

**LONDON SCHOOL OF HYGIENE
AND TROPICAL MEDICINE**

University of London

The following postgraduate courses are offered:

Full and part-time MSc and diploma:

MSc Clinical Tropical Medicine
MSc Community Health in
Developing Countries
MSc Community Medicine
MSc Epidemiology
MSc Human Nutrition

Diploma in Industrial Health
Diploma in Tropical Medicine
and Health

MSc Medical Demography
MSc Medical Microbiology
MSc Medical Parasitology
MSc Medical Statistics
MSc Occupational Hygiene
MSc Occupational Medicine

Diploma of Professional
Competence in Comprehensive
Occupational Hygiene

Part-time courses not leading to an award:

Medical Statistics and
Epidemiology

Population Studies

Research degrees:

MPhil and PhD

Further information may be obtained from:

BUREAU OF HYGIENE AND TROPICAL DISEASES

Keppel Street, London WC1E 7HT, England

PRICES OF PUBLICATIONS (for 1980 issues)

	<i>Annual Subscription</i>		<i>Single Issue</i>	
	£	\$	£	\$
TROPICAL DISEASES BULLETIN				
<i>(12 issues and index)</i>				
Standard or single-sided	20.00	50.00	2.00	5.00
ABSTRACTS ON HYGIENE				
<i>(12 issues and index)</i>				
Standard or single-sided	30.00	75.00	2.60	6.50
*JOURNAL OF HELMINTHOLOGY				
<i>(4 issues)</i>				
	15.00	37.50	4.00	10.00

*The Bureau handles all subscriptions to this journal, which is published by the London School of Hygiene and Tropical Medicine. Prices shown above include cost of postage by surface mail. Air mail and registered post facilities are available at extra charge.

To: Bureau of Hygiene and Tropical Diseases,
Keppel Street, London WC1E 7HT, England.

The sum of † is enclosed for a subscription for 1980 to

Tropical Diseases Bulletin: Standard :Single-sided *Please tick*
 Abstracts on Hygiene: Standard :Single-sided *appropriate*
 Journal of Helminthology: *box.*

Name
 Address

† Sterling or US\$—cheques, international money orders, postal orders, UNESCO coupons accepted.

INSTRUCTION TO CONTRIBUTORS

The *Journal of Helminthology* publishes papers on all aspects of animal parasitic helminths, particularly those of medical or veterinary importance.

Manuscripts, which must be in English or French (with an English summary), should be addressed to:

The Editor, Journal of Helminthology,
London School of Hygiene and Tropical Medicine,
Keppel Street, London, WC1E 7HT,
England.

Two copies of a typescript, on size A4 paper with double spacing, should be submitted. Papers should be preceded by a short abstract and will normally have the following sections: brief introduction (unheaded); Materials and Methods; Results; Discussion; Acknowledgements; References. However, the form of the paper may vary, depending on its subject matter; recent past issues should be consulted for a suitable form. Illustrations should be drawn in Indian ink, preferably not more than double the final size. Care should be taken that all illustrations fit into the format of the Journal. The maximum size an illustration may be printed is 13.5×18 cm. Where many separate drawings are made, some indication of how they may be grouped to make a corporate plate without undue wastage of space, should be indicated. Some indication of scale should normally be given on the figure. Photocopies of illustrations should also be enclosed for refereeing purposes. Lettering and numbering, which must be of a high standard, should be added by the author, with due regard for subsequent reduction.

Photographs should be glossy prints of the same size as they are to appear in the Journal (maximum size 13.5×18 cm). Composite prints must be mounted and can have the separate photographs abutting; they will then have a separating line inserted by the printers. All figures and letters on photographs must be inserted by the author.

Information should not be repeated in the text and in tables or figures. The legends to tables and to figures should be sufficiently detailed for the information to be understood without reference to the text.

References should be given in alphabetical order with the full title of the journal. The following are examples:

DUKE, B. O. L. (1971) The ecology of onchocerciasis in man and animals. In *Ecology and Physiology of parasites* (ed A. M. Fallis) pp. 213–222. Adam Hilger Ltd.: London.

JAMES, C. and WEBBE, G. (1973) A comparison of Egyptian and East African strains of *Schistosoma haematobium*. *Journal of Helminthology*, **47**, 49–59.

25 offprints are provided free of charge; additional copies may be ordered at the proof stage.

Contents

	Pages
Abnormal development of <i>Hymenolepis nana</i> larvae in immunosuppressed mice. S. B. LUCAS, O. HASSOUNAH, R. MULLER and M. J. DOENHOFF	75 - 82
Immunodiagnosis of human filariasis by counterimmuno-electrophoresis using <i>Litomosoides carinii</i> antigens. A. DASGUPTA, SHUKAL BALA, A. BANERJEE and A. CHAUDHURY	83 - 86
Mating activity of <i>Nematospiroides dubius</i> in laboratory mice. R. BECKETT and A. W. PIKE	87 - 91
<i>Collyricloides massanae</i> Vaucher, 1969, in a starling (<i>Sturnus vulgaris</i> L.) in the Netherlands F. H. M. BORGSTEEDE and TH. SMIT	93 - 95
<i>Necator americanus</i> in infant rabbits: complete development, humoral antibody, leukocyte response and serum protein changes following infection. M. K. BHOPALE, SUSHILA MENON and LAXMI KULKARNI	97 - 104
Infection of <i>Aedes aegypti</i> with <i>Onchocerca gutturosa</i> . Research Note. A. E. BIANCO and K. EL SINNARY	105 - 107
Experimental infection of chickens with <i>Ancylostoma caninum</i> : migration and distribution of larvae in tissues. R. K. AGARWAL and G. N. JOHRI	109 - 115
A description of adult <i>Wuchereria bancrofti</i> (rural strain) from an experimental infection in the long-tailed macaque, <i>Macaca fascicularis</i> (Syn. <i>M. irus</i>). A. S. DISSANAIKE and J. W. MAK	117 - 122
<i>Nilocotyle duplispinctris</i> sp. n. (Trematoda: Paramphistomidae) from <i>Hippopotamus amphibius</i> . O. SEY and M. GRABER	123 - 127
<i>Echidnotaenia tachyglossi</i> (Johnston) gen. et comb. nov. (Anoplocephalata: Linstowiidae) from the monotreme <i>Tachyglossus aculeatus</i> Shaw in Australia. I. BEVERIDGE	129 - 134
Development of <i>Pelodera strongyloides</i> (Schneider, 1860) Schneider, 1866 (Nematoda: Rhabditidae) in culture. G. M. CLIFF and R. C. ANDERSON	135 - 146
Immunofluorescent studies in filariasis: antibody levels in jirds (<i>Meriones unguiculatus</i>) infected with <i>Brugia malayi</i> . MULKIT SINGH, G. J. KANE, C. BURREN and L. M. MACKINLAY	147 - 153
Immunofluorescent studies in filariasis: antibody levels in rats infected with the Malayan forest filaria, <i>Breinlia booliati</i> . MULKIT SINGH, G. B. KANE, EU-HIAN YAP, BENG-CHUAN HO, JOON-WAH MAK and KIM-LIAN KANG	155 - 159
