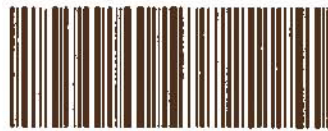

Molecular biology of glucose transport
S. Shirazi-Beechey

Nutrition in emergencies
C. Mills

Nutritional implications of resistant starches
N. G. Asp

Regulation of lean body mass: evidence for a protein-stat
D. J. Millward
