SPORICIDIN

EPA ACCEPTED:

“SPORICIDIN, DILUTED 1:16, IS TUBERCULOCIDAL AND CAN BE USED AND RE-USED FOR 30 DAYS FOR 100% HOSPITAL LEVEL DISINFECTION IN 10 MINUTES AT TRUE ROOM TEMPERATURE, 68°F AND ABOVE” (REG. #8383-5).’

Important Product Information:

Sporicidin is the **ONLY** dilutable glutaraldehyde-based 10 minute disinfectant that is registered for tuberculocidal re-use without heating. Respiratory and other equipment were used in the studies supporting the re-use claims. It is recommended for respiratory therapy and operating room instruments and equipment.

Sporicidin is recommended by all major scope manufacturers.

**** Cidex now must be heated to 77°F / 25°C for 45 minutes for tuberculocidal activity.** Cidex, and Cidex type products, require a much higher glutaraldehyde concentration (2%) for disinfection and are less effective than Sporicidin, a glutaraldehyde (0.13%)-phenate complex.

Under the most stringent and scientific guidelines, Sporicidin is the best sterilizing/disinfecting product available.
